

# Keep Your Child Healthy

**Immunizations (shots) protect children from deadly diseases.**

These diseases can make it hard to breathe, can cause bad coughs, brain damage, and even death. Some parents may fear that shots can harm their child. But shots have saved the lives of children more than any other medical treatment.

## Please protect your child.

Take this flyer to your child's doctor. Make sure that your child gets all their shots. This is a list of shots your child should get. It tells you how many months old your child needs to be for each shot. They are **free** to Molina members.

	Birth	1 Month	2 Months	4 Months	6 Months	12 Months	15 Months	18 Months
Hepatitis B	Hep B		Hep B				Hep B	
Diphtheria, Tetanus, Pertussis			DTaP	DTaP	DtaP			DtaP
Pneumococcal			PCV	PCV	PCV		PCV
