E Data Element Name Index.....E.1

1 Purpose and Business Overview

1.1 Document Purpose

For the health care industry to achieve the potential administrative cost savings with Electronic Data Interchange (EDI), standards have been developed and need to be implemented consistently by all organizations. To facilitate a smooth transition into the EDI environment, uniform implementation is critical.

The purpose of this implementation guide is to provide standardized data requirements and content for all users who request authorizations or certifications or who respond to such requests using the ANSI ASC X12.336, Health Care Service Review Information (278). This implementation guide provides a detailed explanation of the transaction set by defining data content, identifying valid code tables, and specifying values that are applicable for electronic health care service review requests and responses. The intention of the developers of the 278 is represented in this guide.

This implementation guide is designed to assist those who request reviews (specialty care, treatment, admission) and those who respond to those requests using the 278 format.

1.1.1 Trading Partner Agreements

It is appropriate and prudent for payers to have trading partner agreements that go with the standard Implementation Guides. This is because there are 2 levels of scrutiny that all electronic transactions must go through.

First is standards compliance. These requirements **MUST** be completely described in the Implementation Guides for the standards, and **NOT** modified by specific trading partners.

Second is the specific processing, or adjudication, of the transactions in each trading partner's individual system. Since this will vary from site to site (e.g., payer to payer), additional documentation which gives information regarding the processing, or adjudication, will prove helpful to each site's trading partners (e.g., providers), and will simplify implementation.

It is important that these trading partner agreements **NOT**:

- Modify the definition, condition, or use of a data element or segment in the standard Implementation Guide
- Add any additional data elements or segments to this Implementation Guide
- Utilize any code or data values which are not valid in this Implementation Guide
- Change the meaning or intent of this Implementation Guide

These types of companion documents should exist solely for the purpose of clarification, and should not be required for acceptance of a transaction as valid.

1.1.2 HIPAA Role in Implementation Guides

The Health Insurance Portability and Accountability Act of 1996 (P.L. 104-191 - known as HIPAA) includes provisions for Administrative Simplification, which require the Secretary of Department of Health and Human Services to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and plans. HIPAA directs the Secretary to adopt standards for transactions to enable health information to be exchanged electronically and to adopt specifications for implementing each standard.

Detailed Implementation Guides for each standard must be available at the time of the adoption of HIPAA standards so that health plans, providers, clearing-houses, and software vendors can ready their information systems and application software for compliance with the standards. Consistent usage of the standards, including loops, segments, data elements, etc., across all guides is mandatory to support the Secretary's commitment to standardization.

This Implementation Guide has been developed for use as a HIPAA Implementation Guide for Referral Certification and Authorization. Should the Secretary adopt the X12N 278 Health Care Services Review - Request for Review and Response transaction as an industry standard, this Implementation Guide describes the consistent industry usage called for by HIPAA. If adopted under HIPAA, the X12N 278 Health Care Services Review - Request for Review and Response transaction cannot be implemented except as described in this Implementation Guide.

1.2 Version and Release

This implementation guide is based upon the October 1997 ASC X12 standards, referred to as Version 4, Release 1, Sub-release 0 (004010). This is the first ASC X12N implementation guide for this transaction set. The WEDI (Work Group on Electronic Data Interchange) tutorial for Version 3, Release 5, Sub-release 1 (003051) of the 278, dated February 1995 was the foundation for this guide. Refer to Section 1.3 for information on other implementation guides based upon this transaction set.

1.3 Business Use and Definition

The 278 has the flexibility to accommodate the exchange of information between providers and review entities. This section introduces the business events and processes associated with the 278.

1.3.1 Business Events Supported in this Guide - Request and Response

This implementation guide covers the following business events.

- admission certification review request and associated response
- referral review request and associated response
- health care services certification review request and associated response
- extend certification review request and associated response

- certification appeal review request and associated response

As illustrated in Figure 1, the exchange of information is between the primary parties, the provider and the UMO.

Figure 1. Review Request and Response

1.3.1.1 Dental Referrals and Certifications

You can also use the 278 Health Care Services Review Request and Response for dental referrals and dental certifications.

NOTE:

- The 278 is not intended for use to determine eligibility and benefits for dental related treatment. This is the function of the 270/271 Health Care Eligibility Inquiry and Response.
- The 278 is not intended for use in predetermination pricing. Use the 837 Health Care Claim: Dental to submit an inquiry for pricing information. This pricing information is returned on the 835 Health Care Claim: Payment/Advice.

1.3.2 Business Events Supported in Other 278 Implementation Guides

The 278 transaction set accommodates additional health care services review business events that are covered in separate 278 implementation guides. **These guides, and the business events they represent, are not covered under HIPAA.**

1.3.2.1 Notifications

The 278 can be used to send unsolicited information to trading partners. This information can take the form of copies of health service reviews or notification of the beginning or end of treatment. The 278 Health Care Services Review - Notification implementation guide includes the following events.

- patient arrival notice
- patient discharge notice
- certification change notice
- notification of certification to primary provider(s), other provider(s), and UMOs

As illustrated in Figure 2, the information is sent unsolicited from the information source. The information source is the entity that knows the outcome of the service review request, and can be either a UMO or a provider. For example, in a situ-

Figure 2. Notifications

ation where the primary care provider can authorize specialty referrals that do not require review for medical necessity, appropriateness, or level of care, the primary care provider is the information source. This provider might have responsibility for notifying both the UMO and the service provider of the specialty referral. In cases where the UMO is the decision maker, the UMO would send a notice of certification to the requesting provider and the service provider.

1.3.2.2 Inquiries and Responses

The 278 can be exchanged between interested participants in a bi-directional inquiry/response mode of operation. This mode would allow a participant to inquire about existing certifications.

The 278 Health Care Services Review - Inquiry and Response handles informational inquiries and responses. As illustrated in Figure 3, the primary participants are providers and UMOs where the entity inquiring is either the primary provider or the service provider.

Figure 3. Inquiry and Response

1.3.3 Business Events Not Supported in the 278 Transaction Set

The following business events are not supported in any of the 278 implementation guides.

- Requests to identify service providers that are in network where no services are identified. This implementation guide requires that the requester include information on the service provider or specialty entity and the services requested. The information source or UMO can return a response to indicate that the specific service provider or specialty entity selected is out-of-network.

- Requests for approval of full treatment plans (case management) or notification of the potential need for case management intervention.
- Requests forwarded by a UMO to an external review organization. An individual provider might belong to a UMO that has a risk relationship with a payer that calls for the payer to make the medical decision in certain cases. The 278 Health Care Services Review - Request and Response implementation guide handles the exchange of information between the UMO and the provider only. It does not handle the exchange of information between the UMO and the payer. It enables the UMO to inform the provider that the request has been forwarded for external review. It does not enable the UMO to identify that external review organization to the provider.

1.3.4 Transaction Delivery Methods

Real time delivery provides the best method for meeting the business requirements associated with the 278 Health Care Services Review request and response. Real time enables the requester to ask for and receive certification from the UMO while the patient is present. There are situations when the delivery of an immediate response is either not necessary or not feasible. This section discusses the use of the 278 in batch and real time modes.

1.3.4.1 Batch and Real Time Definitions

Within telecommunications, there are multiple methods used for sending and receiving business transactions. Frequently, different methods involve different timings. Two methods applicable for EDI transactions are batch and real time. The 278 Health Care Services Review Request and Response transactions can be used in either a batch mode or in a real time mode.

Batch – When transactions are used in batch mode, they are typically grouped together in large quantities and processed en-masse. In a batch mode, the sender sends multiple transactions to the receiver, either directly or through a switch (clearinghouse), and does not remain connected while the receiver processes the transactions. If there is an associated business response transaction (such as a 271 response to a 270 for eligibility), the receiver creates the response transaction for the sender off-line. The original sender typically reconnects at a later time (the amount of time is determined by the original receiver or switch) and picks up the response transaction. Typically, the results of a transaction that is processed in a batch mode would be completed for the next business day if it has been received by a predetermined cut off time.

Important: When in batch mode, the 997 Functional Acknowledgment transaction must be returned as quickly as possible to acknowledge that the receiver has or has not successfully received the batch transaction. In addition, the TA1 segment must be supported for interchange level errors (see section A.1.5.1 for details).

Real Time – Transactions that are used in a real time mode typically are those that require an immediate response. In a real time mode, the sender sends a request transaction to the receiver, either directly or through a switch (clearinghouse), and remains connected while the receiver processes the transaction and returns a response transaction to the original sender. Typically, response times range from a few seconds to around thirty seconds, and should not exceed one minute.

Important: When in real time mode, the receiver must send a response of either the response transaction, a 997 Functional Acknowledgment, or a TA1 segment. For details on the 997 see section A.1.5.2. For details on the TA1 segment, see section A.1.5.1.

1.3.4.2 Real Time Delivery of the 278

A 278 real time request transaction and its associated response should contain only one patient event. A patient event is represented by a single ST to SE loop containing one subscriber loop as follows:

- one subscriber loop (Loop 2000C) if the subscriber is the patient
- one subscriber loop (Loop 2000C) if the dependent is the patient and has a unique member ID
- one subscriber loop and one dependent loop (Loop 2000D) if the dependent is the patient and the dependent does not have a unique (different from the subscriber) member ID

This subscriber/patient information is followed by at least one occurrence each of Loop 2000E and Loop 2000F representing one to many service providers and the associated services.

1.3.4.3 Batch Delivery of the 278

This implementation guide recommends the use of a separate transaction set (ST to SE) for each patient event, as defined in 1.3.4.2.

This implementation supports the sending and receiving of multiple patient events in one transmission, where each patient event represents a single 278 transaction with multiple transactions in a single GS to GE loop.

1.4 Industry Terms and Definitions

This section contains definitions of terms frequently used in Section 2 of the implementation guide. Refer to Appendix E Data Element Name Index for a list of the data elements used in this implementation guide and their associated definitions.

Case management

Case management refers to the coordination of services to help meet a patient's health care needs, usually when the patient has a condition which requires multiple services from multiple providers. This guide does not support requests for case management.

Long-term care

Long-term care refers to the range of services typically provided at skilled nursing, intermediate-care, personal care or elder-care facilities.

Patient event

Patient event in this guide refers to the service or group of services associated with a single episode of care. Examples include the following:

- an admission to a facility for treatment related to a specific patient condition or diagnosis or related group of diagnoses
- a referral to a specialty provider for a consult or testing to determine a specific diagnosis and appropriate treatment
- services to be administered at a patient visit such as chiropractic treatment delivered in a single patient visit. The same treatment can be approved for a series of visits.

This implementation guide recommends limiting each request to a single patient event.

Requester

Requester refers to providers (e.g., physicians, medical groups, independent physician associations, facilities) who request authorization or certification for a patient to receive health care services.

Service Provider

Service provider is the referred-to provider, specialist, specialty entity, group, or facility where the requested services are to be performed.

Utilization Management Organization (UMO)

UMO refers to insurance companies, health maintenance organizations, preferred provider organizations, health care purchasers, professional review organizations, other providers, and other utilization review entities who receive and respond to requests for authorization or certification. The UMO may or may not be the organization that makes the medical decision on a service review request. The UMO might have a relationship with a payer that calls for the payer to make a decision in certain cases. It is the role of the UMO to forward that request to the payer, receive the response from the payer, and then return the response to the requester. From the requester's perspective, the exchange of information is between the requester and the UMO.

1.5 Information Flows

Figure 4, Information Flows, illustrates the information flow of business needs requiring health care services review request for review and response.

Health care entities that use this implementation of the 278 include the following:

Figure 4. Information Flows

- Providers or other requesting entities who request certification for a patient to receive health care services
- Utilization Management Organizations who receive and respond to requests for authorization or certification
- providers who receive responses from the UMO

Other trading partners who use the 278 include system vendors, consulting services, and EDI network intermediaries such as clearinghouses, value-added networks, and telecommunication services.

2 Data Overview

2.1 Overall Data Architecture

The 278 can be exchanged between interested participants in a bi-directional request/response mode of operation. In this mode, a participant requests a certification and a review entity responds to that request. This implementation guide addresses that use. This section provides general information on the structure of the transaction set as represented in this implementation guide.

NOTE:

See Appendix A, ASC X12 Nomenclature, for a review of transaction set structure, including descriptions of segments, data elements, levels, and loops.

2.1.1 One Transaction Per Patient Event

The 278 supports multiple types of service review requests. Due to the multiplicity of uses of the 278, the implementation guide's developers recommend that separate transaction sets be used for different patients and events. This can be thought of as a one-to-one style relationship: one transaction set for one patient event.

2.1.2 Service Review Participants

This implementation uses a separate hierarchical level to identify each participant in the service review. Loop 2000A and Loop 2000B represent the UMO (reviewer) and requesting provider respectively. Loop 2000C and Loop 2000D represent the subscriber and dependent. If the subscriber is the patient or if the patient has a unique identification number, only Loop 2000C is required. Loop 2000E carries information about the service (referred-to) provider. Section 2.2 Data Use by Business Use provides detailed information on the data carried at these hierarchical levels.

2.1.3 Detailed Service Review Information

The 278 allows the inclusion of various condition or reason indicators as well as the most complete data possible about all participants.

For example, in addition to a provider identifier, the transaction can carry the provider's specialty. A patient's conditions can be noted including current health condition, prognosis, and other more specific condition indicators.

2.1.4 Situational Data

Factors such as the type of certification requested, the condition of the patient, and the individual UMO's rules for processing certifications make it difficult to identify a single set of data elements that are required for all types of certifications. To meet the divergent needs of the UMOs and requesters, this guide includes many data elements and segments marked "situational". Wherever possible, this implementation guide includes notes indicating when to include a situational segment or element. If the segment or element does not have an explanatory note, interpret "situational" to mean "if the information is available and applicable to the certification request or response, include it."

2.1.5 Service Review Decisions

The UMO must respond to each 278 transaction set received. If the UMO can process the service review request, the UMO must return a 278 response that contains an HCR segment at the Service Level (Loop 2000F) in the response to indicate the status of the service review.

2.1.6 Rejected Transactions

Missing or incorrect application data on the 278 request can cause the UMO to reject the transaction. For these requests, the UMO must return a 278 response transaction that contains a AAA Request Validation segment at the appropriate level to indicate why the UMO rejected the transaction.

The AAA segments in Loop 2000A (UMO) enable both the clearinghouse and the reviewer to indicate when system availability issues prohibit routing of the request for processing.

2.1.7 Trace Numbers and Transaction Identifiers

This implementation guide provides several methods to enable requesters, clearinghouses, and UMOs to trace the transaction or match the response to the original request. This section describes the segments and data elements that carry these identifiers.

2.1.7.1 BHT03 - Submitter Transaction Identifier

BHT03 identifies the transaction at its highest level. This is particularly useful in reconciling 278 rejection transactions that may not contain all of the HL Loops. The receiver of the 278 request transaction (whether it is a clearinghouse or UMO) must return this identifier in the 278 response BHT03.

2.1.7.2 TRN Segment

Loop 2000F (Service loop) contains a TRN segment. This segment identifies the request at its lowest logical level, the Service level. It contains a trace number and identifies the organization that generated it and is supplied solely for the convenience of the organization that originated it. Both the requester (provider) and the clearinghouse can add a TRN segment to the request.

The requester (provider) can use this TRN segment to meet several needs. This enables the requester to accomplish the following:

- uniquely identify this request within the provider's environment
- uniquely identify each service requested. A single request transaction can contain requests for multiple services represented by multiple occurrences of Loop 2000F. This can generate more than one 278 response from the UMO. The UMO might certify some of these services immediately and pend others for external review.
- match the associated response to the request
- facilitate routing of this response in a large health care environment. For example, it might be necessary for the requester to identify the department within the provider environment that originated the transaction.

The requester cannot use this number to identify the transaction to the UMO.

Clearinghouses can provide their own trace numbers in a separate TRN segment in Loop 2000F on the request to use for transaction tracking and matching purposes.

If the TRN segment is used on the request, the UMO must return the trace information supplied with the request transaction in the response transaction.

UMOs can add a trace number in their own TRN segment in Loop 2000F on the response. The UMO cannot use this trace number to identify the certification to the requester.

The authors of this guide recommend that requesters use trace numbers. Refer to Section 2.2.4.4.1 TRN Segment for more information on using the TRN in Loop 2000F of the 278.

2.1.7.3 Patient Account Number

The requester (provider) can supply the patient account number as a supplemental identifier for the patient on the request. This value is carried in a REF segment where REF01 = "EJ" in Loop 2000C - Subscriber or Loop 2000D - Dependent, whichever is the patient. This information is optional for the requester. However if the UMO receives the patient account number, they must return it in the 278 response transaction.

2.1.8 Disclaimers

This implementation guide does not support the transmission of general disclaimers as part of the transaction. Trading partners must handle these disclaimers outside of this EDI transaction and should identify procedures for handling these disclaimers in their trading partner agreements.

2.2 Data Use by Business Use

The 278 is divided into two levels, or tables. See Section 3, Transaction Set, for a description of the format presented in figure 5, Transaction Set Listing.

The Header level, Table 1, contains the purpose code for the transaction set as well as date and time stamps. For this implementation guide, BHT02 is either Request (13) or Response (11).

Table 1 - Header					
POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
010	ST	Transaction Set Header	M	1	
020	BHT	Beginning of Hierarchical Transaction	M	1	
...					
Table 2 - Detail					
POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
		LOOP ID - HL			>1
010	HL	Hierarchical Level	M	1	
020	TRN	Trace	O	9	
030	AAA	Request Validation	O	9	
040	UM	Health Care Services Review Information	O	1	
050	HCR	Health Care Services Review	O	1	
060	REF	Reference Identification	O	9	
070	DTP	Date or Time or Period	O	9	
080	HI	Health Care Information Codes	O	1	
...					

Figure 5. Transaction Set Listing

The Detail level, Table 2, contains all data relating to the requested transaction, including transaction participants, the patient, all providers, and services detail information. Table 2 uses a hierarchical data structure. For the types of business transactions that this implementation guide addresses, the following HL levels apply:

- Loop 2000A contains the UMO
- Loop 2000B contains the Requester
- Loop 2000C contains the Subscriber
- Loop 2000D contains the Dependent
- Loop 2000E contains the Service Provider
- Loop 2000F contains the Services

The following are sample Table 2 configurations.

The following example represents a request for a single service for a dependent of a subscriber.

- UMO (Loop 2000A)
 - Requester (Loop 2000B)
 - Subscriber (Loop 2000C)
 - Dependent (Loop 2000D)
 - Service Provider (Loop 2000E)
 - Service (Loop 2000F)

The following example represents a response to a request for a single service for a dependent of a subscriber.

UMO (Loop 2000A)
Requester (Loop 2000B)
Subscriber (Loop 2000C)
Dependent (Loop 2000D)
Service Provider (Loop 2000E)
Service (with Review Outcome Data)(Loop 2000F)

The following example represents a request for multiple services for a subscriber who is the patient.

UMO (Loop 2000A)
Requester (Loop 2000B)
Subscriber (Loop 2000C)
Service Provider (Loop 2000E)
Service (Loop 2000F)
Service (Loop 2000F)

The following example represents a response to a request for multiple services for a subscriber who is the patient.

UMO (Loop 2000A)
Requester (Loop 2000B)
Subscriber (Loop 2000C)
Service Provider (Loop 2000E)
Service (with Review Outcome Data)(Loop 2000F)
Service (with Review Outcome Data)(Loop 2000F)

The following example represents a request for multiple services from multiple providers for a subscriber who is the patient.

UMO (Loop 2000A)
Requester (Loop 2000B)
Subscriber (Loop 2000C)
Service Provider (Loop 2000E)
Service (Loop 2000F)
Service Provider (Loop 2000E)
Service (Loop 2000F)

The following example represents a response to a request for multiple services from multiple providers for a subscriber who is the patient.

UMO (Loop 2000A)

Requester (Loop 2000B)

Subscriber (Loop 2000C)

Service Provider (Loop 2000E)

Service (with Review Outcome Data)(Loop 2000F)

Service Provider (Loop 2000E)

Service (with Review Outcome Data)(Loop 2000F)

For a request transaction, matrix 1, Intended Segment Use for a Request Transaction, identifies the intended segment use by hierarchical level.

Segment Position	Segment ID	UMO HL	Requestor HL	Subscriber HL	Dependent HL	Service Provider HL	Service HL
010	HL	YES	YES	YES	YES	YES	YES
020	TRN						YES
030	AAA

230	AAA	YES	YES	YES	YES	YES	
240	PRV		YES			YES	
250	DMG			YES	YES		
260	INS				YES		
270	DTP						

Matrix 2. Intended Segment Use for a Response Transaction

NOTE

For the request/response scope of this implementation guide, the use of UMO, requester, subscriber, dependent, and service provider is consistent and stable across all transactions. Because the use of these levels is consistent, these levels are described one time. Because the use of the service level differentiates the transaction's use, this level is redefined several times to provide the reader with appropriate information and examples.

2.2.1 Transaction Participants (Loop 2000A, Loop 2000B)

The Loop 2000A and Loop 2000B hierarchical levels are used to convey information about the two primary participants in a health care service review transaction. Figure 6, Information Source and Receiver Levels, presents the Loop 2000A and Loop 2000B levels.

Table 2 - Detail, Utilization Management Organization (UMO) Level						
POS. #	SEG. ID	NAME	USAGE	REPEAT	LOOP REPEAT	
LOOP ID - 2000A UTILIZATION MANAGEMENT ORGANIZATION (UMO) LEVEL						1
010	HL	Utilization Management Organization (UMO) Level	R	1		
030	AAA	Request Validation	S	9		
LOOP ID - 2010A UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME						1
170	NM1	Utilization Management Organization (UMO) Name	R	1		
220	PER	Utilization Management Organization (UMO) Contact Information	S	1		
230	AAA	Utilization Management Organization (UMO) Request Validation	S	9

230	AAA	Requester Request Validation	S	9		
240	PRV	Requester Provider Information	S	1		

Figure 6. Information Source and Receiver Levels

2.2.1.1 Hierarchy Usage Chart for Transaction Participants

Because the various utilization management entities may appear in either the Loop 2000A or Loop 2000B hierarchical levels depending on the transaction usage, matrix 3, HL Information Sources and Receivers, has been included to better clarify the various possibilities when requesting a service review. This matrix contains some examples where the UMO is one form of an HMO. Other examples can be constructed for other UMO environments. This matrix is by no means exhaustive.

Transaction Use	HL UMO	HL Requestor	Physical Transmitter	Physical Receiver
PCP Request for a Specialty Care Referral	HMO	PCP	PCP	HMO
Response to a Specialty Care Referral Request	HMO	PCP	HMO	PCP
Specialist Request for Admission Review	HMO	SCP	SCP	HMO
Response to a Specialist Request for Admission Review	HMO	SCP	HMO	SCP
Specialist Request for Admission Review	PCP	SCP	SCP	PCP
Response to a Specialist Request for Admission Review	PCP	SCP	PCP	SCP

- * UMO - Utilization Management Organization
- * PCP - Primary Care Provider
- * SCP - Specialty Care Provider

Matrix 3. HL Information Sources and Receivers

2.2.1.2 UMO (Loop 2000A)

The Loop 2000A hierarchical level is used to identify the UMO. The UMO is generally the entity empowered to make a decision regarding the outcome of a health services review or the owner of information.

The following example demonstrates a minimum way of identifying a UMO.

```
HL*1**20*1~  
NM1*X3*2*****46*123450000~
```

2.2.1.2.1 NM1 Segment

The NM1 segment should always be used to carry the primary identifier of the UMO (see NM108 and NM109). In the usual case where the trading partners are known, the NM1 segment is all that should be required to identify the UMO.

For example, the following should be sufficient to identify the UMO:

```
NM1*X3*2*ABC PAYER*****46*123450000~
```

NM101 = X3

This value indicates that the information source is a UMO.

NM102 = 2

This value indicates that the UMO is a non-person.

NM103 = ABC PAYER

This value identifies the UMO as ABC PAYER. The name is superfluous and is not required or recommended. The identification code should clearly identify the UMO.

NM108 = 46

This value identifies the next data element as an electronic transmitter identification number.

NM109 = 123450000

This value is the actual identification code of ABC PAYER, the UMO, as agreed upon by the trading partners.

2.2.1.2.2 PER Segment

For a response transaction, the PER segment may be used to identify the reviewer or a contact point within the UMO who can be contacted to discuss the outcome.

2.2.1.2.3 AAA Segment

The AAA segment is used only in a response. Loop 2000A contains two AAA segments. The first AAA segment is restricted for use by clearinghouses, value-added networks, or other entities that are not the actual source of the information. It is used to indicate an error condition that prohibits the clearinghouse, VAN, or other entity from processing the transaction. The AAA segment that oc-

curs within the NM1 loop (Loop 2010A) is used by the actual source of the information. It is used to identify an error condition that prohibits the UMO from processing the request. An example of such an error might be an outage at the UMO's site.

2.2.1.3 Requester (Loop 2000B)

The Loop 2000B hierarchical level is used to designate the requester. The requester is generally the entity who is making the request for review and for whom the response decision is intended.

The following example demonstrates a minimum way of identifying a requester.

```
HL*2*1*21*1~
NM1*1P*1*****24*000012345~
```

2.2.1.3.1 NM1 Segment

As with the Loop 2000A hierarchical level, the NM1 segment is usually sufficient to identify the requester when the trading partners are known. The NM1 segment should always be used to carry the primary identifier of the requester (see NM108 and NM109). The name is not required or recommended for use.

2.2.1.3.2 REF Segment

The REF segment is supplied to allow the transmission of secondary identification numbers when necessary to further identify the requester to the UMO.

2.2.1.3.3 PER Segment

The PER segment provides a method for the requester to identify a contact person or communications number at the requester organization that the UMO can use for information on the specific review request.

For example:

```
PER*IC*WILBER*TE*8189991234~
```

PER01 = IC

This value indicates that the PER segment is being used to identify an information contact.

PER02 = WILBER

This value is the information contact's name.

PER03 = TE

This value indicates that the next data element is the contact's telephone number.

PER04 = 8189991234

This value indicates that the contact's telephone number is (818) 999 - 1234.

2.2.1.3.4 AAA Segment

The AAA segment is used only in a response. The segment is used to identify an error condition in the original request at the Loop 2000B level that prohibits processing the original request. An example of such an error might be an invalid identification code.

2.2.1.3.5

PRV Segment

The PRV segment enables the requester to specify the referring provider's role in the care of the patient and to indicate the referring provider's specialty. Use this segment if the UMO requires this additional information to determine if the referring provider is authorized to request these services for this patient.

2.2.2

Patient (Loop 2000C and Loop 2000D)

Subscriber Loop 2000C and Dependent Loop 2000D identify the patient. Loop 2000C is always required. Loop 2000D is used only when necessary to identify a patient who is a dependent. Figure 7. Subscriber and Dependent Levels shows the structure of these loops.

When the subscriber is the patient or when the patient has a unique identification number (different from the subscriber), only Loop 2000C is used. This situation is common when an insurance company issues a unique insurance identification card to each individual insured. In all other cases, Loop 2000C is used to identify the subscriber. Loop 2000D is used to identify the subscriber's dependent, who is the patient. This structure is more common in traditional group insurance where a patient is uniquely identified within the primary subscriber identifier.

2.2.2.1

Identifying the Patient

The Subscriber Name Loop 2010C and Dependent Name Loop 2010D contain the segments and data elements that hold this patient identification information. The NM1 and DMG segments contain all the data needed for the requester and UMO to identify the patient.

Identifying the Subscriber/Patient

In Subscriber Name Loop 2010C, the member ID (NM108/NM109) is required and may be adequate to identify the subscriber to the UMO. However, the UMO can require additional information. The maximum data elements that the UMO can require to identify the subscriber, in addition to the member ID, are as follows:

Subscriber Last Name (NM103)
Subscriber First Name (NM104)
Subscriber Birth Date (DMG01 and DMG02).

The data requirements are the same for a dependent patient who has a unique identification number (different from the subscriber).

Identifying the Dependent

The Dependent Loop (2000D) is required in addition to Loop 2000C if the dependent does not have a unique (different from the subscriber) member ID. The maximum data elements in Loop 2010D that can be required by a UMO to identify a dependent are as follows:

Dependent Last Name (NM103)
Dependent First Name (NM104)
Dependent Birth Date (DMG01 and DMG02).

Table 2 - Detail, Subscriber Level					
POS. #	SEG. ID	NAME	USAGE	REPEAT	LOOP REPEAT
LOOP ID - 2000C SUBSCRIBER LEVEL					1
010	HL	Subscriber Level	R	1	
030	AAA	Subscriber Request Validation	S	9

230	AAA	Dependent Request Validation	S	9	
250	DMG	Dependent Demographic Information	S	1	
260	INS	Dependent Relationship	S	1	

Figure 7. Subscriber and Dependent Levels

2.2.2.2 Subscriber is the Patient

In those cases where the subscriber is the patient or the patient has a unique identification number (different from the subscriber), only Loop 2000C is used. Refer to the segments that appear under Detail - Subscriber in Figure 7. Subscriber and Dependent Levels for a representation of all the segments available for use.

The following example demonstrates a sufficient way of identifying a patient who has a unique identification number.

```
HL*3*2*22*1~
HI*BF:41090~
NM1*IL*1*SMITH*JOE****MI*12345678901~
```

2.2.2.2.1 DTP Segments

The DTP segments carry dates relating to the patient's current condition. This includes accident date, date of onset of current symptoms or illness, date of last menstrual period, and estimated date of birth. Date diagnosed is associated with a diagnosis and is contained in the HI segment.

2.2.2.2.2 HI Segment

The HI segment is used to convey diagnosis information. This information is always conveyed at the actual patient HL level. In the previous example, because the subscriber is the patient, the HI segment appears at Loop 2000C (there would be no Loop 2000D level). If Loop 2000D were used, this segment would appear at the Loop 2000D level and not at Loop 2000C.

2.2.2.2.3 NM1 and REF Segments

The Loop 2010C NM1 segment is used to convey the subscriber's name and identification number. In the preceding example, this is also the name of the patient. This segment should always carry the primary identification number for the insured. The REF segment in Loop 2010C should be used only to transmit secondary identification numbers. In the NM1 segment, the identification number transmitted is the primary member identifier used by the UMO. In most cases the REF segment contains a supplemental member identifier used by the UMO. However, it can carry a patient identifier, such as a Patient Account Number, used by the requester. If Loop 2010C of the request contains a REF segment where REF01 = "EJ" (Patient Account Number), the UMO must return the same REF segment on the response.

2.2.2.2.4 DMG Segment

The DMG segment is used to provide additional information, such as birth date (DMG01, DMG02), about the patient/subscriber. This segment is used only when more information is required to identify the patient/subscriber.

2.2.2.2.5 AAA Segment

The AAA segment is used only in a response. The segment is used to identify an error condition in the original request at the Subscriber level that prohibits processing the original request. Two AAA segments are provided. The first AAA identifies error conditions in the data contained in Loop 2000C. These pertain to invalid or missing diagnosis codes and dates and patient condition dates. The second AAA in Loop 2010C identifies invalid or missing subscriber identification information.

2.2.2.3 Dependent is the Patient

In those cases when the dependent is the patient and has not been issued a unique identification number, both Loop 2000C and Loop 2000D are required. Loop 2000C conveys insurance information and Loop 2000D conveys patient-related information. Until the HIPAA Unique Patient Identifier is mandated, if the patient is a dependent of a subscriber and does not have a unique member ID, the maximum data elements that can be required by a UMO in loop 2010C and 2010D to identify a patient are:

Loop 2010C
Subscriber's Member ID

Loop 2010D
Patient's First Name
Patient's Last Name
Patient's Date of Birth

If all four of these elements are present the UMO must generate a response if the patient is in the UMO's database. All UMOs are required to support the above search option if their system does not have unique Member Identifiers assigned to dependents. Figure 7, Subscriber and Dependent Levels, presents Loop 2000C and Loop 2000D.

The following example demonstrates a sufficient way of identifying a patient who is the dependent of a subscriber. The example also illustrates the use of other segments.

```
HL*3*2*22*1~
NM1*IL*1*SMITH*JOE***MI*12345678901~

HL*4*3*23*1~
HI*BF:41090~
NM1*QC*1*SMITH*SEAN~
DMG*D8*19781229*M~
INS*N*19~
```

2.2.2.3.1 DTP Segments

The DTP segments carry dates relating to the dependent's current condition. This includes accident date, date of onset of current symptoms or illness, date of last menstrual period, and estimated date of birth. Date diagnosed is associated with a diagnosis and is contained in the HI segment.

2.2.2.3.2 HI Segment

The HI segment is used to convey diagnosis information. This information is always conveyed at the actual patient HL level. Note that in the previous example, the HI segment appears in Loop 2000D.

2.2.2.3.3 NM1 and REF Segments

The Loop 2010C NM1 segment is used to convey the subscriber's name and identification number. The identification number transferred is the UMO's identification number for the subscriber. The Loop 2010D NM1 segment is used to convey the dependent's name when the dependent is the patient. There is no UMO primary identifier for the dependent. In most cases the REF segment in Loop 2010D contains a supplemental identifier used by the UMO. However, it can carry a patient identifier, such as a Patient Account Number, used by the requester. If Loop 2010D of the request contains a REF segment where REF01 = "EJ" (Patient Account Number), the UMO must return the same REF segment on the response.

In the previous example, Sean Smith is a dependent of Joe Smith whose identification number is 12345678901. Sean Smith is the patient.

2.2.2.3.4 DMG Segment

The DMG segment is used to provide additional information about the dependent, such as date of birth (DMG01, DMG02). In the previous example, Sean Smith is a male born on December 29, 1978.

2.2.2.3.5 INS Segment

The INS segment is used only at the Loop 2000D level. The INS segment is used to convey the relationship of the dependent to the subscriber for identification purposes.

For example:

INS*N*19~

INS01 = N

This value indicates that the insured is a dependent.

INS02 = 19

This value indicates that the patient is a child of the subscriber.

2.2.2.3.6 AAA Segment

The AAA segment is only used in a response. The AAA segment is used to identify an error condition in the original request at the Dependent level that prohibits processing the original request. Two AAA segments are provided. The first AAA identifies error conditions in the data contained in Loop 2000D. These pertain to invalid or missing diagnosis codes and dates and patient condition dates. The second AAA in Loop 2010D identifies invalid or missing dependent identification information.

2.2.3 Service (Referred-to) Provider (Loop 2000E)

The Loop 2000E hierarchical level is used to identify the health care service provider (the provider of services). Figure 8, Service Provider Level, presents the Loop 2000E level.

Table 2 - Detail, Service Provider Level

POS. #	SEG. ID	NAME	USAGE	REPEAT	LOOP REPEAT
LOOP ID - 2000E SERVICE PROVIDER LEVEL					>1
010	HL	Service Provider Level	R	1	
160	MSG	Message Text	S	1	
LOOP ID - 2010E SERVICE PROVIDER NAME					3
170	NM1	Service Provider Name	R	1	
180	REF	Service Provider Supplemental Identification	S	7	
200	N3	Service Provider Address	S	1	
210	N4	Service Provider City State ZIP Code	S	1	
220	PER	Service Provider Contact Information	S	1	
230	AAA	Service Provider Request Validation	S	9	
240	PRV	Service Provider Information	S	1	

Figure 8. Service Provider Level

2.2.3.1 **MSG Segment**

The MSG segment is used on both the request and the response to carry free-form text about the service provider or specialty requested. Normally, this segment is not used.

2.2.3.2 **NM1 Segment**

The primary identification number for the service provider should appear in the NM1 segment. The N3 and N4 segments are provided to supply extra information about the service provider. Implementers should use the N3 and N4 segments when there is no commonly known ID for the service provider.

2.2.3.3 **PRV Segment**

The PRV segment is used in two different ways. First, the segment is used when referrals are requested for a specialty rather than for a specific service provider. In this case, only the NM101 and NM102 elements would be used on the preceding NM1 segment. Second, the PRV segment enables the requester to specify the service provider's role in the care of the patient and to indicate the service provider's specialty.

2.2.3.4 **AAA Segment**

The AAA segment is only used in a response. The AAA segment is used to identify an error condition in the original request at the Service Provider level that prohibits processing the original request.

2.2.3.5 **Identifying Multiple Providers**

NOTE

The 278 has been constructed to support multiple providers in conjunction with identifying a patient's care. Although the transaction supports this functionality, the implementation guide's developers recommend limiting this number of providers to either one for simple certifications or two for admissions to identify the service provider and the facility.

When identifying multiple providers, recognize that the HL structure requires that services be identified for each provider. A single Loop 2000F level can not be specified as applying to several providers. However, Loop 2000F might be replicated for each provider identified. The following examples represent the standard use of Loop 2000E and Loop 2000F.

The following example represents a single provider with a single service.

Loop 2000E - Provider 1
Loop 2000F - Service 1 - ABCD

The following example represents a single provider with three services.

Loop 2000E - Provider 1
Loop 2000F - Service 1 - ABCD
Loop 2000F - Service 2 - EFGH
Loop 2000F - Service 3 - IJKL

The following example represents two providers with different services.

Loop 2000E - Provider 1
Loop 2000F - Service 1 - ABCD

Loop 2000E - Provider 2
Loop 2000F - Service 1 - EFGH
Loop 2000F - Service 2 - IJKL

The example of two providers with different services is a common occurrence when requesting a hospital admission for a procedure such as same day surgery. In this case, Provider 1 represents the surgery facility. The service represents the request for admission. Provider 2 represents a surgeon who is to perform two procedures that are identified as separate services.

The following example represents two providers, such as a surgeon and an assistant surgeon, with the same service.

Loop 2000E - Provider 1
Loop 2000F - Service 1 - ABCD

Loop 2000E - Provider 2
Loop 2000F - Service 1 - ABCD

2.2.4 Services (Loop 2000F)

The Loop 2000F hierarchical level is used to identify the services requested for the identified patient and to be supplied by the provider identified in Loop 2000E. Loop 2000F is used also to convey the outcome of the service review request in the service response. Figure 9, Services Level, presents the Service Loop 2000F.

Table 2 - Detail, Service Level

POS. #	SEG. ID	NAME	USAGE	REPEAT	LOOP REPEAT
LOOP ID - 2000F SERVICE LEVEL					>1
010	HL	Service Level	R	1

110	CL1	Institutional Claim Code	S	1	
120	CR1	Ambulance Transport Information	S	1	
130	CR2	Spinal Manipulation Service Information	S	1	
140	CR5	Home Oxygen Therapy Information	S	1	
150	CR6	Home Health Care Information	S	1	
160	MSG	Message Text	S	1	

Figure 9. Services Level

The service level of this transaction allows the inclusion of various patient condition or certification reason indicators. For example, a provider can specify the reason a request may have been delayed and not made within the timeframe required by a UMO.

Factors such as the type of certification request, the condition of the patient, and the individual UMO's business rules for processing certifications make it difficult to identify a single set of data elements that are required for all types of certifications. If the information is available and applicable to the certification request or response, include it.

Sections 2.2.4.1 Specialty Care Referrals, 2.2.4.2 Health Services Review, and 2.2.4.3 Admission Review provide examples of the segments and elements to include in the different types of certification requests. All the examples are based on the segments as illustrated in figure 9.

2.2.4.1 Specialty Care Referrals

Specialty care referrals encompass those transactions where a provider requests permission to refer or send a patient to another provider, generally a specialist. These types of transactions generally are shared between a primary care physician and a UMO. However, they may just as easily be shared between any two providers or UMOs.

2.2.4.1.1 Initial Request - Office Visit or Service

2.2.4.1.1.1 UM Segment

The UM segment is used to identify the type of health care services request.

UM*SC*I***Y~**

UM01 = SC (Specialty Care Review)

UM02 = I (Initial Request)

UM09 = Y (Provider has a Signed Statement Permitting Release of Medical Billing Data Related to a Claim)

Other data elements in this segment carry additional information about the type of request and the condition of the patient. Value these additional data elements only if they provide information relevant to the medical decision.

2.2.4.1.1.2 HSD Segment and HI Segments

The HSD and HI segments are used according to need, either individually or in conjunction with each other, to describe the service and/or quantity of service being requested.

The HSD segment is used to identify a number of visits. The following example indicates two visits.

HSD*VS*2~

HSD01 = VS (Visits)

HSD02 = 2

The HSD segment can also be used to identify a delivery pattern. The following example indicates a pattern of three hours per week for four months.

HSD*HS*3*WK34*4~**

HSD01 = HS (Hours)

HSD02 = 3

HSD03 = WK (Per week)
HSD05 = 34 (Month)
HSD06 = 4

In the following example, the initial service requested is for a single office visit for a consultation at the provider's office (per HCFA code table).

```
HL*5*4*SS*0~  
TRN*1*111099*9012345678~  
UM*SC*I*3*11:B*****Y~  
HSD*VS*1~
```

The HI segment is used to request that a specific service be performed.

```
HI*BO:49000::::1~  
HI01 - 1 = BO (Health Care Financing Administration Common Procedural  
Coding System)  
HI01 - 2 = 49000 (Incision, exploratory laparotomy)  
HI01 - 6 = 1 (Quantity)
```

In some cases, it might be convenient to employ both segments. In the following example, physical therapy is being prescribed at three visits per week for two months.

```
HI*BO:97110~  
HSD*VS*3*WK**34*2~
```

2.2.4.1.2

Response

A response transaction is used to indicate approval, approval with modification, or denial of a previous request. Note that the service level segments contained in a response transaction can vary from the requested level of service. For example, a primary care provider (PCP) may request ten visits to a specialist for a patient. However, the UMO may decide to approve only eight visits (perhaps the maximum remaining benefit).

The HCR segment is required to provide the results of the review as well as an associated reference number.

2.2.4.1.2.1

Approval

To approve the specialty care referral request as described previously, the following service level would be returned:

```
HL*5*4*SS*0~  
TRN*2*111099*9012345678~  
UM*SC*I*3*11:B~  
HCR*A1*0081096G~  
HSD*VS*1~
```

This set of values indicates approval of the request in full. Note that the original service level details respecting the services requested are returned so that there is no confusion as to what is being approved.

A reference number 0081096G is supplied and is critical if the provider wishes to initiate further transactions concerning this service.

2.2.4.1.2.2

Approval with Modification of Services

If the review entity wished to approve the specialist visits but decided to increase the number of visits to four, the following would be returned:

HCR*A6*0081096G~
HSD*VS*4~

2.2.4.1.2.3

Denial of Services

To completely deny the service request the following would be returned:

HL*5*4*SS*0~
UM*SC*I*3*11:B~
HCR*A369~**
HSD*VS*1~

In this case, the A3 value is used to indicate “not certified.” Depending on UMO policy, an authorization or reference number might not be given. Some organizations prefer to give no number because a number may imply approval. However, the failure to provide such a number restricts reference to the transaction at a later date. In this case, the UMO has also supplied a Reject Reason Code (69), “inconsistent with patient’s age.”

2.2.4.1.3

Request for Extension

In some cases, after a certification has been approved, a UMO will allow the service originally requested to be extended. (Some organizations require a second certification.) The 278 supports a request to extend a service.

HL*5*4*SS*0~
UM*SC*4***Y~**
REF*BB*0081096G~
HSD*VS*1~

In this case, the requester is using the REF segment to refer to a prior certification number. “UM02 = 4” indicates that this is an extension request to a prior approved service. The HSD segment is used to extend the service by one visit.

2.2.4.1.4

Request for Appeal

The 278 transaction can be used by a requester to initiate the appeal of a denied or modified request for review.

HL*5*4*SS*0~
UM*SC*1~
REF*BB*REJ00001~

In this case, the requester is requesting an immediate appeal of a previously denied or modified request by using the REF segment to refer to a prior certification number. “UM02 = 1” indicates that this is an immediate appeal request.

2.2.4.2

Health Services Review

The term “health services review” is meant to identify requests for specific treatments or more extended care. Extended care refers to treatment for a condition requiring prolonged rehabilitation therapy. The transaction set was not designed to support full treatment plans or case management. This transaction set sup-

ports a request for certification of services related to a specific treatment or extended care associated with a single patient event.

It does not support a request for approval of multiple treatment plans related to long-term care or case management. Such complex treatment plans or case management comprise multiple patient events.

The 278 transaction set does not provide support for approval of case management or for tracking individual service review requests within a case.

2.2.4.2.1 Initial Request

2.2.4.2.1.1 UM Segment

The UM segment is used to identify the type of health care services requested.

UM01 = HS (Health Services Review)

UM02 = I (Initial Request)

UM09 = Y (Provider has a Signed Statement Permitting Release of Medical Billing Data Related to a Claim)

Other data elements in this segment carry additional information about the type of request and the condition of the patient. Value these additional data elements only if they provide information that is relevant to the medical decision on this service review request.

2.2.4.2.1.2 HSD and HI Segments

In a single 2000F service loop, the requester can specify multiple procedures associated with a single treatment. The HI Procedures segment can carry up to 12 procedure codes (HI01 through HI12). All the procedures specified must relate to one episode of care. The requester can use the HSD segment to specify a delivery pattern for that episode of care to indicate that all the procedures specified must occur within a single episode, but that episode can be repeated.

Each patient request can handle multiple 2000F loops. This means that the request can handle different services associated with a single patient event.

2.2.4.2.1.3 CRC Segments

The CRC segment enables the requester to provide additional patient condition information that the UMO can use to determine the medical necessity of the services requested. Because this segment does not contain information on the services or treatment requested, it is not used in the response.

2.2.4.2.1.4 CR1, CR2, CR5, CR6 Segments

These segments enable providers and UMOs to exchange more detailed information when requests are made regarding ambulance, spinal manipulation, oxygen therapy, and home health care services respectively.

2.2.4.2.2 Response

Health services review response uses are identical to those defined in the specialty care referrals response section of this implementation guide.

2.2.4.2.3 Request for Extension

Health services review request for extension uses are identical to those defined in the specialty care referrals request for extension section of this implementation guide.

2.2.4.2.4 Request for Appeal

Health services review request for appeal uses are identical to those defined in the specialty care referrals request for appeal section.

2.2.4.3 Admission Review

The term “admission review” identifies requests for admission to a facility for treatment (pre-certification). The transaction set enables the requester to specify both the facility and associated physicians within the same transaction.

2.2.4.3.1 Initial Request

The following example demonstrates a service request for the facility portion of an admission review.

```
HL*6*4*SS*0~
TRN*1*211099*9012345678~
UM*AR*I*2*21:B*****Y~
DTP*435*RD8:19980820-19980826~
CL1*2~
```

2.2.4.3.1.1 UM Segment

The UM segment is used to identify the type of health care services request.

```
UM01 = AR (Admission Review)
UM02 = I (Initial Request)
UM09 = Y (Provider has a Signed Statement Permitting Release of Medical
Billing Data Related to a Claim)
```

Other data elements in this segment carry additional information about the type of request and the condition of the patient. Value these additional data elements only if they provide information that is necessary for processing this request.

In the previous example, the additional elements clarify that the admission is for surgery that will take place in an inpatient setting. This information is generally deemed important because it clarifies the inpatient setting at the hospital rather than emergency or outpatient. The setting could not be described in the provider identification at the previous Loop 2000E.

2.2.4.3.1.2 DTP Segment

When identifying a service at a facility (an admission), the DTP segment should be used to specify the anticipated admission date.

For example:

```
DTP*435*D8*19980830~
```

This value indicates that the anticipated admission date is August 30, 1998.

The DTP segment may be used to indicate a range of dates (see the original example). However, when dealing with an admission, the DTP segment should indi-

cate a time period for admission and not the actual start and end date for the hospitalization. The length of stay should not be calculated for the DTP segment values (see HSD).

2.2.4.3.1.3 HSD Segment

The HSD segment is used to specify the length of stay at a facility. For example, this segment indicates a length of stay of 3 days:

HSD*DY*3~

2.2.4.3.1.4 CL1 Segment

The CL1 segment was used in the example to focus the UMO's attention on the admission request. Note the use of the urgent code.

2.2.4.3.2 Response

Admission review response uses are identical to those defined in the specialty care referrals response section.

2.2.4.3.3 Request for Extension

Admission review request for extension uses are identical to those defined in the specialty care referrals request for extension section.

2.2.4.3.4 Request for Appeal

Admission review request for appeal uses are identical to those defined in the specialty care referrals request for appeal section.

2.2.4.4 Other Service Line Segments

2.2.4.4.1 TRN Segment

The TRN segment enables the requester to assign a unique trace number to each service (Loop 2000F) requested for a patient. The requester can use this to trace the transaction or match the response to the request. The requester cannot use this number to identify the transaction to the UMO. In situations where the request contains multiple service loops, the UMO might return a medical decision on some services immediately and pend others for review. In this case, the final decisions on each service may be returned by the UMO at different times. Use of trace numbers at this level can facilitate matching these different responses to the original request.

The clearinghouse can also add a trace number at this level on the request. Therefore, this TRN segment can occur a maximum of two times per Loop 2000F on the request; once for the provider and once for the clearinghouse. If the TRN segment is used at this level on the request, the UMO must return it at the same level on the response.

The TRN segment can occur a maximum of three times per Loop 2000F on the response. UMOs can add their own trace numbers to the response for tracking purposes. Similarly, on the response, the UMO cannot use this trace number to identify the certification to the requester. The segment is supplied solely for the convenience of the organization that originated it.

If the 278 request transaction passes through more than one clearinghouse, the second (and subsequent) clearinghouse may choose one of the following options:

1. If the second or subsequent clearinghouse needs to assign their own TRN segment they may replace the received TRN segment belonging to the sending clearinghouse with their own TRN segment. Upon returning a 278 response to the sending clearinghouse, they must remove their TRN segment and replace it with the sending clearinghouse's TRN segment.

2. If the second or subsequent clearinghouse does not need to assign their own TRN segment, they should merely pass all TRN segments received in the 278 request back in the 278 response transaction. If the 278 request passes through a clearinghouse that adds their own TRN in addition to a requester TRN, the clearinghouse will receive a response from the UMO containing two TRN segments that contain the value "2" (Referenced Transaction Trace Number) in TRN01. If the UMO has assigned a TRN, the UMO's TRN will contain the value "1" (Current Transaction Trace Number) in TRN01. If the clearinghouse chooses to pass their own TRN values to the requester, the clearinghouse must change the value in their TRN01 to "1" because, from the requester's perspective, this is not a referenced transaction trace number.

This guide's authors recommend that requesters use this TRN segment.

2.2.4.4.2 AAA Segment

The AAA and HCR segments are used only in the response. If Loop 2000F is present, either the AAA segment or the HCR segment must be returned. If the UMO was unable to review the request due to missing or invalid application data at this level, the UMO must return a 278 response containing a AAA segment at this level. It identifies the primary error condition in Loop 2000F of the original request that prohibits processing of the original request.

2.2.4.4.3 HCR Segment

The HCR segment is required if the UMO has reviewed the request. It provides information on the outcome of the medical review. If the request has been certified in total or certified as modified, the UMO must return a certification number in this segment. This number identifies the certification to the requester. If the request has been pended, denied, or does not require a medical decision, HCR03 conveys the reason for the non-certification or other status of the request.

3 Transaction Set

NOTE

See Appendix A, ASC X12 Nomenclature, for a review of transaction set structure, including descriptions of segments, data elements, levels, and loops.

3.1 Presentation Examples

The ASC X12 standards are generic. For example, multiple trading communities use the same PER segment to specify administrative communication contacts. Each community decides which elements to use and which code values in those elements are applicable. This implementation guide uses a format that depicts both the generalized standard and the trading community-specific implementation.

The transaction set detail is comprised of two main sections with subsections within the main sections.

Transaction Set Listing

- Implementation

- Standard

Segment Detail

- Implementation

- Standard

- Diagram

- Element Summary

The examples in figures 10 through 15 define the presentation of the transaction set that follows.

The following pages provide illustrations, in the same order they appear in the guide, to describe the format.

The examples are drawn from the 835 Health Care Claim Payment/Advice Transaction Set, but all principles apply.

IMPLEMENTATION

Indicates that this section is the implementation and not the standard

835 Health Care Claim Payment/Advice

Functional Group ID: **HP**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Health Care Claim Payment/Advice Transaction Set (835) within the context of the Electronic Data Interchange (EDI) environment. This transaction set can be used to make a payment, send an Explanation of Benefits (EOB) remittance advice, or make a payment and send an EOB remittance advice only from a health insurer to a health care provider either directly or via a financial institution.

ELEMENT SUMMARY					
USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES	
REQUIRED	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, property or an individual	M	ID 2/3
Reference Designator					
SITUATIONAL	N102	93	Name Free-form name SYNTAX: R0203	X	AN 1/60
Data Element Number					
SITUATIONAL	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67)	X	ID 1/2
SITUATIONAL	N104	67	Identification Code Code identifying a party or other code SYNTAX: P0304	X	AN 2/20
X12 Syntax Note			ADVISORY: Under most circumstances, this element is expected to be sent.		
X12 Comment			COMMENT: This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.		

Figure 15. Segment Key — Element Summary

Industry Usages:

- Required** This item must be used to be compliant with this implementation guide.
- Not Used** This item should not be used when complying with this implementation guide.
- Situational** The use of this item varies, depending on data content and business context. The defining rule is generally documented in a syntax or usage note attached to the item.* The item should be used whenever the situation defined in the note is true; otherwise, the item should not be used.
- * NOTE**
If no rule appears in the notes, the item should be sent if the data is available to the sender.

Loop Usages:

Loop usage within ASC X12 transactions and their implementation guides can be confusing. Care must be used to read the loop requirements in terms of the context or location within the transaction. The usage designator of a loop's beginning segment indicates the usage of the loop. Segments within a loop cannot be sent without the beginning segment of that loop.

If the first segment is Required, the loop must occur at least once unless it is nested in a loop that is not being used. A note on the Required first segment of a nested loop will indicate dependency on the higher level loop.

If the first segment is Situational, there will be a Segment Note addressing use of the loop. Any required segments in loops beginning with a Situational segment only occur when the loop is used. Similarly, nested loops only occur when the higher level loop is used.

IMPLEMENTATION

278 Health Care Services Review — Request for Review

It is recommended that separate transaction sets be used for different patients.

Table 1 - Header

STANDARD

278 Health Care Services Review Information

Functional Group ID: **HI**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Health Care Services Review Information Transaction Set (278) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit health care service information, such as subscriber, patient, demographic, diagnosis or treatment data for the purpose of request for review, certification, notification or reporting the outcome of a health care services review.

Expected users of this transaction set are payors, plan sponsors, providers, utilization management and other entities involved in health care services review.

IMPLEMENTATION

TRANSACTION SET HEADER

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this segment to indicate the start of a health care services review request transaction set with all of the supporting detail information. This transaction set is the electronic equivalent of a phone, fax, or paper-based utilization management request.

Example: ST*278*0001~

STANDARD

ST Transaction Set Header

Level: Header

Position: 010

Loop: _____

Requirement: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES				
REQUIRED	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set	M ID 3/3				
<p>SEMANTIC: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).</p> <table border="1"> <thead> <tr> <th>CODE</th> <th>DEFINITION</th> </tr> </thead> <tbody> <tr> <td>278</td> <td>Health Care Services Review Information</td> </tr> </tbody> </table>					CODE	DEFINITION	278	Health Care Services Review Information
CODE	DEFINITION							
278	Health Care Services Review Information							
REQUIRED	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9				
<p>The Transaction Set Control Numbers in ST02 and SE02 must be identical. The number is assigned by the originator and must be unique within a functional group (GS-GE). For example, start with the number 0001 and increment from there. The number also aids in error resolution research. Use the corresponding value in SE02 for this transaction set.</p>								

IMPLEMENTATION

BEGINNING OF HIERARCHICAL TRANSACTION

Usage: REQUIRED
Repeat: 1
Example: BHT*0078*13*19980011400001*19980101*1400~

STANDARD

BHT Beginning of Hierarchical Transaction

Level: Header
Position: 020
Loop: _____
Requirement: Mandatory
Max Use: 1
Purpose: To define the business hierarchical structure of the transaction set and identify the business application purpose and reference data, i.e., number, date, and time

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	BHT01	1005	Hierarchical Structure Code Code indicating the hierarchical application structure of a transaction set that utilizes the HL segment to define the structure of the transaction set	M ID 4/4
			0078 Information Source, Information Receiver, Subscriber, Dependent, Provider of Service, Services	
REQUIRED	BHT02	353	Transaction Set Purpose Code Code identifying purpose of transaction set	M ID 2/2
			13 Request	

REQUIRED	BHT03	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier <i>INDUSTRY: Submitter Transaction Identifier</i> <i>SEMANTIC:</i> BHT03 is the number assigned by the originator to identify the transaction within the originator's business application system.	O AN 1/30
<p>Use this element to trace the transaction from one point to the next point, such as when the transaction is passed from one clearinghouse to another clearinghouse. This identifier must be returned in the corresponding 278 response transaction's BHT03. This identifier will only be returned by the last entity to handle the 278. This identifier will not be passed through the complete life of the transaction. All recipients of 278 request transactions are required to return the Submitter Transaction Identifier in their 278 response if one is submitted.</p>				
REQUIRED	BHT04	373	Date Date expressed as CCYYMMDD <i>INDUSTRY: Transaction Set Creation Date</i> <i>SEMANTIC:</i> BHT04 is the date the transaction was created within the business application system.	O DT 8/8
REQUIRED	BHT05	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) <i>INDUSTRY: Transaction Set Creation Time</i> <i>SEMANTIC:</i> BHT05 is the time the transaction was created within the business application system.	O TM 4/8
NOT USED	BHT06	640	Transaction Type Code	O ID 2/2

IMPLEMENTATION

UTILIZATION MANAGEMENT ORGANIZATION (UMO) LEVEL

Loop: 2000A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) LEVEL
Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this segment to indicate the information source hierarchical level. For a request transaction, this segment corresponds to the identification of the payer, HMO, or other utilization management organization who will be the source of the decision/response.

Example: HL*1**20*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL **Repeat:** >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure	M AN 1/12
COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.				
NOT USED	HL02	734	Hierarchical Parent ID Number	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code	M	ID	1/2
			Code defining the characteristic of a level in a hierarchical structure			
			<p>COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.</p>			
			CODE	DEFINITION		
			20 Information Source			
REQUIRED	HL04	736	Hierarchical Child Code	O	ID	1/1
			Code indicating if there are hierarchical child data segments subordinate to the level being described			
			<p>COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.</p>			
			CODE	DEFINITION		
			1 Additional Subordinate HL Data Segment in This Hierarchical Structure.			

IMPLEMENTATION

UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME

Loop: 2010A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME
Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this NM1 loop to identify the source of information. In the case of a request transaction, the source of information would normally be the payer or utilization review organization making the decision on the request.

Example: NM1*X3*2*ABC PAYER*****46*12345000~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 **Repeat:** >1

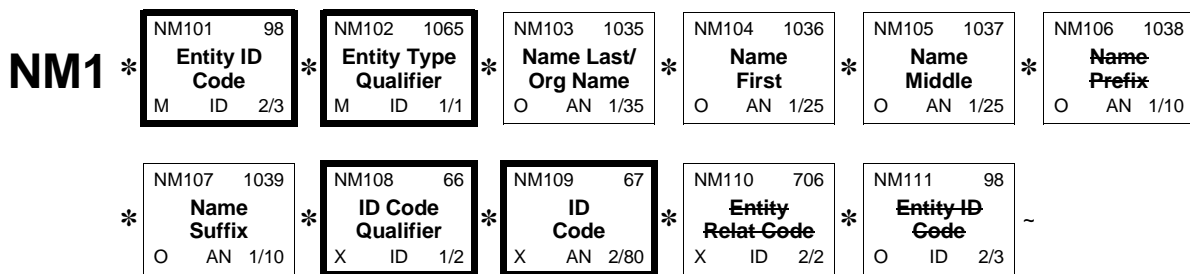

Requirement: Optional

IMPLEMENTATION

REQUESTER CONTACT INFORMATION

Loop: 2010B — REQUESTER NAME

Usage: SITUATIONAL

Repeat: 1

- Notes:**
1. Required if the UMO must direct requests for additional information to a specific requester contact, electronic mail, facsimile, or phone number.
 2. When the communication number represents a telephone number in the United States and other countries using the North American Dialing Plan (for voice, data, fax, etc.), the communication number should always include the area code and phone number using the format AAABBBCCCC. Where AAA is the area code, BBB is the telephone number prefix, and CCCC is the telephone number (e.g. (534)224-2525 would be represented as 5342242525). The extension, when applicable, should be included in the communication number immediately after the telephone number.
 3. By definition of the standard, if PER03 is used, PER04 is required.

Example: PER*IC*WILBER*TE*8189991234*FX*8188769304~

STANDARD

PER Administrative Communications Contact

Level: Detail

Position: 220

Loop: HL/NM1

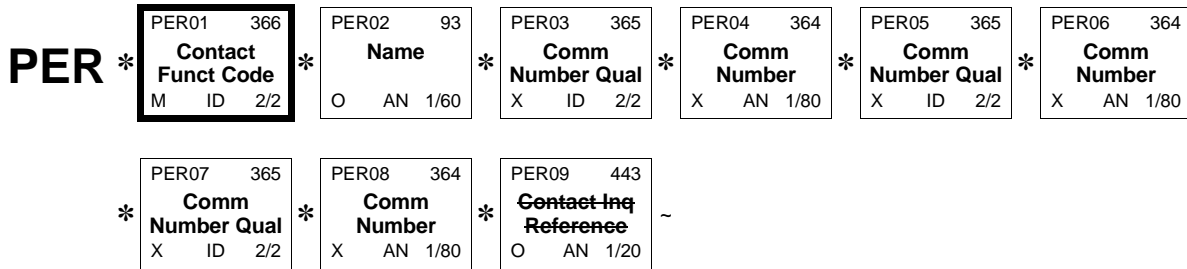

Requirement: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

- Syntax:**
1. **P0304**
If either PER03 or PER04 is present, then the other is required.
 2. **P0506**
If either PER05 or PER06 is present, then the other is required.
 3. **P0708**
If either PER07 or PER08 is present, then the other is required.

IMPLEMENTATION

REQUESTER PROVIDER INFORMATION

Loop: 2010B — REQUESTER NAME

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Use this segment when needed to indicate the requesting provider's role in the care of the patient and the requesting provider's specialty.

2. PRV02 qualifies PRV03.

Example: PRV*PC*ZZ*203BA0000Y~

STANDARD

PRV Provider Information

Level: Detail

Position: 240

Loop: HL/NM1

Requirement: Optional

Max Use: 1

Purpose: To specify the identifying characteristics of a provider

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	PRV01	1221	Provider Code Code identifying the type of provider	M ID 1/3
			CODE	DEFINITION
			AD	Admitting
			AS	Assistant Surgeon
			AT	Attending
			CO	Consulting
			CV	Covering
			OP	Operating
			OR	Ordering
			OT	Other Physician

			PC	Primary Care Physician				
			PE	Performing				
			RF	Referring				
REQUIRED	PRV02	128	Reference Identification Qualifier		M	ID	2/3	
			Code qualifying the Reference Identification					
			ZZ is used to indicate the “Health Care Provider Taxonomy” code list (provider specialty code) which is available on the Washington Publishing Company web site: http://www.wpc-edi.com. This taxonomy is maintained by the Blue Cross Blue Shield Association and ASC X12N TG2 WG15.					
			CODE	DEFINITION				
			ZZ	Mutually Defined Health Care Provider Taxonomy Code list.				
REQUIRED	PRV03	127	Reference Identification		M	AN	1/30	
			Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier					
			<i>INDUSTRY: Provider Taxonomy Code</i>					
			<i>ALIAS: Provider Specialty Code</i>					
NOT USED	PRV04	156	State or Province Code		O	ID	2/2	
NOT USED	PRV05	C035	PROVIDER SPECIALTY INFORMATION		O			
NOT USED	PRV06	1223	Provider Organization Code		O	ID	3/3	

IMPLEMENTATION

SUBSCRIBER LEVEL

Loop: 2000C — SUBSCRIBER LEVEL Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this segment to indicate the subscriber hierarchical level. This segment corresponds to the identification of the subscriber or individual insured member. The subscriber could also be the patient. If the subscriber is the patient, the dependent hierarchical level (Loop 2000D) is not used.

Example: HL*3*2*22*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL Repeat: >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code	M	ID	1/2
			Code defining the characteristic of a level in a hierarchical structure			
			COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.			
			CODE	DEFINITION		
			22	Subscriber		
REQUIRED	HL04	736	Hierarchical Child Code	O	ID	1/1
			Code indicating if there are hierarchical child data segments subordinate to the level being described			
			COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.			
			CODE	DEFINITION		
			1	Additional Subordinate HL Data Segment in This Hierarchical Structure.		

IMPLEMENTATION

ACCIDENT DATE

Loop: 2000C — SUBSCRIBER LEVEL

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Use if the subscriber is a patient and the patient's condition is accident related.

2. Required if UM05-1 = AA.

Example: DTP*439*D8*19981218~

STANDARD

DTP Date or Time or Period

Level: Detail

Position: 070

Loop: HL

Requirement: Optional

Max Use: 9

Purpose: To specify any or all of a date, a time, or a time period

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	DTP01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time <i>INDUSTRY: Date Time Qualifier</i>	M ID 3/3

IMPLEMENTATION

SUBSCRIBER NAME

Loop: 2010C — SUBSCRIBER NAME Repeat: 1

Usage: REQUIRED

Repeat: 1

- Notes:
1. Use this segment to convey the name and identification number of the subscriber (who may also be the patient).
 2. The Member Identification Number (NM108/NM109) is required and may be adequate to identify the subscriber to the UMO. However, the UMO can require additional information. The maximum data elements that the UMO can require to identify the subscriber, in addition to the member ID are as follows:
Subscriber Last Name (NM103)
Subscriber First Name (NM104)
Subscriber Birth Date (DMG01 and DMG02)
 3. Refer to Section 2.2.2.1 Identifying the Patient for specific information on how to identify an individual to a UMO.

Example: NM1*IL*1*SMITH*JOE****MI*12345678901~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 Repeat: >1

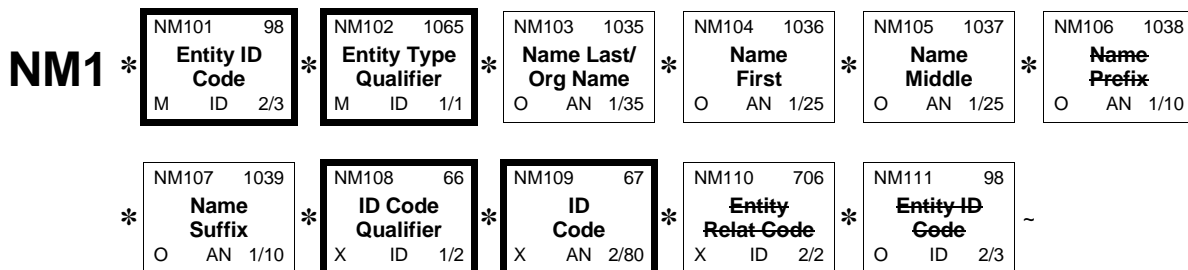

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

- Syntax:
1. **P0809**
If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
If NM111 is present, then NM110 is required.

NOT USED	NM111	98	Entity Identifier Code	O	ID	2/3

IMPLEMENTATION

SUBSCRIBER SUPPLEMENTAL IDENTIFICATION

Loop: 2010C — SUBSCRIBER NAME
Usage: SITUATIONAL
Repeat: 9

- Notes:**
1. Use this segment when needed to provide a supplemental identifier for the subscriber. The primary identifier is the Member Identification Number in the NM1 segment.
 2. Health Insurance Claim (HIC) Number or Medicaid Recipient Identification Numbers are to be provided in the NM1 segment as a Member Identification Number when it is the primary number a UMO knows a member by (such as for Medicare or Medicaid). Do not use this segment for the Health Insurance Claim (HIC) Number or Medicaid Recipient Identification Number unless they are different from the Member Identification Number provided in the NM1 segment.
 3. If the requester values this segment with the Patient Account Number (REF01="EJ") on the request, the UMO must return the same value in this segment on the response.

Example: REF*SY*123456789~

STANDARD

REF Reference Identification

Level: Detail
Position: 180
Loop: HL/NM1
Requirement: Optional
Max Use: 9
Purpose: To specify identifying information
Syntax: 1. R0203
 At least one of REF02 or REF03 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification	M ID 2/3
			CODE	DEFINITION
			1L	Group or Policy Number Use this code only if you cannot determine if the number is a Group Number (6P) or a Policy Number (IG).
			1W	Member Identification Number Do not use if NM108 = MI.
			6P	Group Number
			A6	Employee Identification Number
			EJ	Patient Account Number Use this code only if the subscriber is the patient.
			F6	Health Insurance Claim (HIC) Number Use the NM1 (Subscriber Name) segment if the subscriber's HIC number is the primary identifier for his or her coverage. Use this code only in a REF segment when the payer has a different member number, and there is also a need to pass the subscriber's HIC number. This might occur in a Medicare HMO situation.
			HJ	Identity Card Number Use this code when the Identity Card Number differs from the Member Identification Number. This is particularly prevalent in the Medicaid environment.
			IG	Insurance Policy Number
			N6	Plan Network Identification Number
			NQ	Medicaid Recipient Identification Number
			SY	Social Security Number Use this code only if the Social Security Number was not used by the payer as its primary method of identifying the subscriber. The social security number may not be used for Medicare.

IMPLEMENTATION

DEPENDENT LEVEL

Loop: 2000D — DEPENDENT LEVEL Repeat: 1

Usage: SITUATIONAL

Repeat: 1

- Notes:
1. Use this hierarchical loop only if the patient is someone other than the subscriber and the patient does not have a unique (different from the subscriber) member ID.
 2. If the patient has a unique member ID, use Loop 2000C to identify the patient.
 3. Required segments in this loop are required only when this loop is used.

Example: HL*4*3*23*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL Repeat: >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number	M AN 1/12
			A unique number assigned by the sender to identify a particular data segment in a hierarchical structure	
			COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	

REQUIRED	HL02	734	Hierarchical Parent ID Number	O AN 1/12
-----------------	-------------	------------	--------------------------------------	------------------

Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to

COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.

REQUIRED	HL03	735	Hierarchical Level Code	M ID 1/2
-----------------	-------------	------------	--------------------------------	-----------------

Code defining the characteristic of a level in a hierarchical structure

COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

23	Dependent
-----------	------------------

REQUIRED	HL04	736	Hierarchical Child Code	O ID 1/1
-----------------	-------------	------------	--------------------------------	-----------------

Code indicating if there are hierarchical child data segments subordinate to the level being described

COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

1	Additional Subordinate HL Data Segment in This Hierarchical Structure.
----------	---

IMPLEMENTATION

ACCIDENT DATE

Loop: 2000D — DEPENDENT LEVEL

Usage: SITUATIONAL

Repeat: 1

- Notes: 1. Use if the dependent's condition is accident related.
2. Required if UM05-1 = AA.

IMPLEMENTATION

DEPENDENT NAME

Loop: 2010D — DEPENDENT NAME Repeat: 1

Usage: REQUIRED

Repeat: 1

- Notes:
1. Use this segment to convey the name of the dependent who is the patient.
 2. The maximum data elements in Loop 2010D that can be required by a UMO to identify a dependent are as follows:
 Dependent Last Name (NM103)
 Dependent First Name (NM104)
 Dependent Birth Date (DMG01 and DMG02)
 3. Refer to Section 2.2.2.1 Identifying the Patient for specific information on how to identify an individual to a UMO.

Example: NM1*QC*1*SMITH*MARY~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 Repeat: >1

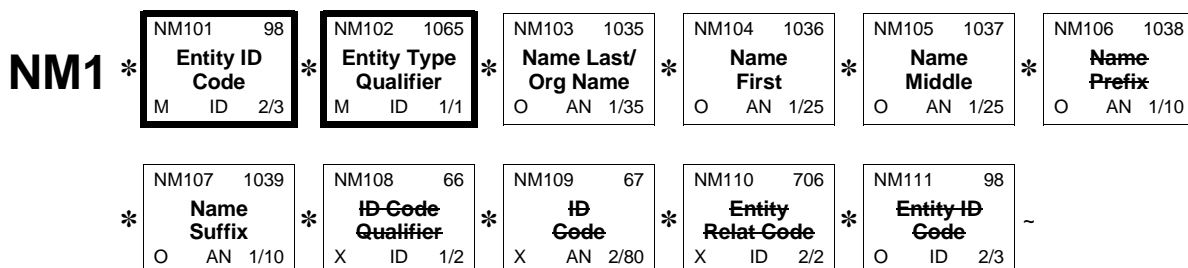

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

- Syntax:
1. **P0809**
If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
If NM111 is present, then NM110 is required.

DIAGRAM

ELEMENT SUMMARY

IMPLEMENTATION

DEPENDENT SUPPLEMENTAL IDENTIFICATION

Loop: 2010D — DEPENDENT NAME

Usage: SITUATIONAL

Repeat: 3

- Notes:
1. Use this segment when necessary to provide supplemental identifiers for the dependent.
 2. Use the Subscriber Supplemental Identifier (REF) segment in Loop 2010C for supplemental identifiers related to the subscriber's policy or group number.
 3. If the requester values this segment with the Patient Account Number (REF01 = "EJ") on the request, the UMO must return the same value in this segment on the response.

Example: REF*SY*123456789~

STANDARD

REF Reference Identification

Level: Detail

Position: 180

Loop: HL/NM1

Requirement: Optional

Max Use: 9

Purpose: To specify identifying information

Syntax: 1. **R0203**
 At least one of REF02 or REF03 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

NOT USED	INS16	26	Country Code	O	ID	2/3
SITUATIONAL	INS17	1470	Number A generic number	O	N0	1/9

INDUSTRY: Birth Sequence Number

SEMANTIC: INS17 is the number assigned to each family member born with the same birth date. This number identifies birth sequence for multiple births allowing proper tracking and response of benefits for each dependent (i.e., twins, triplets, etc.).

This data element is not used unless the dependent is a child from a multiple birth.

IMPLEMENTATION

SERVICE PROVIDER LEVEL

Loop: 2000E — SERVICE PROVIDER LEVEL Repeat: >1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use Loop 2000E to identify the specific person, group practice, facility, or specialty entity to provide the services requested.

Example: HL*5*4*19*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL Repeat: >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure	M ID 1/2
COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.				
		CODE	DEFINITION	
		19	Provider of Service	
REQUIRED	HL04	736	Hierarchical Child Code Code indicating if there are hierarchical child data segments subordinate to the level being described	O ID 1/1
COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.				
		CODE	DEFINITION	
		1	Additional Subordinate HL Data Segment in This Hierarchical Structure.	

IMPLEMENTATION

MESSAGE TEXT

Loop: 2000E — SERVICE PROVIDER LEVEL

Usage: SITUATIONAL

Repeat: 1

Advisory: Under most circumstances, this segment is not sent.

Notes: 1. Use to transmit a text message to the UMO about the service provider or specialty requested.

Example: MSG*This is a free-form text message~

STANDARD

MSG Message Text

Level: Detail

Position: 160

Loop: HL

Requirement: Optional

Max Use: 1

Purpose: To provide a free-form format that allows the transmission of text information

Syntax: 1. **C0302**
If MSG03 is present, then MSG02 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	MSG01	933	Free-Form Message Text Free-form message text <i>INDUSTRY: Free Form Message Text</i>	M AN 1/264
NOT USED	MSG02	934	Printer Carriage Control Code	X ID 2/2
NOT USED	MSG03	1470	Number	O NO 1/9

IMPLEMENTATION

SERVICE PROVIDER NAME

Loop: 2010E — SERVICE PROVIDER NAME Repeat: 3

Usage: REQUIRED

Repeat: 1

- Notes:
1. Use this segment to convey the name and identification number of the service provider (person, group, or facility) or to identify the specialty entity.
 2. Use the maximum of three occurrences of Loop 2010E in a single Loop 2000E only when it is necessary to identify an individual provider within a specific group and facility when that provider and group provide services at multiple facilities.
 3. Do not use multiple occurrences of Loop 2010E within a single Loop 2000E to request certification for admission to a facility and a specialist or services at that facility. In this case, two occurrences of Loop 2000E are required as follows:

The admission request must be expressed in a separate Loop 2000E where the facility is identified in Loop 2010E and Loop 2000F identifies admission review as the request category.

The specialist and services are expressed in a separate Loop 2000E where the specialist or specialty is identified in Loop 2010E and Loop 2000F identifies the services.

Example: NM1*SJ*1*WATSON*SUSAN*****34*987654321~

IMPLEMENTATION

SERVICE PROVIDER CONTACT INFORMATION

Loop: 2010E — SERVICE PROVIDER NAME

Usage: SITUATIONAL

Repeat: 1

- Notes:**
1. Use this segment to identify a contact name and/or communications number for the service provider.
 2. Required if known by the requester.
 3. When the communication number represents a telephone number in the United States and other countries using the North American Dialing Plan (for voice, data, fax, etc.), the communication number should always include the area code and phone number using the format AAABBBCCCC. Where AAA is the area code, BBB is the telephone number prefix, and CCCC is the telephone number (e.g. (534)224-2525 would be represented as 5342242525). The extension, when applicable, should be included in the communication number immediately after the telephone number.
 4. By definition of the standard, if PER03 is used, PER04 is required.

Example: PER*IC*M TUCKER*TE*8189993456*FX*8188769304~

STANDARD

PER Administrative Communications Contact

Level: Detail

Position: 220

Loop: HL/NM1

Requirement: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

- Syntax:**
1. **P0304**
If either PER03 or PER04 is present, then the other is required.
 2. **P0506**
If either PER05 or PER06 is present, then the other is required.
 3. **P0708**
If either PER07 or PER08 is present, then the other is required.

SERVICE LEVEL

Loop: 2000F — SERVICE LEVEL Repeat: >1
 Usage: REQUIRED
 Repeat: 1
 Notes: 1. Use Loop 2000F to identify the service(s) requested.
 Example: HL*6*5*SS*0~

STANDARD

HL Hierarchical Level
 Level: Detail
 Position: 010
 Loop: HL Repeat: >1
 Requirement: Mandatory
 Max Use: 1
 Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.	M	ID	1/2
			CODE	DEFINITION		
			SS	Services		
REQUIRED	HL04	736	Hierarchical Child Code Code indicating if there are hierarchical child data segments subordinate to the level being described COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.	O	ID	1/1
			CODE	DEFINITION		
			0	No Subordinate HL Segment in This Hierarchical Structure.		

IMPLEMENTATION

SERVICE TRACE NUMBER

Loop: 2000F — SERVICE LEVEL

Usage: SITUATIONAL

Repeat: 2

- Notes:**
1. Use this segment to assign a unique trace number to this service request. It is recommended that requesters assign a unique trace number to each service request. The requester can send one TRN segment in each service level (Loop 2000F) on the request to aid in the reconciliation of the 278 response.
 2. If the transaction is routed through a clearinghouse, the clearinghouse may add their own TRN segment. If the transaction passes through multiple clearinghouses, and the second clearinghouse needs to assign their own TRN segment, they must replace the TRN from the first clearinghouse and retain it to be returned in the 278 response. If the second clearinghouse does not need to assign a TRN segment, they should pass all received TRN segments.
 3. Each trace number provided in the TRN segment at this level on the request must be returned by the UMO in the TRN segment at the corresponding level of the response.

Example: TRN*1*111099*9012345678*RADIOLOGY~

STANDARD

TRN Trace

Level: Detail

Position: 020

Loop: HL

Requirement: Optional

Max Use: 9

Purpose: To uniquely identify a transaction to an application

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	TRN01	481	Trace Type Code Code identifying which transaction is being referenced	M ID 1/2
			CODE	DEFINITION
			1	Current Transaction Trace Numbers
REQUIRED	TRN02	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	M AN 1/30
			<i>INDUSTRY: Service Trace Number</i>	
			<i>SEMANTIC: TRN02 provides unique identification for the transaction.</i>	
REQUIRED	TRN03	509	Originating Company Identifier A unique identifier designating the company initiating the funds transfer instructions. The first character is one-digit ANSI identification code designation (ICD) followed by the nine-digit identification number which may be an IRS employer identification number (EIN), data universal numbering system (DUNS), or a user assigned number; the ICD for an EIN is 1, DUNS is 3, user assigned number is 9	O AN 10/10
			<i>INDUSTRY: Trace Assigning Entity Identifier</i>	
			<i>SEMANTIC: TRN03 identifies an organization.</i>	
			Use this element to identify the organization that assigned this trace number. TRN03 must be completed to aid requesters and clearinghouses in identifying their TRN in the 278 response.	
			The first position must be either a "1" if an EIN is used, a "3" if a DUNS is used or a "9" if a user assigned identifier is used.	
SITUATIONAL	TRN04	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	O AN 1/30
			<i>INDUSTRY: Trace Assigning Entity Additional Identifier</i>	
			<i>SEMANTIC: TRN04 identifies a further subdivision within the organization.</i>	
			Use this information if necessary to further identify a specific component, such as a specific division or group, of the company identified in the previous data element (TRN03).	

IMPLEMENTATION

HEALTH CARE SERVICE LOCATION INFORMATION

O

To provide information that identifies the place of service or the type of bill related to the location at which a health care service was rendered

Required if the service provider's facility type is known by the requester and UM03 does not specify a facility type. If UM03 is present and specifies a service type that is qualified by a facility type, e.g.: UM03 = A2 for Professional (Physician) Visit - Skilled Nursing Facility, do not value this field. If both UM03 and UM04 are valued and UM03 has a facility type qualifier, the value in UM03 takes precedence.

REQUIRED UM04 - 1 1331 **Facility Code Value** M AN 1/2
Code identifying the type of facility where services were performed; the first and second positions of the Uniform Bill Type code or the Place of Service code from the Electronic Media Claims National Standard Format

INDUSTRY: Facility Type Code

Use to indicate a facility code value from the code source referenced in UM04-2.

REQUIRED UM04 - 2 1332 **Facility Code Qualifier** O ID 1/2
Code identifying the type of facility referenced

CODE	DEFINITION
------	------------

A	Uniform Billing Claim Form Bill Type

		AP		Another Party Responsible	
SITUATIONAL	UM05 - 4	156	State or Province Code	O ID 2/2	
Code (Standard State/Province) as defined by appropriate government agency					
<i>INDUSTRY: State Code</i>					
CODE SOURCE 22: States and Outlying Areas of the U.S.					
Required on review requests involving automobile accidents (UM05-1 = "AA") if the accident occurred out of the service provider's state.					
SITUATIONAL	UM05 - 5	26	Country Code	O ID 2/3	
Code identifying the country					
CODE SOURCE 5: Countries, Currencies and Funds					
Required if the automobile accident occurred out of the United States to identify the country in which the accident occurred.					
SITUATIONAL	UM06	1338	Level of Service Code	O ID 1/3	
Code specifying the level of service rendered					
Recommended if the service requested would not be authorized unless the patient's condition is Emergency or Urgent.					
		CODE	DEFINITION		
		03	Emergency		
		U	Urgent		
SITUATIONAL	UM07	1213	Current Health Condition Code	O ID 1/1	
Code indicating current health condition of the individual					
Required when the patient's condition, as expressed by the codes in this data element, is a factor in the provider's determination of services to be performed that are not typically requested for the patient's diagnosis and proposed treatment.					
		CODE	DEFINITION		
		1	Acute		
		2	Stable		
		3	Chronic		
		4	Systemic		
		5	Localized		
		6	Mild Disease		

7	Normal, Healthy
8	Severe Systemic disease
9	Severe Systemic Disease that is a Constant Threat to Life
E	Excellent
F	Fair
G	Good
P	Poor

SITUATIONAL UM08 923

Prognosis Code O ID 1/1
 Code indicating physician's prognosis for the patient

Required when the patient's prognosis, as expressed by the codes in this data element, is a factor in the provider's determination of services to be performed that are not typically requested for the patient's diagnosis and proposed treatment.

CODE	DEFINITION
1	Poor
2	Guarded
3	Fair
4	Good
5	Very Good
6	Excellent
7	Less than 6 Months to Live
8	Terminal

REQUIRED UM09 1363

Release of Information Code O ID 1/1
 Code indicating whether the provider has on file a signed statement by the patient authorizing the release of medical data to other organizations

CODE	DEFINITION
A	Appropriate Release of Information on File at Health Care Service Provider or at Utilization Review Organization
I	Informed Consent to Release Medical Information for Conditions or Diagnoses Regulated by Federal Statutes
M	The Provider has Limited or Restricted Ability to Release Data Related to a Claim
O	On file at Payor or at Plan Sponsor
Y	Yes, Provider has a Signed Statement Permitting Release of Medical Billing Data Related to a Claim

SITUATIONAL **UM10** **1514** **Delay Reason Code** **O** **ID** **1/2**

Code indicating the reason why a request was delayed

Required if the request is not submitted within the normal timeframe of the UMO.

CODE	DEFINITION
1	Proof of Eligibility Unknown or Unavailable
2	Litigation
3	Authorization Delays
4	Delay in Certifying Provider
7	Third Party Processing Delay
8	Delay in Eligibility Determination
10	Administration Delay in the Prior Approval Process
11	Other
15	Natural Disaster
16	Lack of Information
17	No response to initial request

IMPLEMENTATION

PREVIOUS CERTIFICATION IDENTIFICATION

- Loop:** 2000F — SERVICE LEVEL
Usage: SITUATIONAL
Repeat: 1
- Notes:**
1. This is the certification number assigned by the UMO to the original service review outcome associated with this service review. This is not the trace number assigned by the requester.
 2. Required if submitting an additional health care services review request associated with a request already processed by the UMO and the certification number previously assigned by the UMO is known.

Example: REF*BB*A123~

STANDARD

REF Reference Identification

- Level:** Detail
Position: 060
Loop: HL
Requirement: Optional
Max Use: 9
Purpose: To specify identifying information
Syntax: 1. R0203
 At least one of REF02 or REF03 is required.

DIAGRAM

Use this for the eighth procedure.

REQUIRED HI08 - 1 1270 **Code List Qualifier Code** M ID 1/3
Code identifying a specific industry code list

CODE	DEFINITION
BO	Health Care Financing Administration Common Procedural Coding System Because the AMA's CPT codes are also level 1 HCPCS codes, they are reported under BO. CODE SOURCE 130: Health Care Financing Administration Common Procedural Coding System
BQ	International Classification of Diseases Clinical Modification (ICD-9-CM) Procedure CODE SOURCE 131: International Classification of Diseases Clinical Mod (ICD-9-CM) Procedure
JP	National Standard Tooth Numbering System CODE SOURCE 135: American Dental Association Codes
NDC	National Drug Code (NDC) CODE SOURCE 134: National Drug Code CODE SOURCE 240: National Drug Code by Format
ZZ	Mutually Defined Use ZZ for Code Source 513: Home Infusion EDI Coalition (HIEC) Product/Service Code List.

REQUIRED HI08 - 2 1271 **Industry Code** M AN 1/30
Code indicating a code from a specific industry code list
INDUSTRY: Procedure Code

SITUATIONAL HI08 - 3 1250 **Date Time Period Format Qualifier** X ID 2/3
Code indicating the date format, time format, or date and time format
Required if X12N syntax conditions apply.

CODE	DEFINITION
D8	Date Expressed in Format CCYYMMDD
RD8	Range of Dates Expressed in Format CCYYMMDD-CCYYMMDD

SITUATIONAL HI08 - 4 1251 **Date Time Period** X AN 1/35
Expression of a date, a time, or range of dates, times or dates and times
INDUSTRY: Procedure Date
Required if proposed or actual procedure date is known.

NOT USED	HI08 - 5	782	Monetary Amount	O	R	1/18
SITUATIONAL	HI08 - 6	380	Quantity Numeric value of quantity	O	R	1/15

INDUSTRY: Procedure Quantity

Required if requesting authorization for more than one occurrence of the procedure identified in HI08-2 for the same time period.

SITUATIONAL	HI08 - 7	799	Version Identifier	O	AN	1/30
			Revision level of a particular format, program, technique or algorithm			

INDUSTRY: Version, Release, or Industry Identifier

Required if the code list referenced in HI08-1 has a version identifier. Otherwise Not Used.

SITUATIONAL	HI09	C022	HEALTH CARE CODE INFORMATION	O		
			To send health care codes and their associated dates, amounts and quantities			

ALIAS: Procedure Code 9

Use this for the ninth procedure.

REQUIRED	HI09 - 1	1270	Code List Qualifier Code	M	ID	1/3

IMPLEMENTATION

HEALTH CARE SERVICES DELIVERY

Loop: 2000F — SERVICE LEVEL

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Use the HSD segment when requesting services (other than spinal manipulation services) that have a specific pattern of delivery or usage. For spinal manipulation services, use the CR2 segment. An explanation of the uses of this segment follows.

HSD01 qualifies HSD02: If the value in HSD02=1 and the value in HSD01=VS (Visits), this means “one visit”.

Between HSD02 and HSD03 verbally insert a “per every”.

HSD03 qualifies HSD04: If the value in HSD04=3 and the value in HSD03=DA (Day), this means “three days”. Between HSD04 and HSD05 verbally insert a “for”. HSD05 qualifies HSD06: If the value in HSD06=21 and the value in HSD05=7 (Days), this means “21 days”.

The total message reads:

HSD*VS*1*DA*3*7*21~ = “One visit per every three days for 21 days”.

Another similar data string of HSD*VS*2*DA*4*7*20~ = “Two visits per every four days for 20 days”.

An alternate way to use HSD is to employ HSD07 and/or HSD08. A data string of HSD*VS*1*****SX*D~ means “1 visit on Wednesday and Thursday morning”.

Example: HSD*VS*1*DA*1*7*10~ (This indicates “1 visit every (per) 1 day (daily) for 10 days”.)

Example: HSD*VS*1*DA*****W~ (This indicates “1 visit per day whenever necessary”.)

STANDARD

HSD Health Care Services Delivery

Level: Detail

Position: 090

Loop: HL

Requirement: Optional

Max Use: 1

Purpose: To specify the delivery pattern of health care services

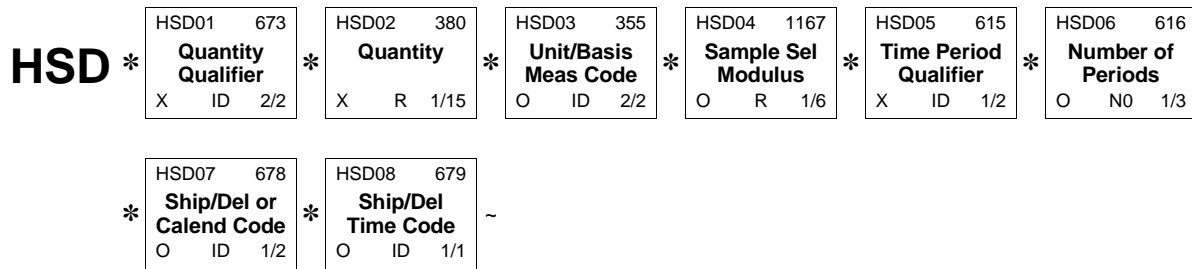

Syntax: 1. **P0102**

If either HSD01 or HSD02 is present, then the other is required.

2. **C0605**

If HSD06 is present, then HSD05 is required.

13	Patient is Confined to a Room or an Area Without Bathroom Facilities
14	Ambulation is Impaired and Walking Aid is Used for Mobility
15	Patient Condition Requires Positioning of the Body or Attachments Which Would Not be Feasible With the Use of an Ordinary Bed
16	Patient needs a trapeze bar to sit up due to respiratory condition or change body positions for other medical reasons
17	Patient's Ability to Breathe is Severely Impaired
18	Patient condition requires frequent and/or immediate changes in body positions
19	Patient can operate controls
20	Siderails Are to be Attached to a Hospital Bed Owned by the Beneficiary
21	Patient owns equipment
22	Mattress or Siderails are Being Used with Prescribed Medically Necessary Hospital Bed Owned by the Beneficiary
23	Patient Needs Lift to Get In or Out of Bed or to Assist in Transfer from Bed to Wheelchair
24	Patient has an orthopedic impairment requiring traction equipment which prevents ambulation during period of use
25	Item has been prescribed as part of a planned regimen of treatment in patient home
26	Patient is highly susceptible to decubitus ulcers
27	Patient or a care-giver has been instructed in use of equipment
60	Transportation Was To the Nearest Facility
IH	Independent at Home

SITUATIONAL **CRC07** **1321** **Condition Indicator** **O** **ID** **2/2**

Code indicating a condition

INDUSTRY: Condition Code

Use this data element to specify additional codes indicating a patient's condition.

Use if multiple conditions apply to the certification.

CODE	DEFINITION
01	Patient was admitted to a hospital
02	Patient was bed confined before the ambulance service
03	Patient was bed confined after the ambulance service
04	Patient was moved by stretcher
05	Patient was unconscious or in shock
06	Patient was transported in an emergency situation
07	Patient had to be physically restrained
08	Patient had visible hemorrhaging
09	Ambulance service was medically necessary
10	Patient is ambulatory
11	Ambulation is Impaired and Walking Aid is Used for Therapy or Mobility
12	Patient is confined to a bed or chair
13	Patient is Confined to a Room or an Area Without Bathroom Facilities
14	Ambulation is Impaired and Walking Aid is Used for Mobility
15	Patient Condition Requires Positioning of the Body or Attachments Which Would Not be Feasible With the Use of an Ordinary Bed
16	Patient needs a trapeze bar to sit up due to respiratory condition or change body positions for other medical reasons
17	Patient's Ability to Breathe is Severely Impaired
18	Patient condition requires frequent and/or immediate changes in body positions
19	Patient can operate controls
20	Siderails Are to be Attached to a Hospital Bed Owned by the Beneficiary

21	Patient owns equipment
22	Mattress or Siderails are Being Used with Prescribed Medically Necessary Hospital Bed Owned by the Beneficiary
23	Patient Needs Lift to Get In or Out of Bed or to Assist in Transfer from Bed to Wheelchair
24	Patient has an orthopedic impairment requiring traction equipment which prevents ambulation during period of use
25	Item has been prescribed as part of a planned regimen of treatment in patient home
26	Patient is highly susceptible to decubitus ulcers
27	Patient or a care-giver has been instructed in use of equipment
60	Transportation Was To the Nearest Facility
IH	Independent at Home

IMPLEMENTATION

INSTITUTIONAL CLAIM CODE

Loop: 2000F — SERVICE LEVEL

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Use only when requesting certification for admission (UM01 = AR) to a facility.

Example: CL1*3**01~

STANDARD

CL1 Claim Codes

Level: Detail

Position: 110

Loop: HL

Requirement: Optional

Max Use: 1

Purpose: To supply information specific to hospital claims

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
SITUATIONAL	CL101	1315	Admission Type Code Code indicating the priority of this admission CODE SOURCE 231: Admission Type Code Required if requesting admission to a hospital for inpatient services.	O ID 1/1
SITUATIONAL	CL102	1314	Admission Source Code Code indicating the source of this admission CODE SOURCE 230: Admission Source Code Used only when certification requires information on the admission source that is not provided in the Requester Loop 2000B.	O ID 1/1
SITUATIONAL	CL103	1352	Patient Status Code Code indicating patient status as of the "statement covers through date" CODE SOURCE 239: Patient Status Code Use only for inpatient services. Under most circumstances, this data element is not used.	O ID 1/2

SITUATIONAL **CL104** **1345** **Nursing Home Residential Status Code** **O** **ID** **1/1**
 Code specifying the status of a nursing home resident at the time of service

Use only when certification involves a nursing home resident.

CODE	DEFINITION

SITUATIONAL CR205 355

Unit or Basis for Measurement Code X ID 2/2
Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

SYNTAX: P0506

Required if requesting authorization for a spinal manipulation treatment series to indicate the proposed treatment time period.

CODE	DEFINITION
DA	Days
MO	Months
WK	Week
YR	Years

SITUATIONAL CR206 380

Quantity X R 1/15
Numeric value of quantity

INDUSTRY: Treatment Period Count

SYNTAX: P0506

SEMANTIC: CR206 is the time period involved in the treatment series.

Required if requesting authorization for a spinal manipulation treatment series.

SITUATIONAL CR207 380 **Quantity** O R 1/15
 Numeric value of quantity

INDUSTRY: Monthly Treatment Count

SEMANTIC: CR207 is the number of treatments rendered in the month of service.

Required if CR205 = "MO" to indicate the proposed number of treatments included in a month of service.

SITUATIONAL CR208 1342 **Nature of Condition Code** O ID 1/1
 Code indicating the nature of a patient's condition

INDUSTRY: Patient Condition Code

Required if UM01 = "HS".

CODE	DEFINITION
A	Acute Condition
C	Chronic Condition
D	Non-acute
E	Non-Life Threatening
F	Routine
G	Symptomatic
M	Acute Manifestation of a Chronic Condition

SITUATIONAL CR209 1073 **Yes/No Condition or Response Code** O ID 1/1
 Code indicating a Yes or No condition or response

INDUSTRY: Complication Indicator

SEMANTIC: CR209 is complication indicator. A "Y" value indicates a complicated condition; an "N" value indicates an uncomplicated condition.

Required if UM01 = "HS".

CODE	DEFINITION
N	No
Y	Yes

SITUATIONAL CR210 352 **Description** O AN 1/80
 A free-form description to clarify the related data elements and their content

INDUSTRY: Patient Condition Description

SEMANTIC: CR210 is a description of the patient's condition.

Use at discretion of requester.

SITUATIONAL CR211 352 **Description** O AN 1/80
 A free-form description to clarify the related data elements and their content

INDUSTRY: Patient Condition Description

SEMANTIC: CR211 is an additional description of the patient's condition.

Use at discretion of requester.

REQUIRED CR212 1073 **Yes/No Condition or Response Code** O ID 1/1

Code indicating a Yes or No condition or response

INDUSTRY: X-ray Availability Indicator

SEMANTIC: CR212 is X-rays availability indicator. A “Y” value indicates X-rays are maintained and available for carrier review; an “N” value indicates X-rays are not maintained and available for carrier review.

CODE	DEFINITION
N	No
Y	Yes

SITUATIONAL CR609 373

Date X DT 8/8

Date expressed as CCYYMMDD

INDUSTRY: Surgery Date

ALIAS: Related Surgery Date

SYNTAX: P091011

SEMANTIC: CR609 is date that the surgery identified in CR614 was performed.

Required if home health care is related to a specific surgical procedure.

SITUATIONAL CR610 235

Product/Service ID Qualifier X ID 2/2

Code identifying the type/source of the descriptive number used in Product/Service ID (234)

INDUSTRY: Product or Service ID Qualifier

SYNTAX: P091011

SEMANTIC: CR610 qualifies CR611.

Required if home health care is related to a specific surgical procedure.

CODE	DEFINITION
HC	Health Care Financing Administration Common Procedural Coding System (HCPCS) Codes Because the AMA's CPT codes are also level 1 HCPCS codes, they are reported under HC. CODE SOURCE 130: Health Care Financing Administration Common Procedural Coding System
ID	International Classification of Diseases Clinical Modification (ICD-9-CM) - Procedure CODE SOURCE 131: International Classification of Diseases Clinical Mod (ICD-9-CM) Procedure

SITUATIONAL	CR611	1137	Medical Code Value Code value for describing a medical condition or procedure <i>INDUSTRY: Surgical Procedure Code</i> <i>ALIAS: Related Surgical Procedure Code</i> SYNTAX: P091011 SEMANTIC: CR611 is the surgical procedure most relevant to the care being rendered.	X	AN	1/15				
Required if home health care is related to a specific surgical procedure.										
SITUATIONAL	CR612	373	Date Date expressed as CCYYMMDD <i>INDUSTRY: Physician Order Date</i> SEMANTIC: CR612 is the date the agency received the verbal orders from the physician for start of care.	O	DT	8/8				
Required if different from the date of the request.										
SITUATIONAL	CR613	373	Date Date expressed as CCYYMMDD <i>INDUSTRY: Last Visit Date</i> SEMANTIC: CR613 is the date that the patient was last seen by the physician.	O	DT	8/8				
Required if known.										
SITUATIONAL	CR614	373	Date Date expressed as CCYYMMDD <i>INDUSTRY: Physician Contact Date</i> SEMANTIC: CR614 is the date of the home health agency's most recent contact with the physician.	O	DT	8/8				
Required if known.										
SITUATIONAL	CR615	1250	Date Time Period Format Qualifier Code indicating the date format, time format, or date and time format SYNTAX: P151617	X	ID	2/3				
Required if the patient had a recent inpatient stay.

IMPLEMENTATION

MESSAGE TEXT

Loop: 2000F — SERVICE LEVEL

Usage: SITUATIONAL

Repeat: 1

Advisory: Under most circumstances, this segment is not sent.

Notes: 1. Use only if needed to convey free-form text about the health care services review requested.

Example: MSG*This is a free-form text message~

STANDARD

MSG Message Text

Level: Detail

Position: 160

Loop: HL

Requirement: Optional

Max Use: 1

Purpose: To provide a free-form format that allows the transmission of text information

Syntax: 1. **C0302**
If MSG03 is present, then MSG02 is required.

DIAGRAM

IMPLEMENTATION

TRANSACTION SET TRAILER

Usage: REQUIRED
Repeat: 1
Example: SE*24*0001~

STANDARD

SE Transaction Set Trailer

Level: Detail
Position: 280
Loop: _____
Requirement: Mandatory
Max Use: 1
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments)

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	SE01	96	Number of Included Segments	M NO 1/10
			Total number of segments included in a transaction set including ST and SE segments	
			<i>INDUSTRY: Transaction Segment Count</i>	
REQUIRED	SE02	329	Transaction Set Control Number	M AN 4/9
			Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	

The Transaction Set Control Numbers in ST02 and SE02 must be identical. The number is assigned by the originator and must be unique within a functional group (GS-GE). For example, start with the number 0001 and increment from there. The number also aids in error resolution research.

IMPLEMENTATION

278 Health Care Services Review — Response to Request for Review

It is recommended that separate transaction sets be used for different patients.

STANDARD

278 Health Care Services Review Information

Functional Group ID: **HI**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Health Care Services Review Information Transaction Set (278) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to transmit health care service information, such as subscriber, patient, demographic, diagnosis or treatment data for the purpose of request for review, certification, notification or reporting the outcome of a health care services review.

Expected users of this transaction set are payors, plan sponsors, providers, utilization management and other entities involved in health care services review.

IMPLEMENTATION

TRANSACTION SET HEADER

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this segment to indicate the start of a health care services review information response transaction set with all the supporting detail information. This transaction set is the electronic equivalent of a phone, fax, or paper-based utilization management response.

Example: ST*278*0001~

STANDARD

ST Transaction Set Header

Level: Header

Position: 010

Loop: _____

Requirement: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES				
REQUIRED	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set	M ID 3/3				
<p>SEMANTIC: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).</p> <table border="1"> <thead> <tr> <th>CODE</th> <th>DEFINITION</th> </tr> </thead> <tbody> <tr> <td>278</td> <td>Health Care Services Review Information</td> </tr> </tbody> </table>					CODE	DEFINITION	278	Health Care Services Review Information
CODE	DEFINITION							
278	Health Care Services Review Information							
REQUIRED	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9				
<p>The Transaction Set Control Numbers in ST02 and SE02 must be identical. The number is assigned by the originator and must be unique within a functional group (GS-GE). For example, start with the number 0001 and increment from there. The number also aids in error resolution research. Use the corresponding value in SE02 for this transaction set.</p>								

IMPLEMENTATION

BEGINNING OF HIERARCHICAL TRANSACTION

Usage: REQUIRED
Repeat: 1
Example: BHT*0078*11*199800114000001*19980101*1400*18~

STANDARD

BHT Beginning of Hierarchical Transaction

Level: Header
Position: 020
Loop: _____
Requirement: Mandatory
Max Use: 1
Purpose: To define the business hierarchical structure of the transaction set and identify the business application purpose and reference data, i.e., number, date, and time

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	BHT01	1005	Hierarchical Structure Code Code indicating the hierarchical application structure of a transaction set that utilizes the HL segment to define the structure of the transaction set	M ID 4/4
			0078 Information Source, Information Receiver, Subscriber, Dependent, Provider of Service, Services	
REQUIRED	BHT02	353	Transaction Set Purpose Code Code identifying purpose of transaction set	M ID 2/2
			11 Response	

REQUIRED **BHT03** **127** **Reference Identification** **O AN 1/30**
 Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

INDUSTRY: Submitter Transaction Identifier

SEMANTIC: BHT03 is the number assigned by the originator to identify the transaction within the originator's business application system.

Return the transaction identifier entered in BHT03 on the 278 request.

REQUIRED **BHT04** **373** **Date** **O DT 8/8**
 Date expressed as CCYYMMDD

INDUSTRY: Transaction Set Creation Date

SEMANTIC: BHT04 is the date the transaction was created within the business application system.

REQUIRED **BHT05** **337** **Time** **O TM 4/8**
 Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)

INDUSTRY: Transaction Set Creation Time

SEMANTIC: BHT05 is the time the transaction was created within the business application system.

SITUATIONAL **BHT06** **640** **Transaction Type Code** **O ID 2/2**
 Code specifying the type of transaction

If BHT06 is not valued on the response, the value "18" (Response - No Further Updates to Follow) is assumed.

CODE	DEFINITION
18	<p>Response - No Further Updates to Follow</p> <p>Use this code to indicate that this is a final response. If the final response reports a medical decision it contains an HCR01 value of A1, A3, A6, or NA in Loop 2000F. This indicates that no additional EDI responses are necessary or forthcoming from the UMO in relation to the original request.</p>
19	<p>Response - Further Updates to Follow</p> <p>Use this code to indicate that the final medical decision is pending further review or additional information from the requester. A pending response contains an HCR01 value of A4 or CT. This, in combination with BHT06 = 19, indicates that the final EDI response will be delivered later.</p> <p><i>Note:</i> If you use HCR01 = CT to indicate a non-EDI delivery of the medical decision, use it in combination with BHT06 = 18.</p>

IMPLEMENTATION

UTILIZATION MANAGEMENT ORGANIZATION (UMO) LEVEL

Loop: 2000A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) LEVEL
Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this segment to indicate the information source hierarchical level. The information source corresponds to the payer, HMO, or other utilization management organization that is the source of the health care services review decision/response.

Example: HL*1**20*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL **Repeat:** >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure	M AN 1/12
			COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	
NOT USED	HL02	734	Hierarchical Parent ID Number	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code	M ID 1/2
-----------------	-------------	------------	--------------------------------	-----------------

Code defining the characteristic of a level in a hierarchical structure

COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

20	Information Source
-----------	---------------------------

REQUIRED	HL04	736	Hierarchical Child Code	O ID 1/1
-----------------	-------------	------------	--------------------------------	-----------------

Code indicating if there are hierarchical child data segments subordinate to the level being described

COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

1	Additional Subordinate HL Data Segment in This Hierarchical Structure.
----------	---

IMPLEMENTATION

REQUEST VALIDATION

Loop: 2000A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) LEVEL

Usage: SITUATIONAL

Repeat: 9

Notes: 1. Use this AAA segment to report reasons why the request cannot be processed at a system or application level based on the trading partner information contained in the Interchange Control Header (ISA) or Functional Group Header (GS).

Example: AAA*Y**42*Y~

STANDARD

AAA Request Validation

Level: Detail

Position: 030

Loop: HL

Requirement: Optional

Max Use: 9

Purpose: To specify the validity of the request and indicate follow-up action authorized

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	AAA01	1073	Yes/No Condition or Response Code Code indicating a Yes or No condition or response	M ID 1/1
<i>INDUSTRY: Valid Request Indicator</i>				
SEMANTIC: AAA01 designates whether the request is valid or invalid. Code "Y" indicates that the code is valid; code "N" indicates that the code is invalid.				
		CODE	DEFINITION	
		N	No Use this code to indicate that the request or an element in the request is not valid. The transaction has been rejected as identified by the code in AAA03.	
		Y	Yes Use this code to indicate that the request is valid, however the transaction has been rejected as identified by the code in AAA03.	

NOT USED	AAA02	559	Agency Qualifier Code	O	ID	2/2
REQUIRED	AAA03	901	Reject Reason Code Code assigned by issuer to identify reason for rejection	O	ID	2/2

CODE	DEFINITION
04	Authorized Quantity Exceeded Use this code to indicate that the functional group exceeds the maximum number of transactions as specified by agreement between the application sender GS02 and application receiver GS03.
41	Authorization/Access Restrictions Use this code to indicate that the application sender (GS02) and application receiver (GS03) do not have a trading partner agreement for the transaction sets identified in GS01 or transaction sets with the purpose identified in BHT02. The 278 transaction set has three different implementations. The transaction set purpose, as identified in BHT02, specifies the implementation.
42	Unable to Respond at Current Time Use this code to indicate that the entity responsible for forwarding the request to the information source (Loop 2010A) is unable to process the transaction at the current time. This indicates a problem in the system forwarding the request and not in the information source's (UMO) system.
79	Invalid Participant Identification Use this code to indicate that the identifier used in GS02 or GS03 is invalid or unknown.

REQUIRED	AAA04	889	Follow-up Action Code Code identifying follow-up actions allowed	O	ID	1/1
-----------------	-------	-----	--	---	----	-----

CODE	DEFINITION
C	Please Correct and Resubmit
N	Resubmission Not Allowed
P	Please Resubmit Original Transaction
Y	Do Not Resubmit; We Will Hold Your Request and Respond Again Shortly

IMPLEMENTATION

UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME

Loop: 2010A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME
Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this NM1 loop to identify the source of information. In the case of a response to a request transaction, the information source would normally be the payer or utilization review organization who is the source of the decision regarding the request.

Example: NM1*X3*2*ABC PAYER*****46*123450000~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 **Repeat:** >1

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

Syntax: 1. **P0809**
If either NM108 or NM109 is present, then the other is required.
2. **C1110**
If NM111 is present, then NM110 is required.

IMPLEMENTATION

UTILIZATION MANAGEMENT ORGANIZATION (UMO) CONTACT INFORMATION

Loop: 2010A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME

Usage: SITUATIONAL

Repeat: 1

- Notes:**
1. Use this segment to identify a contact name and/or communications number for the UMO.
 2. Required when the requester must direct requests for additional information to a specific UMO contact, email, facsimile, or phone.
 3. When the communication number represents a telephone number in the United States and other countries using the North American Dialing Plan (for voice, data, fax, etc), the communication number should always include the area code and phone number using the format AAABBBCCCC. Where AAA is the area code, BBB is the telephone number prefix, and CCCC is the telephone number (e.g. (534)224-2525 would be represented as 5342242525). The extension, when applicable, should be included in the communication number immediately after the telephone number.
 4. By definition of the standard, if PER03 is used, PER04 is required.

Example: PER*IC*ORCUTT*TE*8189991234*FX*8188769304~

STANDARD

PER Administrative Communications Contact

Level: Detail

Position: 220

Loop: HL/NM1

Requirement: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

- Syntax:**
1. **P0304**
If either PER03 or PER04 is present, then the other is required.
 2. **P0506**
If either PER05 or PER06 is present, then the other is required.
 3. **P0708**
If either PER07 or PER08 is present, then the other is required.

IMPLEMENTATION

UTILIZATION MANAGEMENT ORGANIZATION (UMO) REQUEST VALIDATION

Loop: 2010A — UTILIZATION MANAGEMENT ORGANIZATION (UMO) NAME

Usage: SITUATIONAL

Repeat: 9

Notes: 1. Use this AAA segment to report the reasons why the request cannot be processed at a system or application level based on the Utilization Management Organization (information source) identified in Loop 2010A

2. Required only if the request is not valid at this level.

Example: AAA*N**42*Y~

STANDARD

AAA Request Validation

Level: Detail

Position: 230

Loop: HL/NM1

Requirement: Optional

Max Use: 9

Purpose: To specify the validity of the request and indicate follow-up action authorized

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES						
REQUIRED	AAA01	1073	Yes/No Condition or Response Code Code indicating a Yes or No condition or response <i>INDUSTRY: Valid Request Indicator</i> SEMANTIC: AAA01 designates whether the request is valid or invalid. Code "Y" indicates that the code is valid; code "N" indicates that the code is invalid.	M ID 1/1						
			<table border="1"> <thead> <tr> <th>CODE</th> <th>DEFINITION</th> </tr> </thead> <tbody> <tr> <td>N</td> <td>No</td> </tr> <tr> <td>Y</td> <td>Yes</td> </tr> </tbody> </table>	CODE	DEFINITION	N	No	Y	Yes	
CODE	DEFINITION									
N	No									
Y	Yes									
NOT USED	AAA02	559	Agency Qualifier Code	O ID 2/2						

SITUATIONAL AAA03 901 **Reject Reason Code** O ID 2/2
 Code assigned by issuer to identify reason for rejection

Required if AAA01 = "N".

CODE	DEFINITION
04	Authorized Quantity Exceeded Use this code to indicate that the transaction exceeds the maximum number of patient events for this information source (UMO). This implementation guide limits each transaction to a single patient event.
41	Authorization/Access Restrictions Use this reason code to indicate that the sender, as identified in ISA06 or GS02 is not authorized to send the transaction sets identified in GS01 or transaction sets with the purpose identified in BHT02 to the information source (UMO) identified in Loop 2010A. The 278 transaction set has three different implementations. The transaction set purpose as identified in BHT02 specifies the implementation.
42	Unable to Respond at Current Time Use this code to indicate that the information source (UMO) identified in Loop 2010A is unable to process the transaction at the current time. This indicates that there is a problem within the UMO's system.
79	Invalid Participant Identification Use this code to indicate that the code used in Loop 2010A to identify the information source (UMO) is invalid.
80	No Response received - Transaction Terminated Use this code to indicate that the trading partner/application system responsible for sending the request to the information source (UMO) has not received a response in the expected timeframe and therefore has terminated the request.
T4	Payer Name or Identifier Missing Use this code to indicate that either the name or identifier for the information source (UMO) identified in Loop 2010A is missing.

SITUATIONAL AAA04 889 **Follow-up Action Code** O ID 1/1
 Code identifying follow-up actions allowed

Required if AAA03 is present.

CODE	DEFINITION
N	Resubmission Not Allowed
P	Please Resubmit Original Transaction

Y	Do Not Resubmit; We Will Hold Your Request and Respond Again Shortly
---	--

IMPLEMENTATION

REQUESTER LEVEL

Loop: 2000B — REQUESTER LEVEL Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this segment to indicate the health care services review information receiver. For responses to request transactions, this segment corresponds to the identification of the provider who initiated the request for review.

Example: HL*2*1*21*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL Repeat: >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code	M ID 1/2
-----------------	-------------	------------	--------------------------------	-----------------

Code defining the characteristic of a level in a hierarchical structure

COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

21	Information Receiver
-----------	-----------------------------

REQUIRED	HL04	736	Hierarchical Child Code	O ID 1/1
-----------------	-------------	------------	--------------------------------	-----------------

Code indicating if there are hierarchical child data segments subordinate to the level being described

COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

1	Additional Subordinate HL Data Segment in This Hierarchical Structure.
----------	---

IMPLEMENTATION

REQUESTER NAME

Loop: 2010B — REQUESTER NAME Repeat: 1

Usage: REQUIRED

Repeat: 1

Notes: 1. Use this NM1 loop to identify the receiver of information. In the case of a response to a request transaction, the receiver would normally be the provider who is receiving the decision.

Example: NM1*1P*1*GARDNER*JAMES*****24*000012345~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 Repeat: >1

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

Syntax: 1. **P0809**
 If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
 If NM111 is present, then NM110 is required.

SUBSCRIBER NAME

Loop: 2010C — SUBSCRIBER NAME Repeat: 1

Usage: REQUIRED

Repeat: 1

Example: NM1*IL*1*SMITH*JOE****MI*12345678901~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 Repeat: >1

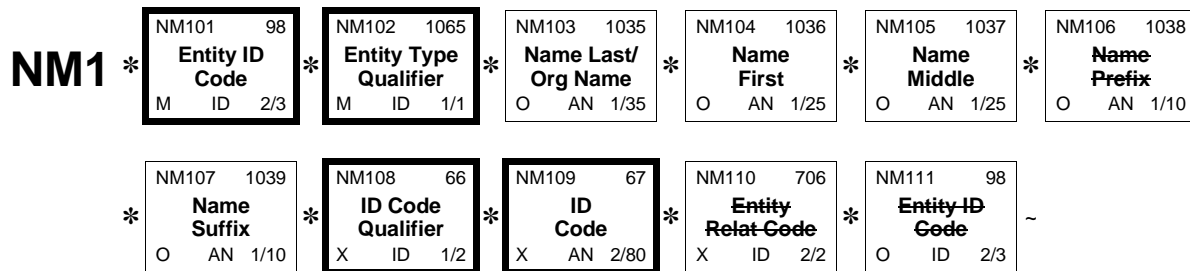

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

- Syntax: 1. **P0809**
If either NM108 or NM109 is present, then the other is required.
2. **C1110**
If NM111 is present, then NM110 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	NM101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, property or an individual	M ID 2/3
			CODE	DEFINITION
			IL	Insured or Subscriber
REQUIRED	NM102	1065	Entity Type Qualifier Code qualifying the type of entity	M ID 1/1
			SEMANTIC: NM102 qualifies NM103.	
			CODE	DEFINITION
			1	Person

SITUATIONAL NM103 1035 **Name Last or Organization Name** O AN 1/35
Individual last name or organizational name

INDUSTRY: Subscriber Last Name

Required if valued on the request.

SITUATIONAL NM104 1036 **Name First** O AN 1/25
Individual first name

INDUSTRY: Subscriber First Name

Required if valued on the request.

SITUATIONAL NM105 1037 **Name Middle** O AN 1/25
Individual middle name or initial

INDUSTRY: Subscriber Middle Name

Use if NM104 is valued and the middle name/initial of the subscriber is known.

NOT USED NM106 1038 **Name Prefix** O AN 1/10

SITUATIONAL NM107 1039 **Name Suffix** O AN 1/10
Suffix to individual name

INDUSTRY: Subscriber Name Suffix

Use this for the suffix of an individual's name; e.g., Sr., Jr., or III.

REQUIRED NM108 66 **Identification Code Qualifier** X ID 1/2
Code designating the system/method of code structure used for Identification Code (67)

SYNTAX: P0809

CODE	DEFINITION
------	------------

MI	Member Identification Number The code MI is intended to be the subscriber's identification number as assigned by the payer. Payers use different terminology to convey the same number. Use MI - Member Identification Number to convey the following terms: Insured's ID, Subscriber's ID, Health Insurance Claim Number (HIC), etc.
-----------	---

ZZ	Mutually Defined The value "ZZ", when used in this data element, shall be defined as "HIPAA Individual Identifier" once this identifier has been adopted. Under the Health Insurance Portability and Accountability Act of 1996, the Secretary of Health and Human Services must adopt a standard individual identifier for use in this transaction.
-----------	--

REQUIRED NM109 67 **Identification Code** X AN 2/80
Code identifying a party or other code

INDUSTRY: Subscriber Primary Identifier

ALIAS: Subscriber Member Number

SYNTAX: P0809

NOT USED NM110 706 **Entity Relationship Code** X ID 2/2

NOT USED	NM111	98	Entity Identifier Code	O	ID	2/3

IMPLEMENTATION

SUBSCRIBER SUPPLEMENTAL IDENTIFICATION

Loop: 2010C — SUBSCRIBER NAME

Usage: SITUATIONAL

Repeat: 9

- Notes:**
1. Use this segment when needed to provide a supplemental identifier for the subscriber. The primary identifier is the Member Identification Number in the NM1 segment.
 2. Health Insurance Claim (HIC) Number or Medicaid Recipient Identification Numbers are to be provided in the NM1 segment as a Member Identification Number when it is the primary number a UMO knows a member by (such as for Medicare or Medicaid). Do not use this segment for the Health Insurance Claim (HIC) Number or Medicaid Recipient Identification Number unless they are different from the Member Identification Number provided in the NM1 segment.
 3. If the requester valued this segment with the Patient Account Number (REF01 = "EJ") on the request, the UMO must return the same value in this segment on the response.

Example: REF*SY*123456789~

STANDARD

REF Reference Identification

Level: Detail

Position: 180

Loop: HL/NM1

Requirement: Optional

Max Use: 9

Purpose: To specify identifying information

Syntax: 1. R0203
At least one of REF02 or REF03 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification	M ID 2/3
			CODE	DEFINITION
			1L	Group or Policy Number Use this code only if you cannot determine if the number is a Group Number (6P) or a Policy Number (IG).
			1W	Member Identification Number Do not use if NM108 = MI.
			6P	Group Number
			A6	Employee Identification Number
			EJ	Patient Account Number
			F6	Health Insurance Claim (HIC) Number Use the NM1 (Subscriber Name) segment if the subscriber's HIC number is the primary identifier for his or her coverage. Use this code only in a REF segment when the payer has a different member number, and there also is a need to pass the dependent's HIC number. This might occur in a Medicare HMO situation.
			HJ	Identity Card Number Use this code when the Identity Card Number differs from the Member Identification Number. This is particularly prevalent in the Medicaid environment.
			IG	Insurance Policy Number
			N6	Plan Network Identification Number
			NQ	Medicaid Recipient Identification Number
			SY	Social Security Number Use this code only if the Social Security Number is not the primary identifier for the subscriber. The social security number may not be used for Medicare.
REQUIRED	REF02	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	X AN 1/30
			<i>INDUSTRY: Subscriber Supplemental Identifier</i>	
			SYNTAX: R0203	
NOT USED	REF03	352	Description	X AN 1/80
NOT USED	REF04	C040	REFERENCE IDENTIFIER	O

IMPLEMENTATION

SUBSCRIBER REQUEST VALIDATION

Loop: 2010C — SUBSCRIBER NAME

Usage: SITUATIONAL

Repeat: 9

Notes: 1. Required only if the request is not valid at this level.

Example: AAA*N**67~

STANDARD

AAA Request Validation

Level: Detail

Position: 230

Loop: HL/NM1

Requirement: Optional

Max Use: 9

Purpose: To specify the validity of the request and indicate follow-up action authorized

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES						
REQUIRED	AAA01	1073	Yes/No Condition or Response Code Code indicating a Yes or No condition or response <i>INDUSTRY: Valid Request Indicator</i> <i>SEMANTIC:</i> AAA01 designates whether the request is valid or invalid. Code "Y" indicates that the code is valid; code "N" indicates that the code is invalid.	M ID 1/1						
			<table border="1"> <thead> <tr> <th>CODE</th> <th>DEFINITION</th> </tr> </thead> <tbody> <tr> <td>N</td> <td>No</td> </tr> <tr> <td>Y</td> <td>Yes</td> </tr> </tbody> </table>	CODE	DEFINITION	N	No	Y	Yes	
CODE	DEFINITION									
N	No									
Y	Yes									
NOT USED	AAA02	559	Agency Qualifier Code	O ID 2/2						

SITUATIONAL AAA03 901 **Reject Reason Code** O ID 2/2

Code assigned by issuer to identify reason for rejection

Required if AAA01 = "N".

CODE	DEFINITION
15	Required application data missing Use when data is missing that is not covered by another Reject Reason Code. Use to indicate that there is not enough data to identify the subscriber.
58	Invalid/Missing Date-of-Birth
64	Invalid/Missing Patient ID
65	Invalid/Missing Patient Name
66	Invalid/Missing Patient Gender Code
67	Patient Not Found
68	Duplicate Patient ID Number
71	Patient Birth Date Does Not Match That for the Patient on the Database
72	Invalid/Missing Subscriber/Insured ID
73	Invalid/Missing Subscriber/Insured Name
74	Invalid/Missing Subscriber/Insured Gender Code
75	Subscriber/Insured Not Found
76	Duplicate Subscriber/Insured ID Number
77	Subscriber Found, Patient Not Found
78	Subscriber/Insured Not in Group/Plan Identified
79	Invalid Participant Identification Use for invalid/missing subscriber supplemental identifier.
95	Patient Not Eligible

SITUATIONAL AAA04 889 **Follow-up Action Code** O ID 1/1

Code identifying follow-up actions allowed

Required if AAA03 is present and indicates that the rejection is due to invalid or missing subscriber or patient data.

CODE	DEFINITION
C	Please Correct and Resubmit
N	Resubmission Not Allowed

IMPLEMENTATION

SUBSCRIBER DEMOGRAPHIC INFORMATION

Loop: 2010C — SUBSCRIBER NAME

Usage: SITUATIONAL

Repeat: 1

- Notes:
1. Use this segment to convey birth date or gender demographic information about the subscriber.
 2. Required if the information is available in the UMO's database unless a rejection response was generated and the elements were not valued on the request.

Example: DMG*D8*19580322*M~

STANDARD

DMG Demographic Information

Level: Detail

Position: 250

Loop: HL/NM1

Requirement: Optional

Max Use: 1

Purpose: To supply demographic information

Syntax: 1. P0102

If either DMG01 or DMG02 is present, then the other is required.

DIAGRAM

IMPLEMENTATION

DEPENDENT LEVEL

Loop: 2000D — DEPENDENT LEVEL Repeat: 1

Usage: SITUATIONAL

Repeat: 1

- Notes: 1. Use this hierarchical loop if it was used on the request.
2. Required segments in this loop are required only when this loop is used.

Example: HL*4*3*23*1~

STANDARD

HL Hierarchical Level

Level: Detail

Position: 010

Loop: HL Repeat: >1

Requirement: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure	M	ID	1/2
<p>COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.</p>						
			CODE	DEFINITION		
			23	Dependent		
REQUIRED	HL04	736	Hierarchical Child Code Code indicating if there are hierarchical child data segments subordinate to the level being described	O	ID	1/1
<p>COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.</p>						
			CODE	DEFINITION		
			1	Additional Subordinate HL Data Segment in This Hierarchical Structure.		

IMPLEMENTATION

DEPENDENT REQUEST VALIDATION

Loop: 2000D — DEPENDENT LEVEL

Usage: SITUATIONAL

Repeat: 9

- Notes:
1. Use this AAA segment to identify the reasons why a request could not be processed based on the contents of the HI Dependent Diagnosis Segment or the DTP date segments in Loop 2000D of the request.
 2. Required only if the request is not valid at this level.

Example: AAA*N**15*C~

STANDARD

AAA Request Validation

Level: Detail

Position: 030

Loop: HL

Requirement: Optional

Max Use: 9

Purpose: To specify the validity of the request and indicate follow-up action authorized

DIAGRAM

IMPLEMENTATION

DEPENDENT NAME

Loop: 2010D — DEPENDENT NAME Repeat: 1

Usage: REQUIRED

Repeat: 1

- Notes:
1. Use this segment to convey the name of the dependent who is the patient.
 2. NM108 and NM109 are situational on the response but Not Used on the request. This enables the UMO to return a unique member ID for the dependent that was not known to the requester at the time of the request. Normally, if the dependent has a unique member ID, Loop 2000D is not used.

Example: NM1*QC*1*SMITH*MARY~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 Repeat: >1

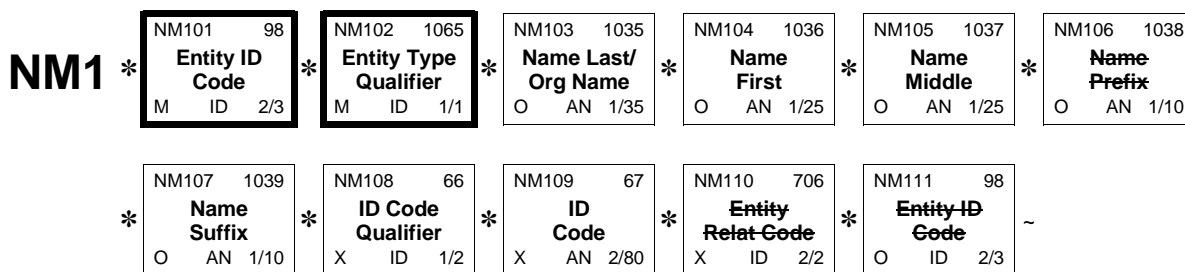

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

- Syntax:
1. **P0809**
If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
If NM111 is present, then NM110 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	NM101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, property or an individual	M ID 2/3
			QC Patient	
REQUIRED	NM102	1065	Entity Type Qualifier Code qualifying the type of entity SEMANTIC: NM102 qualifies NM103.	M ID 1/1
			1 Person	
SITUATIONAL	NM103	1035	Name Last or Organization Name Individual last name or organizational name <i>INDUSTRY: Dependent Last Name</i> Required if valued on the request.	O AN 1/35
SITUATIONAL	NM104	1036	Name First Individual first name <i>INDUSTRY: Dependent First Name</i> Required if valued on the request.	O AN 1/25
SITUATIONAL	NM105	1037	Name Middle Individual middle name or initial <i>INDUSTRY: Dependent Middle Name</i> Use if NM104 is valued and the middle name/initial of the dependent is known.	O AN 1/25
NOT USED	NM106	1038	Name Prefix	O AN 1/10
SITUATIONAL	NM107	1039	Name Suffix Suffix to individual name <i>INDUSTRY: Dependent Name Suffix</i> Use this for the suffix of an individual's name; e.g., Sr., Jr., or III.	O AN 1/10
SITUATIONAL	NM108	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67) SYNTAX: P0809	X ID 1/2
			MI Member Identification Number Use this code for the payer-assigned identifier for the dependent, even if the payer calls its number a policy number, recipient number, HIC number, or some other synonym.	

ZZ **Mutually Defined**
 The value “ZZ”, when used in this data element, shall be defined as “HIPAA Individual Identifier” once this identifier has been adopted. Under the Health Insurance Portability and Accountability Act of 1996, the Secretary of Health and Human Services must adopt a standard individual identifier for use in this transaction.

SITUATIONAL	NM109	67	Identification Code	X AN 2/80
--------------------	--------------	-----------	----------------------------	------------------

Code identifying a party or other code

INDUSTRY: Dependent Primary Identifier

ALIAS: Dependent Member Number

SYNTAX: P0809

Value only if the dependent has a unique member ID that is known by the UMO. Under most circumstances, this data element is not used.

NOT USED	NM110	706	Entity Relationship Code	X ID 2/2
-----------------	--------------	------------	---------------------------------	-----------------

NOT USED	NM111	98	Entity Identifier Code	O ID 2/3
-----------------	--------------	-----------	-------------------------------	-----------------

IMPLEMENTATION

DEPENDENT SUPPLEMENTAL IDENTIFICATION

- Loop:** 2010D — DEPENDENT NAME
Usage: SITUATIONAL
Repeat: 3
- Notes:**
1. Use this segment when necessary to provide supplemental identifiers for the dependent.
 2. If the requester valued this segment with the Patient Account Number (REF01 = “EJ”) on the request, the UMO must return the same value in this segment on the response.

Example: REF*SY*123456789~

STANDARD

REF Reference Identification

- Level:** Detail
Position: 180
Loop: HL/NM1
Requirement: Optional
Max Use: 9
Purpose: To specify identifying information
Syntax: 1. R0203
 At least one of REF02 or REF03 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification	M ID 2/3
			CODE	DEFINITION
			A6	Employee Identification Number
			EJ	Patient Account Number
			SY	Social Security Number The social security number may not be used for Medicare.

REQUIRED	REF02	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier <i>INDUSTRY: Dependent Supplemental Identifier</i> SYNTAX: R0203	X	AN	1/30

SITUATIONAL	INS17	1470	Number A generic number	O	N0	1/9

INDUSTRY: Birth Sequence Number

SEMANTIC: INS17 is the number assigned to each family member born with the same birth date. This number identifies birth sequence for multiple births allowing proper tracking and response of benefits for each dependent (i.e., twins, triplets, etc.).

This data element is not used unless the dependent is a child from a multiple birth.

IMPLEMENTATION

SERVICE PROVIDER LEVEL

Loop: 2000E — SERVICE PROVIDER LEVEL **Repeat:** >1
Usage: REQUIRED
Repeat: 1
Notes: 1. Loop 2000E identifies the specific person, group practice, facility, or specialty entity to provide services.

Example: HL*5*4*19*1~

STANDARD

HL Hierarchical Level

Level: Detail
Position: 010
Loop: HL **Repeat:** >1
Requirement: Mandatory
Max Use: 1
Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code	M ID 1/2
-----------------	-------------	------------	--------------------------------	-----------------

Code defining the characteristic of a level in a hierarchical structure

COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

19	Provider of Service
-----------	----------------------------

REQUIRED	HL04	736	Hierarchical Child Code	O ID 1/1
-----------------	-------------	------------	--------------------------------	-----------------

Code indicating if there are hierarchical child data segments subordinate to the level being described

COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

1	Additional Subordinate HL Data Segment in This Hierarchical Structure.
----------	---

IMPLEMENTATION

MESSAGE TEXT

Loop: 2000E — SERVICE PROVIDER LEVEL

Usage: SITUATIONAL

Repeat: 1

Advisory: Under most circumstances, this segment is not sent.

Notes: 1. The UMO can use this segment to transmit a message to the requester about the service provider or specialty requested.

Example: MSG*This is a free-form text message~

STANDARD

MSG Message Text

Level: Detail

Position: 160

Loop: HL

Requirement: Optional

Max Use: 1

Purpose: To provide a free-form format that allows the transmission of text information

Syntax: 1. **C0302**
If MSG03 is present, then MSG02 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	MSG01	933	Free-Form Message Text Free-form message text <i>INDUSTRY: Free Form Message Text</i>	M AN 1/264
NOT USED	MSG02	934	Printer Carriage Control Code	X ID 2/2
NOT USED	MSG03	1470	Number	O NO 1/9

IMPLEMENTATION

SERVICE PROVIDER NAME

Loop: 2010E — SERVICE PROVIDER NAME Repeat: 3

Usage: REQUIRED

Repeat: 1

- Notes:
1. Use this segment to convey the name and identification number of the service provider (person, group, or facility) or to identify the specialty entity.
 2. Use the maximum of three occurrences of Loop 2010E in a single Loop 2000E only when it is necessary to identify an individual provider within a specific group and facility when that provider and group provide services at multiple facilities.
 3. Do not use multiple occurrences of Loop 2010E within a single Loop 2000E to certify admission to a facility and a specialist or services at that facility. In this case, two occurrences of Loop 2000E are required as follows:

The admission certification must be expressed in a separate Loop 2000E where the facility is identified in Loop 2010E and Loop 2000F identifies admission review as the request category.

The specialist and services are expressed in a separate Loop 2000E where the specialist or specialty is identified in Loop 2010E and Loop 2000F identifies the services.

Example: NM1*SJ*1*WATSON*SUSAN*****34*987654321~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 170

Loop: HL/NM1 Repeat: >1

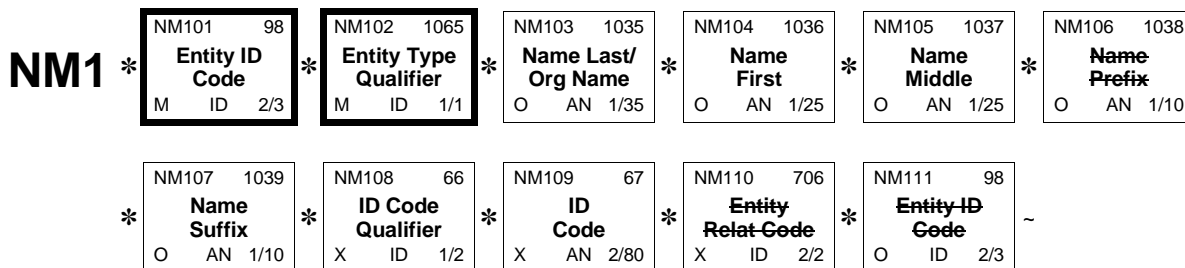

Requirement: Optional

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

- Syntax:
1. **P0809**
If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
If NM111 is present, then NM110 is required.

IMPLEMENTATION

SERVICE PROVIDER CONTACT INFORMATION

Loop: 2010E — SERVICE PROVIDER NAME

Usage: SITUATIONAL

Repeat: 1

- Notes:**
1. Use this segment to identify a contact name and/or communications number for the service provider.
 2. Use if available.
 3. When the communication number represents a telephone number in the United States and other countries using the North American Dialing Plan (for voice, data, fax, etc), the communication number should always include the area code and phone number using the format AAABBBCCCC. Where AAA is the area code, BBB is the telephone number prefix, and CCCC is the telephone number (e.g. (534)224-2525 would be represented as 5342242525). The extension, when applicable, should be included in the communication number immediately after the telephone number.
 4. By definition of the standard, if PER03 is used, PER04 is required.

Example: PER*IC*M TUCKER*TE*8189993456*FX*8188769304~

STANDARD

PER Administrative Communications Contact

Level: Detail

Position: 220

Loop: HL/NM1

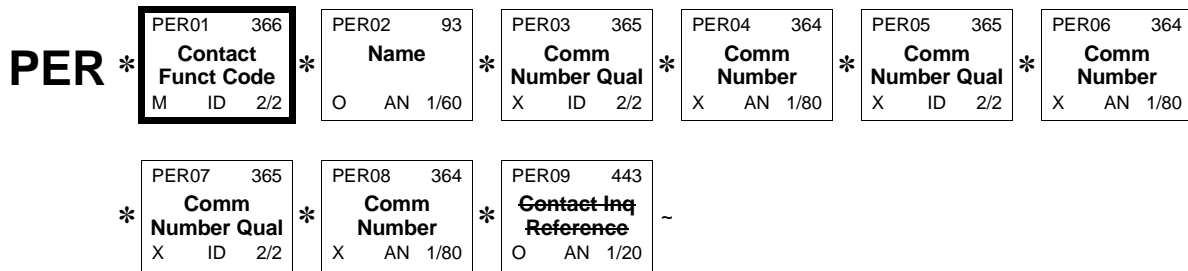

Requirement: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

- Syntax:**
1. **P0304**
If either PER03 or PER04 is present, then the other is required.
 2. **P0506**
If either PER05 or PER06 is present, then the other is required.
 3. **P0708**
If either PER07 or PER08 is present, then the other is required.

SERVICE LEVEL

Loop: 2000F — SERVICE LEVEL Repeat: >1
 Usage: REQUIRED
 Repeat: 1
 Notes: 1. Use this segment to identify the service(s) requested and convey the review outcome related to that service(s).

Example: HL*6*5*SS*0~

STANDARD

HL Hierarchical Level

Level: Detail
 Position: 010
 Loop: HL Repeat: >1
 Requirement: Mandatory
 Max Use: 1
 Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure COMMENT: HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.	M AN 1/12
REQUIRED	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to COMMENT: HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.	O AN 1/12

REQUIRED	HL03	735	Hierarchical Level Code	M ID 1/2
-----------------	-------------	------------	--------------------------------	-----------------

Code defining the characteristic of a level in a hierarchical structure

COMMENT: HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

SS	Services
-----------	-----------------

REQUIRED	HL04	736	Hierarchical Child Code	O ID 1/1
-----------------	-------------	------------	--------------------------------	-----------------

Code indicating if there are hierarchical child data segments subordinate to the level being described

COMMENT: HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

<u>CODE</u>	<u>DEFINITION</u>
-------------	-------------------

0	No Subordinate HL Segment in This Hierarchical Structure.
----------	--

IMPLEMENTATION

SERVICE TRACE NUMBER

Loop: 2000F — SERVICE LEVEL

Usage: SITUATIONAL

Repeat: 3

- Notes:**
1. Any trace numbers provided at this level on the request must be returned by the UMO at this level of the 278 response.
 2. The UMO can assign a trace number to this service response for tracking purposes.
 3. If the 278 request transaction passes through more than one clearinghouse, the second (and subsequent) clearinghouse may choose one of the following options:

If the second or subsequent clearinghouse needs to assign their own TRN segment they may replace the received TRN segment belonging to the sending clearinghouse with their own TRN segment. Upon returning a 278 response to the sending clearinghouse, they must remove their TRN segment and replace it with the sending clearinghouse's TRN segment.

If the second or subsequent clearinghouse does not need to assign their own TRN segment, they should merely pass all TRN segments received in the 278 request and pass all TRN segments received in the 278 response transaction.

4. If the 278 request passes through a clearinghouse that adds their own TRN in addition to a requester TRN, the clearinghouse will receive a response from the UMO containing two TRN segments that contain the value "2" (Referenced Transaction Trace Number) in TRN01. If the UMO has assigned a TRN, the UMO's TRN will contain the value "1" (Current Transaction Trace Number) in TRN01. If the clearinghouse chooses to pass their own TRN values to the requester, the clearinghouse must change the value in their TRN01 to "1" because, from the requester's perspective, this is not a referenced transaction trace number.

Example: TRN*2*111099*9012345678*RADIOLOGY~

STANDARD

TRN Trace

Level: Detail

Position: 020

Loop: HL

Requirement: Optional

Max Use: 9

Purpose: To uniquely identify a transaction to an application

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	TRN01	481	Trace Type Code Code identifying which transaction is being referenced	M ID 1/2
			CODE	DEFINITION
			1	Current Transaction Trace Numbers The term "Current Transaction Trace Number" refers to the trace number assigned by the creator of the 278 response transaction (the UMO).
			2	Referenced Transaction Trace Numbers The term "Referenced Transaction Trace Number" refers to the trace number originally sent in the 278 request transaction.
REQUIRED	TRN02	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	M AN 1/30
			<i>INDUSTRY: Service Trace Number</i>	
			<i>SEMANTIC: TRN02 provides unique identification for the transaction.</i>	
REQUIRED	TRN03	509	Originating Company Identifier A unique identifier designating the company initiating the funds transfer instructions. The first character is one-digit ANSI identification code designation (ICD) followed by the nine-digit identification number which may be an IRS employer identification number (EIN), data universal numbering system (DUNS), or a user assigned number; the ICD for an EIN is 1, DUNS is 3, user assigned number is 9	O AN 10/10
			<i>INDUSTRY: Trace Assigning Entity Identifier</i>	
			<i>SEMANTIC: TRN03 identifies an organization.</i>	
			Use this element to identify the organization that assigned this trace number. If TRN01 is "2", this is the value received in the original 278 request transaction. If TRN01 is "1", use this information to identify the UMO organization that assigned this trace number.	
			The first position must be either a "1" if an EIN is used, a "3" if a DUNS is used or a "9" if a user assigned identifier is used.	

SITUATIONAL

TRN04

127

Reference Identification

O AN 1/30

Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

INDUSTRY: Trace Assigning Entity Additional Identifier

SEMANTIC: TRN04 identifies a further subdivision within the organization.

Use this information if necessary to further identify a specific component, such as a specific division or group, of the company identified in the previous data element (TRN03).

IMPLEMENTATION

**HEALTH CARE SERVICE LOCATION
INFORMATION**

O

To provide information that identifies the place of service or the type of bill related to the location at which a health care service was rendered

Required if the service provider's facility type is known by the UMO. If UM03 is present and specifies a service type that is qualified by a facility type, e.g.: UM03 = A2 for Professional (Physician) Visit - Skilled Nursing Facility, value this field with the corresponding facility code value from the code source required on the claim.

REQUIRED UM04 - 1 1331 **Facility Code Value** M AN 1/2
Code identifying the type of facility where services were performed; the first and second positions of the Uniform Bill Type code or the Place of Service code from the Electronic Media Claims National Standard Format

INDUSTRY: Facility Type Code

Use to indicate a facility code value from the code source referenced in UM04-2.

REQUIRED UM04 - 2 1332 **Facility Code Qualifier** O ID 1/2
Code identifying the type of facility referenced

CODE	DEFINITION
------	------------

A	Uniform Billing Claim Form Bill Type
----------	---

CODE SOURCE 236: Uniform Billing Claim Form Bill Type

B	Place of service code from the FAO record of the Electronic Media Claims National Standard Format
----------	--

CODE SOURCE 237: Place of Service from Health Care Financing Administration Claim Form

NOT USED UM04 - 3 1325 **Claim Frequency Type Code** O ID 1/1
CODE SOURCE 235: Claim Frequency Type Code

NOT USED UM05 C024 **RELATED CAUSES INFORMATION** O

SITUATIONAL UM06 1338 **Level of Service Code** O ID 1/3
Code specifying the level of service rendered

Required if used by the UMO in rendering a decision.

CODE	DEFINITION
------	------------

03	Emergency
-----------	------------------

U	Urgent
----------	---------------

NOT USED UM07 1213 **Current Health Condition Code** O ID 1/1

NOT USED UM08 923 **Prognosis Code** O ID 1/1

NOT USED UM09 1363 **Release of Information Code** O ID 1/1

NOT USED UM10 1514 **Delay Reason Code** O ID 1/2

IMPLEMENTATION

HEALTH CARE SERVICES REVIEW

- Loop:** 2000F — SERVICE LEVEL
Usage: SITUATIONAL
Repeat: 1
- Notes:**
1. Use this segment to provide review outcome information and an associated reference number.
 2. Required if the UMO has reviewed the request. If the UMO was unable to review the request due to missing or invalid application data at this level, the UMO must return a 278 response containing a AAA segment at this level.
 3. If Loop 2000F is present, either the AAA segment or the HCR segment must be returned.

Example: HCR*A1*19950713~

STANDARD

HCR Health Care Services Review

Level: Detail
Position: 050
Loop: HL
Requirement: Optional
Max Use: 1
Purpose: To specify the outcome of a health care services review

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Revision level of a particular format, program, technique or algorithm

INDUSTRY: Version, Release, or Industry Identifier

Required if the code list referenced in HI12-1 has a version identifier. Otherwise Not Used.

IMPLEMENTATION

HEALTH CARE SERVICES DELIVERY

Loop: 2000F — SERVICE LEVEL

Usage: SITUATIONAL

Repeat: 1

- Notes:**
1. Required if the UMO authorizes services (other than spinal manipulation services) that have a specific pattern of delivery. For spinal manipulation services, use the CR2 segment.
 2. An explanation of the uses of this segment follows.

HSD01 qualifies HSD02: If the value in HSD02=1 and the value in HSD01=VS (Visits), this means “one visit”.

Between HSD02 and HSD03 verbally insert a “per every”.

HSD03 qualifies HSD04: If the value in HSD04=3 and the value in HSD03=DA (Day), this means “three days”. Between HSD04 and HSD05 verbally insert a “for”. HSD05 qualifies HSD06: If the value in HSD06=21 and the value in HSD05=7 (Days), this means “21 days”.

The total message reads:

HSD*VS*1*DA*3*7*21~ = “One visit per every three days for 21 days”.

Another similar data string of HSD*VS*2*DA*4*7*20~ = “Two visits per every four days for 20 days”.

An alternate way to use HSD is to employ HSD07 and/or HSD08. A data string of HSD*VS*1*****SX*D~ means “1 visit on Wednesday and Thursday morning”.

Example: HSD*VS*1*DA*1*7*10~ (This indicates “1 visit every (per) 1 day (daily) for 10 days”.)

HSD*VS*1*DA***W~ (This indicates “1 visit per day whenever necessary”.)

STANDARD

HSD Health Care Services Delivery

Level: Detail

Position: 090

Loop: HL

Requirement: Optional

Max Use: 1

Purpose: To specify the delivery pattern of health care services

- Syntax:**
1. **P0102**
If either HSD01 or HSD02 is present, then the other is required.
 2. **C0605**
If HSD06 is present, then HSD05 is required.

STANDARD

SE Transaction Set Trailer

Level: Detail
Position: 280
Loop: _____
Requirement: Mandatory
Max Use: 1
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments)

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	SE01	96	Number of Included Segments	M NO 1/10
			Total number of segments included in a transaction set including ST and SE segments	
			<i>INDUSTRY: Transaction Segment Count</i>	
REQUIRED	SE02	329	Transaction Set Control Number	M AN 4/9
			Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	

The Transaction Set Control Numbers in ST02 and SE02 must be identical. The number is assigned by the originator and must be unique within a functional group (GS-GE). For example, start with the number 0001 and increment from there. The number also aids in error resolution research.

4 EDI Transmission Examples for Different Business Uses

4.1 Business Scenario 1

This is an example of a standard Referral Request / Response sequence between a Primary Care Provider and a Utilization Management Organization. The example will show how a PCP can request a referral to a specialist for a patient from a UMO. The example will also show the response.

Joe Smith is a subscriber to Maryland Capital Insurance Company. During a regular physical, Dr. James Gardener, Joe's primary care physician, diagnoses a potential heart problem. Dr. Gardener determines that it would be best to refer Joe to Dr. Susan Watson, a cardiologist, for a consultation.

Dr. Gardener is required by Maryland Capital Insurance to submit a request for review seeking approval to refer Joe to Dr. Watson.

After review, Maryland Capital approves the referral and responds.

4.1.1 Request for Review

The following example represents the Request for Review (Specialty Care Referral) from Dr. Gardener to Maryland Capital Insurance.

- Table 1

ST*278*0001~ Begin transaction set 278, control #0001.

**BHT*0078*13*A12345*19980
908*1101~** This transaction is a request using hierarchical structure 0078 (information source, information receiver, subscriber, dependent, provider of services, services). The originating system has assigned the Submitter Transaction Identifier "A12345" along with the transaction set creation date and time.

- Loop 2000A hierarchical level identifies the Insurance Company.

HL*120*1~** HL count is 1. There is no higher, or parent, HL. This HL code is 20, identifying the information source or the insurance company. This HL has subordinate levels, or children.

**NM1*X3*2*Maryland
Capital Insurance
Company****
*46*789312~** The request for a referral is being made to Maryland Capital Insurance Company. Their electronic transmitter identification number is 789312.

- Loop 2000B hierarchical level identifies the submitting provider.

HL*2*1*21*1~

HL count is 2. This HL is subordinate to HL*1, the parent HL. This HL code is 21, identifying the information receiver or the referring provider. This HL has subordinate levels, or children.

NM1*1P*1*Gardener*
James****46*
8189991234~

The request is being made by James Gardener whose Electronic Transmitter Identification Number is 8189991234.

-
- Loop 2000C hierarchical level identifies the subscriber, who in this case is also the patient.

HL*3*2*22*1~

HL count is 3. This HL is subordinate to HL*2, the parent HL. This HL code is 22, identifying the subscriber. This HL has subordinate levels, or children.

HI*BF:41090:D8:19980908*
1101~

The patient has been diagnosed with acute myocardial infarction; unspecified site. Dr. Gardener made this diagnosis on September 8, 1998.

NM1*IL*1*Smith*Joe***
*MI*12345678901~

The patient's name is Joe Smith; his Member Identification Number is 12345678901.

-
- Loop 2000D hierarchical level identifies the dependent as a patient. Because there is no dependent in this example, there is no Loop 2000D.

-
- Loop 2000E hierarchical level identifies the service provider. Loop 2000E repeats for each service provider.

HL*4*3*19*1~

HL count is 4. This HL is subordinate to HL*3, the parent HL. This HL code is 19, identifying the service provider. This HL has subordinate levels, or children.

NM1*SJ*1*Watson*Susan*
***34*987654321~

The service provider is identified as Susan Watson. Her Social Security Number is 987654321.

PER*IC**TE*4029993456~

Dr. Watson can be contacted by telephone at (402)999-3456.

-
- Loop 2000F hierarchical level identifies the services. Loop 2000F repeats for each service.

HL*5*4*SS*0~

HL count is 5. This HL is subordinate to HL*4, the parent HL. This HL code is SS, identifying the service. This HL has no subordinate levels, or children.

TRN*1*111099*9012345678~

The provider assigned the trace number 111099 to this service request.

UM*SC*I*3*11:B*****Y~	Dr. Gardener is requesting an initial consultation for the patient with Dr. Watson at Dr. Watson's office.
HSD*VS*1~	Dr. Gardener is requesting a single visit.
SE*17*0001~	Number of segments, control number.

4.1.2 Response to the Request for Review

The following example represents the response to a request for review from Maryland Capital Insurance to Dr. Gardener.

In this case Maryland Capital Insurance has approved the referral request with no modifications.

Notice that the response transaction includes the detail of the request transaction to insure for all parties exactly what is being approved. Notice that the insurance company has included a certification number for reference, AUTH0001. Also note the use of the DTP segment to specify the time period during which the referral is valid and the service is to be performed.

- Table 1

ST*278*0001~	Begin transaction set 278, control #0001.
---------------------	---

BHT*0078*11*A12345*19980 908*1102*18~	This transaction is a response using hierarchical structure 0078 (information source, information receiver, subscriber, dependent, provider of services, services). The UMO's system returns the Submitter Transaction Identifier "A12345. The BHT06 value of "18" indicates that this is a response with no further updates to follow.
--	---

- Loop 2000A hierarchical level identifies the Insurance Company.

HL*1**20*1~	HL count is 1. There is no higher, or parent, HL. This HL code is 20, identifying the information source or the insurance company. This HL has subordinate levels, or children.
--------------------	---

NM1*X3*2*Maryland Capital Insurance Company*****46* 789312~	The response to the request for a referral is being made by Maryland Capital Insurance Company. Their electronic transmitter identification number is 789312.
--	---

- Loop 2000B hierarchical level identifies the submitting provider.

HL*2*1*21*1~	HL count is 2. This HL is subordinate to HL*1, the parent HL. This HL code is 21, identifying the information receiver or the referring provider. This HL has subordinate levels, or children.

HCR*A1*AUTH0001~

Maryland Capital approves the referral and provides a certification number.

HSD*VS*1~

Dr. Gardener is requesting a single visit.

SE*19*0001~

Number of segments, control number.

4.2 Business Scenario 2

This is an example of a health services review request/response sequence between a specialist provider and a utilization management organization. The example shows how a specialist can request hospitalization for a patient from a UMO. The example also shows the UMO's response.

Joe Smith is a subscriber to Maryland Capital Insurance Company. During a regular physical, Dr. James Gardener, Joe's primary care physician, diagnosed a potential heart problem, acute myocardial infarction; unspecified site. Dr. Gardener had referred Joe to Dr. Susan Watson, a cardiologist for a consultation (see Business Scenario 1).

During the consultation examination, Dr. Watson determines that Joe's diagnosis requires hospitalization and a surgical procedure, a triple bypass venous graft. The operation and recovery is to be at Montgomery Hospital.

Dr. Gardener is required by Maryland Capital Insurance to submit a request for review seeking approval to perform the surgery at the hospital.

After review, Maryland Capital approves the referral and responds.

4.2.1 Request for Review

The following example represents the request for review (Health Services Review) from Dr. Watson to Maryland Capital Insurance.

- Table 1

ST*278*0001~

Begin transaction set 278, control #0001.

BHT*0078*13*B56789*19980
915*1430~

This transaction is a request using hierarchical structure 0078 (information source, information receiver, subscriber, dependent, provider of services, services). The originating system has assigned the Submitter Transaction Identifier "B56789" along with the transaction set creation date and time.

- Loop 2000A hierarchical level identifies the insurance company.

HL*1**20*1~

HL count is 1. There is no higher, or parent, HL. This HL code is 20, identifying the information source or the insurance company. This HL has subordinate levels, or children.

NM1*X3*2*Maryland Capital Insurance Company*****46* 789312~	The request for a health service review and an admission review is being made to Maryland Capital Insurance Company. Their electronic transmitter identification number is 789312.
--	--

- Loop 2000B hierarchical level identifies the submitting provider.

HL*2*1*21*1~	HL count is 2. This HL is subordinate to HL*1, the parent HL. This HL code is 21, identifying the information receiver or the referring provider. This HL has subordinate levels, or children.
---------------------	--

PER*IC**TE*6107771212~	Montgomery Hospital telephone number
<hr/> <ul style="list-style-type: none"> • Loop 2000F hierarchical level identifies the services. Loop 2000F repeats for each service to be performed at Montgomery Hospital. 	
HL*7*6*SS*0~	HL count is 7. This HL is subordinate to HL*6, the parent HL. This HL code is SS, identifying the service. This HL has no subordinate levels, or children.
TRN*1*97021002*998765432 1~	The provider assigned the trace number 97021002 to this service request.
UM*AR*I*2*21:B*****Y~	Dr. Watson is requesting an admission review for initial surgery for the patient at an inpatient hospital setting.
DTP*435*D8:19980923~	Dr. Watson requests an admission date of September 23, 1998.
HSD*DY*7~	Dr. Watson has requested certification for a length of stay of seven days.
CL1*2~	Dr. Watson indicates that the inpatient admission type is "urgent".
SE*29*0001~	Number of segments, control number.

4.2.2 Response to the Request for Review

The following example represents the response to a request for review (health services review and hospital admission) from Maryland Capital Insurance to Dr. Watson.

In this case Maryland Capital Insurance is approving the request for surgery but partially approving the request for inpatient confinement.

Notice that the response transaction includes the detail of the request transaction to insure for all parties exactly what is being approved. Notice that the insurance company has included a certification number for reference, AUTH0002, for both services. The insurance company has the option of treating this as either one or two certifications.

-
- Table 1

ST*278*0001~

Begin transaction set 278, control #0001.

**BHT*0078*11*B56789*
19980915*1431*18~**

This transaction is a response using hierarchical structure 0078 (information source, information receiver, subscriber, dependent, provider of services, services). The UMO's system returns the Submitter Transaction Identifier "B56789". The BHT06 value of "18" indicates that this is a response with no further updates to follow.

-
- Loop 2000A hierarchical level identifies the insurance company.

HL*120*1~**

HL count is 1. There is no higher, or parent, HL. This HL code is 20, identifying the information source or the insurance company. This HL has subordinate levels, or children.

**NM1*X3*2*Maryland
Capital Insurance
Company*****46*
789312~**

The response to the request for admission review and health services review is being made by Maryland Capital Insurance Company. Their electronic transmitter identification number is 789312.

-
- Loop 2000B hierarchical level identifies the submitting provider.

HL*2*1*21*1~

HL count is 2. This HL is subordinate to HL*1, the parent HL. This HL code is 21, identifying the information receiver or the referring provider. This HL has subordinate levels, or children.

PER*IC**TE*6107771212~	Montgomery Hospital telephone number
<hr/>	
• Loop 2000F hierarchical level identifies the services. Loop 2000F repeats for each service to be performed at Montgomery Hospital.	
HL*7*6*SS*0~	HL count is 7. This HL is subordinate to HL*6, the parent HL. This HL code is SS, identifying the service. This HL has no subordinate levels, or children.
TRN*2*97021001*998765432 1~	The UMO must return the trace number assigned by the provider to aid the provider in linking this service response to the original service request.
UM*AR*I*2*21:B~	Dr. Watson is requesting an admission review for initial surgery for the patient at an inpatient hospital setting.
HCR*A6*AUTH0002~	Maryland Capital has approved the inpatient stay but has approved a modification from the initial request.
DTP*435*D8*19980923~	Maryland Capital has approved the admission date of September 23, 1998.
HSD*DY*5~	Dr. Watson requested certification for a length of stay of seven days. The UMO has certified a length of stay of five days.
SE*30*0001~	Number of segments, control number. Note: The CL1 segment is returned on the response only if it was valued on the request and modified by the UMO.

A ASC X12 Nomenclature

A.1 Interchange and Application Control Structures

A.1.1 Interchange Control Structure

The transmission of data proceeds according to very strict format rules to ensure the integrity and maintain the efficiency of the interchange. Each business grouping of data is called a transaction set. For instance, a group of benefit enrollments sent from a sponsor to a payer is considered a transaction set.

Each transaction set contains groups of logically related data in units called segments. For instance, the N4 segment used in the transaction set conveys the city, state, ZIP Code, and other geographic information. A transaction set contains multiple segments, so the addresses of the different parties, for example, can be conveyed from one computer to the other. An analogy would be that the transaction set is like a freight train; the segments are like the train's cars; and each segment can contain several data elements the same as a train car can hold multiple crates.

The sequence of the elements within one segment is specified by the ASC X12 standard as well as the sequence of segments in the transaction set. In a more conventional computing environment, the segments would be equivalent to records, and the elements equivalent to fields.

Similar transaction sets, called "functional groups," can be sent together within a transmission. Each functional group is prefaced by a group start segment; and a functional group is terminated by a group end segment. One or more functional groups are prefaced by an interchange header and followed by an interchange trailer. Figure A1, Transmission Control Schematic, illustrates this interchange control.

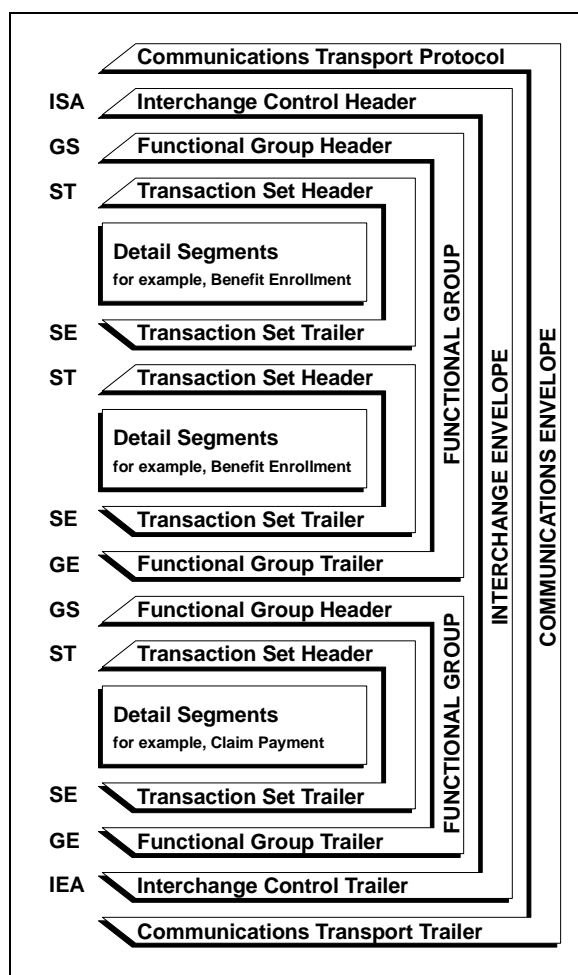

Figure A1. Transmission Control Schematic

The interchange header and trailer segments envelop one or more functional groups or interchange-related control segments and perform the following functions:

1. Define the data element separators and the data segment terminator.
2. Identify the sender and receiver.
3. Provide control information for the interchange.
4. Allow for authorization and security information.

A.1.2 Application Control Structure Definitions and Concepts

A.1.2.1 Basic Structure

A data element corresponds to a data field in data processing terminology. The data element is the smallest named item in the ASC X12 standard. A data segment corresponds to a record in data processing terminology. The data segment begins with a segment ID and contains related data elements. A control segment has the same structure as a data segment; the distinction is in the use. The data segment is used primarily to convey user information, but the control segment is used primarily to convey control information and to group data segments.

A.1.2.2 Basic Character Set

The section that follows is designed to have representation in the common character code schemes of EBCDIC, ASCII, and CCITT International Alphabet 5. The ASC X12 standards are graphic-character-oriented; therefore, common character encoding schemes other than those specified herein may be used as long as a common mapping is available. Because the graphic characters have an implied mapping across character code schemes, those bit patterns are not provided here.

The basic character set of this standard, shown in figure A2, Basic Character Set, includes those selected from the uppercase letters, digits, space, and special characters as specified below.

A...Z	0...9	!	“	&	'	()	*	+
,	-	.	/	:	;	?	=	" " (space)	

Figure A2. Basic Character Set

A.1.2.3 Extended Character Set

An extended character set may be used by negotiation between the two parties and includes the lowercase letters and other special characters as specified in figure A3, Extended Character Set.

a..z	%	~	@	[]	_	{
}	\		<	>	#	\$	

Figure A3. Extended Character Set

Note that the extended characters include several character codes that have multiple graphical representations for a specific bit pattern. The complete list appears

in other standards such as CCITT S.5. Use of the USA graphics for these codes presents no problem unless data is exchanged with an international partner. Other problems, such as the translation of item descriptions from English to French, arise when exchanging data with an international partner, but minimizing the use of codes with multiple graphics eliminates one of the more obvious problems.

A.1.2.4 Control Characters

Two control character groups are specified; they have only restricted usage. The common notation for these groups is also provided, together with the character coding in three common alphabets. In the matrix A1, Base Control Set, the column IA5 represents CCITT V.3 International Alphabet 5.

A.1.2.5 Base Control Set

The base control set includes those characters that will not have a disruptive effect on most communication protocols. These are represented by:

<u>NOTATION</u>	<u>NAME</u>	<u>EBCDIC</u>	<u>ASCII</u>	<u>IA5</u>
BEL	bell	2F	07	07
HT	horizontal tab	05	09	09
LF	line feed	25	0A	0A
VT	vertical tab	0B	0B	0B
FF	form feed	0C	0C	0C
CR	carriage return	0D	0D	0D
FS	file separator	1C	1C	1C
GS	group separator	1D	1D	1D
RS	record separator	1E	1E	1E
US	unit separator	1F	1F	1F
NL	new line	15		

Matrix A1. Base Control Set

The Group Separator (GS) may be an exception in this set because it is used in the 3780 communications protocol to indicate blank space compression.

A.1.2.6 Extended Control Set

The extended control set includes those that may have an effect on a transmission system. These are shown in matrix A2, Extended Control Set.

<u>NOTATION</u>	<u>NAME</u>	<u>EBCDIC</u>	<u>ASCII</u>	<u>IA5</u>
SOH	start of header	01	01	01
STX	start of text	02	02	02
ETX	end of text	03	03	03
EOT	end of transmission	37	04	04
ENQ	enquiry	2D	05	05
ACK	acknowledge	2E	06	06
DC1	device control 1	11	11	11
DC2	device control 2	12	12	12
DC3	device control 3	13	13	13
DC4	device control 4	3C	14	14
NAK	negative acknowledge	3D	15	15
SYN	synchronous idle	32	16	16
ETB	end of block	26	17	17

Matrix A2. Extended Control Set

A.1.2.7

Delimiters

A delimiter is a character used to separate two data elements (or subelements) or to terminate a segment. The delimiters are an integral part of the data.

Delimiters are specified in the interchange header segment, ISA. The ISA segment is a 105 byte fixed length record. The data element separator is byte number 4; the component element separator is byte number 105; and the segment terminator is the byte that immediately follows the component element separator.

Once specified in the interchange header, the delimiters are not to be used in a data element value elsewhere in the interchange. For consistency, this implementation guide uses the delimiters shown in matrix A3, Delimiters, in all examples of EDI transmissions.

<u>CHARACTER</u>	<u>NAME</u>	<u>DELIMITER</u>
*	Asterisk	Data Element Separator
:	Colon	Subelement Separator
~	Tilde	Segment Terminator

Matrix A3. Delimiters

The delimiters above are for illustration purposes only and are not specific recommendations or requirements. Users of this implementation guide should be aware that an application system may use some valid delimiter characters within the application data. Occurrences of delimiter characters in transmitted data within a data element can result in errors in translation programs. The existence of asterisks (*) within transmitted application data is a known issue that can affect translation software.

A.1.3

Business Transaction Structure Definitions and Concepts

The ASC X12 standards define commonly used business transactions (such as a health care claim) in a formal structure called “transaction sets.” A transaction set is composed of a transaction set header control segment, one or more data segments, and a transaction set trailer control segment. Each segment is composed of the following:

- A unique segment ID
- One or more logically related data elements each preceded by a data element separator
- A segment terminator

A.1.3.1

Data Element

The data element is the smallest named unit of information in the ASC X12 standard. Data elements are identified as either simple or component. A data element that occurs as an ordinal member of a composite data structure is identified as a component data element. A data element that occurs in a segment outside the defined boundaries of a composite data structure is identified as a simple data element. The distinction between simple and component data elements is strictly a matter of context because a data element can be used in either capacity.

Data elements are assigned a unique reference number. Each data element has a name, description, type, minimum length, and maximum length. For ID type data elements, this guide provides the applicable ASC X12 code values and their descriptions or references where the valid code list can be obtained.

Each data element is assigned a minimum and maximum length. The length of the data element value is the number of character positions used except as noted for numeric, decimal, and binary elements.

The data element types shown in matrix A4, Data Element Types, appear in this implementation guide.

SYMBOL	TYPE
Nn	Numeric
R	Decimal
ID	Identifier
AN	String
DT	Date
TM	Time
B	Binary

Matrix A4. Data Element Types

A.1.3.1.1

Numeric

A numeric data element is represented by one or more digits with an optional leading sign representing a value in the normal base of 10. The value of a numeric data element includes an implied decimal point. It is used when the position of the decimal point within the data is permanently fixed and is not to be transmitted with the data.

This set of guides denotes the number of implied decimal positions. The representation for this data element type is “Nn” where N indicates that it is numeric and n indicates the number of decimal positions to the right of the implied decimal point.

If n is 0, it need not appear in the specification; N is equivalent to N0. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) should not be transmitted.

EXAMPLE

A transmitted value of 1234, when specified as numeric type N2, represents a value of 12.34.

Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. The length of a numeric type data element does not include the optional sign.

A.1.3.1.2

Decimal

A decimal data element may contain an explicit decimal point and is used for numeric values that have a varying number of decimal positions. This data element type is represented as “R.”

The decimal point always appears in the character stream if the decimal point is at any place other than the right end. If the value is an integer (decimal point at the right end) the decimal point should be omitted. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) should not be transmitted.

Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point should be suppressed unless necessary to indicate precision. The use of triad separators (for example, the commas in 1,000,000) is expressly prohibited. The length of a decimal type data element does not include the optional leading sign or decimal point.

EXAMPLE

A transmitted value of 12.34 represents a decimal value of 12.34.

A.1.3.1.3

Identifier

An identifier data element always contains a value from a predefined list of codes that is maintained by the ASC X12 Committee or some other body recognized by the Committee. Trailing spaces should be suppressed unless they are necessary to satisfy a minimum length. An identifier is always left justified. The representation for this data element type is "ID."

A.1.3.1.4

String

A string data element is a sequence of any characters from the basic or extended character sets. The significant characters shall be left justified. Leading spaces, when they occur, are presumed to be significant characters. Trailing spaces should be suppressed unless they are necessary to satisfy a minimum length. The representation for this data element type is "AN."

A.1.3.1.5

Date

A date data element is used to express the standard date in either YYMMDD or CCYYMMDD format in which CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01 to 12), and DD is the day in the month (01 to 31). The representation for this data element type is "DT." Users of this guide should note that all dates within transactions are 8-character dates (millenium compliant) in the format CCYYMMDD. The only date data element that is in format YYMMDD is the Interchange Date data element in the ISA segment, and also used in the TA1 Interchange Acknowledgment, where the century can be readily interpolated because of the nature of an interchange header.

A.1.3.1.6

Time

A time data element is used to express the ISO standard time HHMMSSd..d format in which HH is the hour for a 24 hour clock (00 to 23), MM is the minute (00 to 59), SS is the second (00 to 59) and d..d is decimal seconds. The representation for this data element type is "TM." The length of the data element determines the format of the transmitted time.

EXAMPLE

Transmitted data elements of four characters denote HHMM. Transmitted data elements of six characters denote HHMMSS.

A.1.3.2

Composite Data Structure

The composite data structure is an intermediate unit of information in a segment. Composite data structures are composed of one or more logically related simple data elements, each, except the last, followed by a sub-element separator. The final data element is followed by the next data element separator or the segment terminator. Each simple data element within a composite is called a component.

Each composite data structure has a unique four-character identifier, a name, and a purpose. The identifier serves as a label for the composite. A composite data structure can be further defined through the use of syntax notes, semantic notes, and comments. Each component within the composite is further characterized by a reference designator and a condition designator. The reference designators and the condition designators are described below.

A.1.3.3 Data Segment

The data segment is an intermediate unit of information in a transaction set. In the data stream, a data segment consists of a segment identifier, one or more composite data structures or simple data elements each preceded by a data element separator and succeeded by a segment terminator.

Each data segment has a unique two- or three-character identifier, a name, and a purpose. The identifier serves as a label for the data segment. A segment can be further defined through the use of syntax notes, semantic notes, and comments. Each simple data element or composite data structure within the segment is further characterized by a reference designator and a condition designator.

A.1.3.4 Syntax Notes

Syntax notes describe relational conditions among two or more data segment units within the same segment, or among two or more component data elements within the same composite data structure. For a complete description of the relational conditions, See A.1.3.8, Condition Designator.

A.1.3.5 Semantic Notes

Simple data elements or composite data structures may be referenced by a semantic note within a particular segment. A semantic note provides important additional information regarding the intended meaning of a designated data element, particularly a generic type, in the context of its use within a specific data segment. Semantic notes may also define a relational condition among data elements in a segment based on the presence of a specific value (or one of a set of values) in one of the data elements.

A.1.3.6 Comments

A segment comment provides additional information regarding the intended use of the segment.

A.1.3.7 Reference Designator

Each simple data element or composite data structure in a segment is provided a structured code that indicates the segment in which it is used and the sequential position within the segment. The code is composed of the segment identifier followed by a two-digit number that defines the position of the simple data element or composite data structure in that segment.

For purposes of creating reference designators, the composite data structure is viewed as the hierarchical equal of the simple data element. Each component data element in a composite data structure is identified by a suffix appended to the reference designator for the composite data structure of which it is a member.

This suffix is a two-digit number, prefixed with a hyphen, that defines the position of the component data element in the composite data structure.

EXAMPLE

- The first simple element of the CLP segment would be identified as CLP01.
- The first position in the SVC segment is occupied by a composite data structure that contains seven component data elements, the reference designator for the second component data element would be SVC01-02.

A.1.3.8 Condition Designator

This section provides information about X12 standard conditions designators. It is provided so that users will have information about the general standard. Implementation guides may impose other conditions designators. See implementation guide section 3.1 Presentation Examples for detailed information about the implementation guide Industry Usage requirements for compliant implementation.

Data element conditions are of three types: mandatory, optional, and relational. They define the circumstances under which a data element may be required to be present or not present in a particular segment.

DESIGNATOR	DESCRIPTION
M- Mandatory	The designation of mandatory is absolute in the sense that there is no dependency on other data elements. This designation may apply to either simple data elements or composite data structures. If the designation applies to a composite data structure, then at least one value of a component data element in that composite data structure shall be included in the data segment.
O- Optional	The designation of optional means that there is no requirement for a simple data element or composite data structure to be present in the segment. The presence of a value for a simple data element or the presence of value for any of the component data elements of a composite data structure is at the option of the sender.
X- Relational	Relational conditions may exist among two or more simple data elements within the same data segment based on the presence or absence of one of those data elements (presence means a data element must not be empty). Relational conditions are specified by a condition code (see table below) and the reference designators of the affected data elements. A data element may be subject to more than one relational condition. The definitions for each of the condition codes used within syntax notes are detailed below:

CONDITION CODE	DEFINITION
P- Paired or Multiple	If any element specified in the relational condition is present, then all of the elements specified must be present.
R- Required	At least one of the elements specified in the condition must be present.
E- Exclusion	Not more than one of the elements specified in the condition may be present.
C- Conditional	If the first element specified in the condition is present, then all other elements must be present. However, any or all of the elements not specified as the first element in the condition may appear without requiring that the first element be present. The order of the elements in the condition does not have to be the same as the order of the data elements in the data segment.
L- List	

Conditional If the first element specified in the condition is present, then at least one of the remaining elements must be present. However, any or all of the elements not specified as the first element in the condition may appear without requiring that the first element be present. The order of the elements in the condition does not have to be the same as the order of the data elements in the data segment.

Table A5. Condition Designator

A.1.3.9 Absence of Data

Any simple data element that is indicated as mandatory must not be empty if the segment is used. At least one component data element of a composite data structure that is indicated as mandatory must not be empty if the segment is used. Optional simple data elements and/or composite data structures and their preceding data element separators that are not needed should be omitted if they occur at the end of a segment. If they do not occur at the end of the segment, the simple data element values and/or composite data structure values may be omitted. Their absence is indicated by the occurrence of their preceding data element separators, in order to maintain the element's or structure's position as defined in the data segment.

Likewise, when additional information is not necessary within a composite, the composite may be terminated by providing the appropriate data element separator or segment terminator.

A.1.3.10 Control Segments

A control segment has the same structure as a data segment, but it is used for transferring control information rather than application information.

A.1.3.10.1 Loop Control Segments

Loop control segments are used only to delineate bounded loops. Delineation of the loop shall consist of the loop header (LS segment) and the loop trailer (LE segment). The loop header defines the start of a structure that must contain one or more iterations of a loop of data segments and provides the loop identifier for this loop. The loop trailer defines the end of the structure. The LS segment appears only before the first occurrence of the loop, and the LE segment appears only after the last occurrence of the loop. Unbounded looping structures do not use loop control segments.

A.1.3.10.2 Transaction Set Control Segments

The transaction set is delineated by the transaction set header (ST segment) and the transaction set trailer (SE segment). The transaction set header identifies the start and identifier of the transaction set. The transaction set trailer identifies the end of the transaction set and provides a count of the data segments, which includes the ST and SE segments.

A.1.3.10.3 Functional Group Control Segments

The functional group is delineated by the functional group header (GS segment) and the functional group trailer (GE segment). The functional group header starts and identifies one or more related transaction sets and provides a control number

and application identification information. The functional group trailer defines the end of the functional group of related transaction sets and provides a count of contained transaction sets.

A.1.3.10.4 Relations among Control Segments

The control segment of this standard must have a nested relationship as is shown and annotated in this subsection. The letters preceding the control segment name are the segment identifier for that control segment. The indentation of segment identifiers shown below indicates the subordination among control segments.

GS Functional Group Header, starts a group of related transaction sets.

ST Transaction Set Header, starts a transaction set.

LS Loop Header, starts a bounded loop of data segments but is not part of the loop.

LS Loop Header, starts an inner, nested, bounded loop.

LE Loop Trailer, ends an inner, nested bounded loop.

LE Loop Trailer, ends a bounded loop of data segments but is not part of the loop.

SE Transaction Set Trailer, ends a transaction set.

GE Functional Group Trailer, ends a group of related transaction sets.

More than one ST/SE pair, each representing a transaction set, may be used within one functional group. Also more than one LS/LE pair, each representing a bounded loop, may be used within one transaction set.

A.1.3.11 Transaction Set

The transaction set is the smallest meaningful set of information exchanged between trading partners. The transaction set consists of a transaction set header segment, one or more data segments in a specified order, and a transaction set trailer segment. See figure A1, Transmission Control Schematic.

A.1.3.11.1 Transaction Set Header and Trailer

A transaction set identifier uniquely identifies a transaction set. This identifier is the first data element of the Transaction Set Header Segment (ST). A user assigned transaction set control number in the header must match the control number in the Trailer Segment (SE) for any given transaction set. The value for the number of included segments in the SE segment is the total number of segments in the transaction set, including the ST and SE segments.

A.1.3.11.2 Data Segment Groups

The data segments in a transaction set may be repeated as individual data segments or as unbounded or bounded loops.

A.1.3.11.3 Repeated Occurrences of Single Data Segments

When a single data segment is allowed to be repeated, it may have a specified maximum number of occurrences defined at each specified position within a given transaction set standard. Alternatively, a segment may be allowed to repeat

an unlimited number of times. The notation for an unlimited number of repetitions is ">1."

A.1.3.11.4 Loops of Data Segments

Loops are groups of semantically related segments. Data segment loops may be unbounded or bounded.

A.1.3.11.4.1 Unbounded Loops

To establish the iteration of a loop, the first data segment in the loop must appear once and only once in each iteration. Loops may have a specified maximum number of repetitions. Alternatively, the loop may be specified as having an unlimited number of iterations. The notation for an unlimited number of repetitions is ">1."

A specified sequence of segments is in the loop. Loops themselves are optional or mandatory. The requirement designator of the beginning segment of a loop indicates whether at least one occurrence of the loop is required. Each appearance of the beginning segment defines an occurrence of the loop.

The requirement designator of any segment within the loop after the beginning segment applies to that segment for each occurrence of the loop. If there is a mandatory requirement designator for any data segment within the loop after the beginning segment, that data segment is mandatory for each occurrence of the loop. If the loop is optional, the mandatory segment only occurs if the loop occurs.

A.1.3.11.4.2 Bounded Loops

The characteristics of unbounded loops described previously also apply to bounded loops. In addition, bounded loops require a Loop Start Segment (LS) to appear before the first occurrence and a Loop End Segment (LE) to appear after the last occurrence of the loop. If the loop does not occur, the LS and LE segments are suppressed.

A.1.3.11.5 Data Segments in a Transaction Set

When data segments are combined to form a transaction set, three characteristics are applied to each data segment: a requirement designator, a position in the transaction set, and a maximum occurrence.

A.1.3.11.6 Data Segment Requirement Designators

A data segment, or loop, has one of the following requirement designators for health care and insurance transaction sets, indicating its appearance in the data stream of a transmission. These requirement designators are represented by a single character code.

<u>DESIGNATOR</u>	<u>DESCRIPTION</u>
M- Mandatory	This data segment must be included in the transaction set. (Note that a data segment may be mandatory in a loop of data segments, but the loop itself is optional if the beginning segment of the loop is designated as optional.)
O- Optional	The presence of this data segment is the option of the sending party.

A.1.3.11.7 Data Segment Position

The ordinal positions of the segments in a transaction set are explicitly specified for that transaction. Subject to the flexibility provided by the optional requirement designators of the segments, this positioning must be maintained.

A.1.3.11.8 Data Segment Occurrence

A data segment may have a maximum occurrence of one, a finite number greater than one, or an unlimited number indicated by ">1."

A.1.3.12 Functional Group

A functional group is a group of similar transaction sets that is bounded by a functional group header segment and a functional group trailer segment. The functional identifier defines the group of transactions that may be included within the functional group. The value for the functional group control number in the header and trailer control segments must be identical for any given group. The value for the number of included transaction sets is the total number of transaction sets in the group. See figure A1, Transmission Control Schematic.

A.1.4 Envelopes and Control Structures

A.1.4.1 Interchange Control Structures

Typically, the term "interchange" connotes the ISA/IEA envelope that is transmitted between trading/business partners. Interchange control is achieved through several "control" components. The interchange control number is contained in data element ISA13 of the ISA segment. The identical control number must also occur in data element 02 of the IEA segment. Most commercial translation software products will verify that these two fields are identical. In most translation software products, if these fields are different the interchange will be "suspended" in error.

There are many other features of the ISA segment that are used for control measures. For instance, the ISA segment contains data elements such as authorization information, security information, sender identification, and receiver identification that can be used for control purposes. These data elements are agreed upon by the trading partners prior to transmission and are contained in the written trading partner agreement. The interchange date and time data elements as well as the interchange control number within the ISA segment are used for debugging purposes when there is a problem with the transmission or the interchange.

Data Element ISA12, Interchange Control Version Number, indicates the version of the ISA/IEA envelope. The ISA12 does not indicate the version of the transaction set that is being transmitted but rather the envelope that encapsulates the transaction. An Interchange Acknowledgment can be denoted through data element ISA14. The acknowledgment that would be sent in reply to a "yes" condition in data element ISA14 would be the TA1 segment. Data element ISA15, Test Indicator, is used between trading partners to indicate that the transmission is in a "test" or "production" mode. This becomes significant when the production phase of the project is to commence. Data element ISA16, Subelement Separator, is used by the translator for interpretation of composite data elements.

The ending component of the interchange or ISA/IEA envelope is the IEA segment. Data element IEA01 indicates the number of functional groups that are included within the interchange. In most commercial translation software products, an aggregate count of functional groups is kept while interpreting the interchange. This count is then verified with data element IEA01. If there is a discrepancy

ancy, in most commercial products, the interchange is suspended. The other data element in the IEA segment is IEA02 which is referenced above.

See the Appendix B, EDI Control Directory, for a complete detailing of the interchange control header and trailer.

A.1.4.2 Functional Groups

Control structures within the functional group envelope include the functional identifier code in GS01. The Functional Identifier Code is used by the commercial translation software during interpretation of the interchange to determine the different transaction sets that may be included within the functional group. If an inappropriate transaction set is contained within the functional group, most commercial translation software will suspend the functional group within the interchange. The Application Sender's Code in GS02 can be used to identify the sending unit of the transmission. The Application Receiver's Code in GS03 can be used to identify the receiving unit of the transmission. For health care, this unit identification can be used to differentiate between managed care, indemnity, and Medicare. The functional group contains a creation date (GS04) and creation time (GS05) for the functional group. The Group Control Number is contained in GS06. These data elements (GS04, GS05, AND GS06) can be used for debugging purposes during problem resolution. GS08, Version/Release/Industry Identifier Code is the version/release/sub-release of the transaction sets being transmitted in this functional group. Appendix B provides guidance for the value for this data element. The GS08 does not represent the version of the interchange (ISA/IEA) envelope but rather the version/release/sub-release of the transaction sets that are encompassed within the GS/GE envelope.

The Functional Group Control Number in GS06 must be identical to data element 02 of the GE segment. Data element GE01 indicates the number of transaction sets within the functional group. In most commercial translation software products, an aggregate count of the transaction sets is kept while interpreting the functional group. This count is then verified with data element GE01.

See the Appendix B, EDI Control Directory, for a complete detailing of the functional group header and trailer.

A.1.4.3 HL Structures

The HL segment is used in several X12 transaction sets to identify levels of detail information using a hierarchical structure, such as relating dependents to a subscriber. Hierarchical levels may differ from guide to guide. The following diagram, from transaction set 837, illustrates a typical hierarchy.

Each provider can bill for one or more subscribers and each subscriber can have one or more dependents. Each guide states what levels are available, the level's requirement, a repeat value, and whether that level has subordinate levels within a transmission.

A.1.5 Acknowledgments

A.1.5.1 Interchange Acknowledgment, TA1

The Interchange or TA1 Acknowledgment is a means of replying to an interchange or transmission that has been sent. The TA1 verifies the envelopes only. Transaction set-specific verification is accomplished through use of the Functional Acknowledgment Transaction Set, 997. See A.1.5.2, Functional Acknowledgment, 997, for more details. The TA1 is a single segment and is unique in the sense that this single segment is transmitted without the GS/GE envelope structures. A TA1 can be included in an interchange with other functional groups and transactions.

Encompassed in the TA1 are the interchange control number, interchange date and time, interchange acknowledgment code, and the interchange note code. The interchange control number, interchange date and time are identical to those that were present in the transmitted interchange from the sending trading partner. This provides the capability to associate the TA1 with the transmitted interchange. TA104, Interchange Acknowledgment Code, indicates the status of the interchange control structure. This data element stipulates whether the transmitted interchange was accepted with no errors, accepted with errors, or rejected because of errors. TA105, Interchange Note Code, is a numerical code that indicates the error found while processing the interchange control structure. Values for this data element indicate whether the error occurred at the interchange or functional group envelope.

The TA1 segment provides the capability for the receiving trading partner to notify the sending trading partner of problems that were encountered in the interchange control structure.

Due to the uniqueness of the TA1, implementation should be predicated upon the ability for the sending and receiving trading partners commercial translators to accommodate the uniqueness of the TA1. Unless named as mandatory in the Federal Rules implementing HIPAA, use of the TA1, although urged by the authors, is not mandated.

See the Appendix B, EDI Control Directory, for a complete detailing of the TA1 segment.

A.1.5.2 Functional Acknowledgment, 997

The Functional Acknowledgment Transaction Set, 997, has been designed to allow trading partners to establish a comprehensive control function as a part of their business exchange process. This acknowledgment process facilitates control of EDI. There is a one-to-one correspondence between a 997 and a functional group. Segments within the 997 can identify the acceptance or rejection of the functional group, transaction sets or segments. Data elements in error can also be identified. There are many EDI implementations that have incorporated the acknowledgment process in all of their electronic communications. Typically, the 997 is used as a functional acknowledgment to a previously transmitted functional group. Many commercially available translators can automatically generate this transaction set through internal parameter settings. Additionally translators will automatically reconcile received acknowledgments to functional groups that have been sent. The benefit to this process is that the sending trading partner

can determine if the receiving trading partner has received ASC X12 transaction sets through reports that can be generated by the translation software to identify transmissions that have not been acknowledged.

As stated previously the 997 is a transaction set and thus is encapsulated within the interchange control structure (envelopes) for transmission.

As with any information flow, an acknowledgment process is essential. If an “automatic” acknowledgment process is desired between trading partners then it is recommended that the 997 be used. Unless named as mandatory in the Federal Rules implementing HIPAA, use of the 997, although recommended by the authors, is not mandated.

See Appendix B, EDI Control Directory, for a complete detailing of transaction set 997.

IMPLEMENTATION

INTERCHANGE CONTROL HEADER

Notes: 1. The ISA is a fixed record length segment and all positions within each of the data elements must be filled. The first element separator defines the element separator to be used through the entire interchange. The segment terminator used after the ISA defines the segment terminator to be used throughout the entire interchange. Spaces in the example are represented by “.” for clarity.

Example: ISA* 00** 01* SECRET....* ZZ* SUBMITTERS.ID.* ZZ* RECEIVERS.ID...* 930602* 1253* U* 00401* 000000905* 1* T* :~

STANDARD

ISA Interchange Control Header

Purpose: To start and identify an interchange of zero or more functional groups and interchange-related control segments

Example: GE*1*1~

STANDARD

GE Functional Group Trailer**Purpose:** To indicate the end of a functional group and to provide control information

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	GE01	97	Number of Transaction Sets Included Total number of transaction sets included in the functional group or interchange (transmission) group terminated by the trailer containing this data element	M NO 1/6
REQUIRED	GE02	28	Group Control Number Assigned number originated and maintained by the sender	M NO 1/9

SEMANTIC: The data interchange control number GE02 in this trailer must be identical to the same data element in the associated functional group header, GS06.

IMPLEMENTATION

INTERCHANGE ACKNOWLEDGMENT

- Notes:
1. All fields must contain data.
 2. This segment acknowledges the reception of an X12 interchange header and trailer from a previous interchange. If the header/trailer pair was received correctly, the TA1 reflects a valid interchange, regardless of the validity of the contents of the data included inside the header/trailer envelope.
 3. See Section A.1.5.1 for interchange acknowledgment information.
 4. Use of TA1 is subject to trading partner agreement and is neither mandated or prohibited in the Appendix.

Example: TA1*000000905*940101*0100*A*001~

STANDARD

TA1 Interchange Acknowledgment

Purpose: To report the status of processing a received interchange header and trailer or the non-delivery by a network provider

REQUIRED	TA102	I08	Interchange Date Date of the interchange	M DT 6/6
			<p>This is the date of the original interchange being acknowledged. (YYMMDD)</p>	
REQUIRED	TA103	I09	Interchange Time Time of the interchange	M TM 4/4
			<p>This is the time of the original interchange being acknowledged. (HHMM)</p>	

REQUIRED TA104 I17 **Interchange Acknowledgment Code** M ID 1/1
This indicates the status of the receipt of the interchange control structure

CODE	DEFINITION
A	The Transmitted Interchange Control Structure Header and Trailer Have Been Received and Have No Errors.
E	The Transmitted Interchange Control Structure Header and Trailer Have Been Received and Are Accepted But Errors Are Noted. This Means the Sender Must Not Resend This Data.
R	The Transmitted Interchange Control Structure Header and Trailer are Rejected Because of Errors.

REQUIRED TA105 I18 **Interchange Note Code** M ID 3/3
This numeric code indicates the error found processing the interchange control structure

CODE	DEFINITION
000	No error
001	The Interchange Control Number in the Header and Trailer Do Not Match. The Value From the Header is Used in the Acknowledgment.
002	This Standard as Noted in the Control Standards Identifier is Not Supported.
003	This Version of the Controls is Not Supported
004	The Segment Terminator is Invalid
005	Invalid Interchange ID Qualifier for Sender
006	Invalid Interchange Sender ID
007	Invalid Interchange ID Qualifier for Receiver
008	Invalid Interchange Receiver ID
009	Unknown Interchange Receiver ID
010	Invalid Authorization Information Qualifier Value
011	Invalid Authorization Information Value
012	Invalid Security Information Qualifier Value
013	Invalid Security Information Value
014	Invalid Interchange Date Value
015	Invalid Interchange Time Value
016	Invalid Interchange Standards Identifier Value
017	Invalid Interchange Version ID Value
018	Invalid Interchange Control Number Value

019	Invalid Acknowledgment Requested Value
020	Invalid Test Indicator Value
021	Invalid Number of Included Groups Value
022	Invalid Control Structure
023	Improper (Premature) End-of-File (Transmission)
024	Invalid Interchange Content (e.g., Invalid GS Segment)
025	Duplicate Interchange Control Number
026	Invalid Data Element Separator
027	Invalid Component Element Separator
028	Invalid Delivery Date in Deferred Delivery Request
029	Invalid Delivery Time in Deferred Delivery Request
030	Invalid Delivery Time Code in Deferred Delivery Request
031	Invalid Grade of Service Code

STANDARD

997 Functional Acknowledgment

Functional Group ID: **FA**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Functional Acknowledgment Transaction Set (997) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Table 1 - Header

POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
010	ST	Transaction Set Header	M	1	
020	AK1	Functional Group Response Header	M	1	
LOOP ID - AK2					999999
030	AK2	Transaction Set Response Header	O	1	
LOOP ID - AK2/AK3					999999
040	AK3	Data Segment Note	O	1	
050	AK4	Data Element Note	O	99	
060	AK5	Transaction Set Response Trailer	M	1	
070	AK9	Functional Group Response Trailer	M	1	
080	SE	Transaction Set Trailer	M	1	

NOTES:

- 1/010** These acknowledgments shall not be acknowledged, thereby preventing an endless cycle of acknowledgments of acknowledgments. Nor shall a Functional Acknowledgment be sent to report errors in a previous Functional Acknowledgment.
- 1/010** The Functional Group Header Segment (GS) is used to start the envelope for the Functional Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.
- 1/010** There is only one Functional Acknowledgment Transaction Set per acknowledged functional group.
- 1/020** AK1 is used to respond to the functional group header and to start the acknowledgement for a functional group. There shall be one AK1 segment for the functional group that is being acknowledged.
- 1/030** AK2 is used to start the acknowledgement of a transaction set within the received functional group. The AK2 segments shall appear in the same order as the transaction sets in the functional group that has been received and is being acknowledged.
- 1/040** The data segments of this standard are used to report the results of the syntactical analysis of the functional groups of transaction sets; they report the extent to which the syntax complies with the standards for transaction sets and functional groups. They do not report on the semantic meaning of the transaction sets (for example, on the ability of the receiver to comply with the request of the sender).

IMPLEMENTATION

TRANSACTION SET HEADER

Usage: REQUIRED

Repeat: 1

Notes: 1. Use of the 997 transaction is subject to trading partner agreement or accepted usage and is neither mandated nor prohibited in this Appendix.

Example: ST*997*1234~

STANDARD

ST Transaction Set Header

Level: Header

Position: 010

Loop: _____

Requirement: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

- Set Notes:**
1. These acknowledgments shall not be acknowledged, thereby preventing an endless cycle of acknowledgments of acknowledgments. Nor shall a Functional Acknowledgment be sent to report errors in a previous Functional Acknowledgment.
 2. The Functional Group Header Segment (GS) is used to start the envelope for the Functional Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.
 3. There is only one Functional Acknowledgment Transaction Set per acknowledged functional group.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set	M ID 3/3
<p>SEMANTIC: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).</p>				
			CODE	DEFINITION
			997	Functional Acknowledgment
REQUIRED	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9
<p>The Transaction Set Control Numbers in ST02 and SE02 must be identical. The number is assigned by the originator and must be unique within a functional group (GS-GE). The number also aids in error resolution research. For example, start with the number 0001 and increment from there.</p>				
<p>Use the corresponding value in ST02 for this transaction set.</p>				

IMPLEMENTATION

FUNCTIONAL GROUP RESPONSE HEADER

Usage: REQUIRED
Repeat: 1
Example: AK1*HI*1~

STANDARD

AK1 Functional Group Response Header

Level: Header
Position: 020
Loop: _____
Requirement: Mandatory
Max Use: 1
Purpose: To start acknowledgment of a functional group
Set Notes: 1. AK1 is used to respond to the functional group header and to start the acknowledgement for a functional group. There shall be one AK1 segment for the functional group that is being acknowledged.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	AK101	479	Functional Identifier Code Code identifying a group of application related transaction sets SEMANTIC: AK101 is the functional ID found in the GS segment (GS01) in the functional group being acknowledged.	M ID 2/2
			HI Health Care Services Review Information (278)	
REQUIRED	AK102	28	Group Control Number Assigned number originated and maintained by the sender SEMANTIC: AK102 is the functional group control number found in the GS segment in the functional group being acknowledged.	M N0 1/9

IMPLEMENTATION

TRANSACTION SET RESPONSE HEADER

Loop: AK2 — TRANSACTION SET RESPONSE HEADER Repeat: 999999

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Required when communicating information about a transaction set within the functional group identified in AK1.

Example: AK2*278*000000905~

STANDARD

AK2 Transaction Set Response Header

Level: Header

Position: 030

Loop: AK2 Repeat: 999999

Requirement: Optional

Max Use: 1

Purpose: To start acknowledgment of a single transaction set

Set Notes: 1. AK2 is used to start the acknowledgement of a transaction set within the received functional group. The AK2 segments shall appear in the same order as the transaction sets in the functional group that has been received and is being acknowledged.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

ABSTRACT

This international standard provides a two-letter alphabetic code for representing the names of countries, dependencies, and other areas of special geopolitical interest for purposes of international exchange and general directions for the maintenance of the code. The standard is intended for use in any application requiring expression of entities in coded form. Most currencies are those of the geopolitical entities that are listed in ISO 3166, Codes for the Representation of Names of Countries. The code may be a three-character alphabetic or three-digit numeric. The two leftmost characters of the alphabetic code identify the currency authority to which the code is assigned (using the two character alphabetic code from ISO 3166, if applicable). The rightmost character is a mnemonic derived from the name of the major currency unit or fund. For currencies not associated with a single geographic entity, a specially-allocated two-character alphabetic code, in the range XA to XZ identifies the currency authority. The rightmost character is derived from the name of the geographic area concerned, and is mnemonic to the extent possible. The numeric codes are identical to those assigned to the geographic entities listed in ISO 3166. The range 950-998 is reserved for identification of funds and currencies not associated with a single entity listed in ISO 3166.

D-U-N-S Number Administration
899 Eaton Avenue
Bethlehem, PA 18025-0001

22

ABSTRACT

The D-U-N-S Number is a non-indicative nine-digit number assigned and maintained by Dun & Bradstreet to identify unique business establishments. D-U-N-S Numbers are assigned to businesses worldwide. The ninth digit of the D-U-N-S Number is a Modulus Ten Check Digit which catches 100% of single digit errors and 98% of single transposition errors. D-U-N-S Numbers provide positive identification of business locations possessing unique, separate, and distinct operations. Through the D-U-N-S Number, Dun & Bradstreet maintains linkage between units of an organization to easily identify corporate family relationships, such as those between headquarters, branches, subsidiaries, and divisions. The D-U-N-S Number is the non-indicative computer "address" of a business for which detailed marketing and credit information is maintained by Dun & Bradstreet.

ABSTRACT

The ZIP Code is a geographic identifier of areas within the United States and its territories for purposes of expediting mail distribution by the U.S. Postal Service. It is five or nine numeric digits. The ZIP Code structure divides the U.S. into ten large groups of states. The leftmost digit identifies one of these groups. The next two digits identify a smaller geographic area within the large group. The two rightmost digits identify a local delivery area. In the nine-digit ZIP Code, the four digits that follow the hyphen further subdivide the delivery area. The two leftmost digits identify a sector which may consist of several large buildings, blocks or groups of streets. The rightmost digits divide the sector into segments such as a street, a block, a floor of a building, or a cluster of mailboxes.

The USPS Domestic Mail Manual includes information on the use of the new 11-digit zip code.

Alexandria, VA 22314-2852

ABSTRACT

The data element dictionary contains the format and descriptions of data elements used to construct X12 segments. It also contains code lists associated with these data elements. The segment directory contains the format and definitions of the data segments used to construct X12 transaction sets.

121 Health Industry Identification Number

SIMPLE DATA ELEMENT/CODE REFERENCES

128/HI, 66/21, I05/20, 1270/HI

SOURCE

Health Industry Number Database

AVAILABLE FROM

Health Industry Business Communications Council
5110 North 40th Street
Phoenix, AZ 85018

ABSTRACT

The HIN is a coding system, developed and administered by the Health Industry Business Communications Council, that assigns a unique code number to hospitals and other provider organizations - the customers of health industry manufacturers and distributors.

130 Health Care Financing Administration Common Procedural Coding System

SIMPLE DATA ELEMENT/CODE REFERENCES

ABSTRACT

The Health care Financing Administration is developing the PlanID, which will be proposed as the standard unique identifier for each health plan under the Health Insurance Portability and Accountability Act of 1996.

D Change Summary

This is the first ASC X12N Implementation Guide (IG) for the 278. In future guides, this section will contain a summary of all changes since the previous guide.

E Data Element Name Index

This appendix contains an alphabetic listing of data elements used in this implementation guide. Consult the Data Element Dictionary for the complete list. Data element names in normal type are generic ASC X12 names. *Italic type indicates a health care industry defined name.*

Name	Payment Date
Definition	Date of payment.
Transaction Set ID	277
Locator Key	D 2200D SPA12 C001-2 373 156
H=Header, D=Detail, S=Summary	
Loop ID	
Segment ID/Reference Designator	
Composite ID-Sequence	
Data Element Number	
Page Number	

Accident Date

Date of the accident related to charges or to the patient's current condition, diagnosis, or treatment referenced in the transaction.

278 - Request

D | 2000C | DTP03 | - | 1251 75
D | 2000D | DTP03 | - | 1251 98

278 - Response

D | 2000C | DTP03 | - | 1251 249
D | 2000D | DTP03 | - | 1251 275

Action Code

Code indicating type of action

278 - Response

D | 2000F | HCR01 | - | 306 331

Admission Source Code

Code indicating the source of this admission.

278 - Request

D | 2000F | CL102 | - | 1314 189

278 - Response

D | 2000F | CL102 | - | 1314 367

Admission Type Code

Code indicating the priority of this admission.

278 - Request

D | 2000F | CL101 | - | 1315 189

278 - Response

D | 2000F | CL101 | - | 1315 367

Ambulance Transport Code

Code indicating the type of ambulance transport.

278 - Request

D | 2000F | CR103 | - | 1316 192

278 - Response

D | 2000F | CR103 | - | 1316 370

Ambulance Transport Reason Code

Code indicating the reason for ambulance transport.

278 - Request

D | 2000F | CR104 | - | 1317 192

Ambulance Trip Destination Address

Address of the place of destination of the ambulance transport.

278 - Request

D | 2000F | CR108 | - | 166 193

278 - Response

D | 2000F | CR108 | - | 166 370

Ambulance Trip Origin Address

Address of the place of origin of the ambulance transport.

278 - Request

D | 2000F | CR107 | - | 166 193

278 - Response

D | 2000F | CR107 | - | 166 370

Arterial Blood Gas Quantity

The Arterial Blood Gas test results breathing room air (furnish results of recent hospital tests).

278 - Request

D | 2000F | CR510 | - | 380 202

Birth Sequence Number

A number indicating the order of birth for the identified person in relationship to family members with the same date of birth.

278 - Request
D | 2010D | INS17 | - | 1470 120

278 - Response
D | 2010D | INS17 | - | 1470 299

Certification Condition Indicator

Code indicating whether or not the condition codes apply to the patient or another entity.

278 - Request
D | 2000F | CRC02 | - | 1073 181

Certification Effective Date

The date when the certification takes effect or the date range within which the certification is effective.

278 - Response
D | 2000F | DTP03 | - | 1251 345

Certification Expiration Date

Date on which the certification will expire.

278 - Response
D | 2000F | DTP03 | - | 1251 344

Certification Issue Date

The date when the certification was issued.

278 - Response
D | 2000F | DTP03 | - | 1251 343

Certification Number

Number assigned by the information source to this review outcome.

278 - Response
D | 2000F | HCR02 | - | 127 332

Certification Type Code

Code indicating the type of certification

278 - Request
D | 2000F | UM02 | - | 1322 142
D | 2000F | CR608 | - | 1322 207

278 - Response
D | 2000F | UM02 | - | 1322 326
D | 2000F | CR608 | - | 1322 382

Code Category

Specifies the situation or category to which the code applies.

278 - Request
D | 2000F | CRC01 | - | 1136 180

Code List Qualifier Code

Code identifying a specific industry code list.

278 - Request

D	2000F	DTP01	-	374	345

Delay Reason Code

Code indicating the reason why a request was delayed.

278 - Request

D	2000F	UM10	-	1514	149
---	-------	------	---	------	-----

Delivery Pattern Time Code

Code which specifies the time delivery pattern of the services..

278 - Request

D	2000F	HSD08	-	679	179
---	-------	-------	---	-----	-----

278 - Response

D	2000F	HSD08	-	679	366
---	-------	-------	---	-----	-----

Dependent Birth Date

The date of birth of the dependent.

278 - Request

D	2010D	DMG02	-	1251	117
---	-------	-------	---	------	-----

278 - Response

D	2010D	DMG02	-	1251	296
---	-------	-------	---	------	-----

Dependent First Name

The first name of the dependent.

278 - Request

D	2010D	NM104	-	1036	113
---	-------	-------	---	------	-----

278 - Response

D	2010D	NM104	-	1036	289
---	-------	-------	---	------	-----

Dependent Gender Code

A code indicating the gender of the dependent.

278 - Request

D	2010D	DMG03	-	1068	117
---	-------	-------	---	------	-----

278 - Response

D	2010D	DMG03	-	1068	296
---	-------	-------	---	------	-----

Dependent Last Name

The last name of the dependent.

278 - Request

D	2010D	NM103	-	1035	113
---	-------	-------	---	------	-----

278 - Response

D	2010D	NM103	-	1035	289
---	-------	-------	---	------	-----

Dependent Middle Name

The middle name of the dependent.

278 - Request

D	2010D	NM105	-	1037	113
---	-------	-------	---	------	-----

278 - Response

D	2010D	NM105	-	1037	289
---	-------	-------	---	------	-----

Dependent Name Suffix

A suffix following the name, including the generation of the patient, such as I, II, III, Jr, Sr.

278 - Request

D	2010D	NM107	-	1039	113
---	-------	-------	---	------	-----

278 - Response

D	2010D	NM107	-	1039	289
---	-------	-------	---	------	-----

Dependent Primary Identifier

Identifies the code number by which the dependent is known.

278 - Response

D	2010D	NM109	-	67	290
---	-------	-------	---	----	-----

Dependent Supplemental Identifier

Identifies another or additional distinguishing code number associated with the dependent

278 - Request

D	2010D	REF02	-	127	115
---	-------	-------	---	-----	-----

278 - Response

D	2010D	REF02	-	127	292
---	-------	-------	---	-----	-----

Diagnosis Code

An ICD-9-CM Diagnosis Code identifying a diagnosed medical condition.

278 - Request

D		2000E		HL01		-		628	300
D		2000F		HL01		-		628	318

Hierarchical Level Code

Code defining the characteristic of a level in a hierarchical structure.

278 - Request

D		2000A		HL03		-		735	54
D		2000B		HL03		-		735	59
D		2000C		HL03		-		735	74
D		2000D		HL03		-		735	97
D		2000E		HL03		-		735	122
D		2000F		HL03		-		735	138

278 - Response

D		2000A		HL03		-		735	222
D		2000B		HL03		-		735	235
D		2000C		HL03		-		735	246
D		2000D		HL03		-		735	272
D		2000E		HL03		-		735	301
D		2000F		HL03		-		735	319

Hierarchical Parent ID Number

Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to.

278 - Request

D		2000B		HL02		-		734	58
D		2000C		HL02		-		734	73
D		2000D		HL02		-		734	97
D		2000E		HL02		-		734	121
D		2000F		HL02		-		734	137

278 - Response

D		2000B		HL02		-		734	234
D		2000C		HL02		-		734	245
D		2000D		HL02		-		734	271
D		2000E		HL02		-		734	300
D		2000F		HL02		-		734	318

Hierarchical Structure Code

Code indicating the hierarchical application structure of a transaction set that utilizes the HL segment to define the structure of the transaction set

278 - Request

H				BHT01		-		1005	51
---	--	--	--	-------	--	---	--	------	-------	----

278 - Response

H				BHT01		-		1005	219
---	--	--	--	-------	--	---	--	------	-------	-----

Home Health Certification Period

Certification period for home health care covered by this plan of treatment.

278 - Request

D		2000F		CR604		-		1251	207
---	--	-------	--	-------	--	---	--	------	-------	-----

278 - Response

D		2000F		CR604		-		1251	381
---	--	-------	--	-------	--	---	--	------	-------	-----

Identification Code Qualifier

Code designating the system/method of code structure used for Identification Code (67)

278 - Request

D		2010A		NM108		-		66	57
D		2010B		NM108		-		66	61
D		2010C		NM108		-		66	90
D		2010E		NM108		-		66	126

278 - Response

D		2010A		NM108		-		66	226
D		2010B		NM108		-		66	237
D		2010C		NM108		-		66	263
D		2010D		NM108		-		66	289
D		2010E		NM108		-		66	305

Individual Relationship Code

Code indicating the relationship between two individuals or entities

278 - Request

D		2010D		INS02		-		1069	119
---	--	-------	--	-------	--	---	--	------	-------	-----

278 - Response

D		2010D		INS02		-		1069	298
---	--	-------	--	-------	--	---	--	------	-------	-----

Insured Indicator

Indicates whether the insured is the subscriber or a dependent.

278 - Request

D		2010D		INS01		-		1073	119
---	--	-------	--	-------	--	---	--	------	-------	-----

278 - Response

D		2010D		INS01		-		1073	298
---	--	-------	--	-------	--	---	--	------	-------	-----

Last Admission Period

Admission date of the most recent inpatient stay.

278 - Request

D		2000F		CR616		-		1251	209
---	--	-------	--	-------	--	---	--	------	-------	-----

Last Menstrual Period Date

The date of the last menstrual period (LMP).

278 - Request

D 2000C DTP03 - 1251	76
D 2000D DTP03 - 1251	99

278 - Response

D 2000C DTP03 - 1251	250
D 2000D DTP03 - 1251	276

Last Visit Date

Date the patient was last seen by the physician.

278 - Request

D 2000F CR613 - 373	209
-----------------------------------	-----

Level of Service Code

Code specifying the level of service rendered.

278 - Request

D 2000F UM06 - 1338	147
-----------------------------------	-----

278 - Response

D 2000F UM06 - 1338	330
-----------------------------------	-----

Medicare Coverage Indicator

A code indicating the Medicare coverage exists.

278 - Request

D 2000F CR607 - 1073	207
------------------------------------	-----

278 - Response

D 2000F CR607 - 1073	382
------------------------------------	-----

Monthly Treatment Count

Number of treatments rendered in the month of service.

278 - Request

D 2000F CR207 - 380	198
-----------------------------------	-----

278 - Response

D 2000F CR207 - 380	375
-----------------------------------	-----

Nursing Home Residential Status Code

Code specifying the status of a nursing home resident at the time of service.

278 - Request

D 2000F CL104 - 1345	190
------------------------------------	-----

278 - Response

D 2000F CL104 - 1345	368
------------------------------------	-----

Onset Date

Date of onset of indicated patient condition.

278 - Request

D 2000C DTP03 - 1251	79
D 2000D DTP03 - 1251	102

278 - Response

D 2000C DTP03 - 1251	252
D 2000D DTP03 - 1251	278

Oxygen Delivery System Code

Code to indicate if a particular form of delivery was prescribed.

278 - Request

D 2000F CR517 - 1382	203
------------------------------------	-----

278 - Response

D 2000F CR517 - 1382	378
------------------------------------	-----

Oxygen Equipment Type Code

Code indicating the specific type of equipment prescribed for the delivery of oxygen.

278 - Request

D 2000F CR503 - 1348	201
D 2000F CR504 - 1348	201
D 2000F CR518 - 1348	204

278 - Response

D 2000F CR503 - 1348	377
D 2000F CR504 - 1348	377
D 2000F CR518 - 1348	378

Oxygen Flow Rate

The oxygen flow rate in liters per minute.

278 - Request

D 2000F CR506 - 380	201
-----------------------------------	-----

278 - Response

D 2000F CR506 - 380	377
-----------------------------------	-----

Oxygen Saturation Quantity

The oxygen saturation (oximetry) test results.

278 - Request

D 2000F CR511 - 380	202
-----------------------------------	-----

Oxygen Test Condition Code

Code indicating the conditions under which a patient was tested.

278 - Request

D 2000F CR512 - 1349	202
------------------------------------	-----

Oxygen Test Findings Code

Code indicating the findings of oxygen tests performed on a patient.

278 - Request

D 2000F CR513 - 1350	202
D 2000F CR514 - 1350	203
D 2000F CR515 - 1350	203

Oxygen Use Period Hour Count

Number of hours per period of oxygen use.

278 - Request

D 2000F CR508 - 380	202
-----------------------------------	-----

278 - Response

D 2000F CR508 - 380	378
-----------------------------------	-----

Patient Condition Code

Code indicating the condition of the patient.

278 - Request

D | 2000F | CR208 | - | 1342 198

Patient Condition Description

Free-form description of the patient's condition.

278 - Request

D | 2000F | CR210 | - | 352 198

D | 2000F | CR211 | - | 352 198

Patient Discharge Facility Type Code

The type of facility from which the patient was most recently discharged.

278 - Request

D | 2000F | CR617 | - | 1384 210

Patient Status Code

A code indicating the patient's status at the date of admission, outpatient service, or start of care.

278 - Request

D | 2000F | CL103 | - | 1352 189

278 - Response

D | 2000F | CL103 | - | 1352 367

Patient Weight

Weight of the patient at time of treatment or transport.

278 - Request

D | 2000F | CR102 | - | 81 192

Period Count

Total number of periods

278 - Request

D | 2000F | HSD06 | - | 616 177

278 - Response

D | 2000F | HSD06 | - | 616 364

Physician Contact Date

Date of the home health agency's most recent contact with the physician.

278 - Request

D | 2000F | CR614 | - | 373 209

Physician Order Date

Date the agency received the verbal orders from the physician for start of care.

278 - Request

D | 2000F | CR612 | - | 373 209

Portable Oxygen System Flow Rate

Oxygen flow rate for a portable oxygen system in liters per minute.

278 - Request

D | 2000F | CR516 | - | 380 203

278 - Response

D | 2000F | CR516 | - | 380 378

Previous Certification Identifier

The number previously assigned to a health care services review outcome.

278 - Request

D | 2000F | REF02 | - | 127 150

278 - Response

D | 2000F | REF02 | - | 127 334

Procedure Code

Code identifying the procedure, product or service.

278 - Request

D | 2000F | HI01 | C022-2 | 1271 160

D | 2000F | HI02 | C022-2 | 1271 161

D | 2000F | HI03 | C022-2 | 1271 162

D | 2000F | HI04 | C022-2 | 1271 163

D | 2000F | HI05 | C022-2 | 1271 165

D | 2000F | HI06 | C022-2 | 1271 166

D | 2000F | HI07 | C022-2 | 1271 167

D | 2000F | HI08 | C022-2 | 1271 168

D | 2000F | HI09 | C022-2 | 1271 169

D | 2000F | HI10 | C022-2 | 1271 171

D | 2000F | HI11 | C022-2 | 1271 172

D | 2000F | HI12 | C022-2 | 1271 173

278 - Response

D | 2000F | HI01 | C022-2 | 1271 347

D | 2000F | HI02 | C022-2 | 1271 348

D | 2000F | HI03 | C022-2 | 1271 349

D | 2000F | HI04 | C022-2 | 1271 350

D | 2000F | HI05 | C022-2 | 1271 352

D | 2000F | HI06 | C022-2 | 1271 353

D | 2000F | HI07 | C022-2 | 1271 354

D | 2000F | HI08 | C022-2 | 1271 355

D | 2000F | HI09 | C022-2 | 1271 356

D | 2000F | HI10 | C022-2 | 1271 358

D | 2000F | HI11 | C022-2 | 1271 359

D | 2000F | HI12 | C022-2 | 1271 360

Procedure Date

Date when the health care procedure was performed.

278 - Request

D | 2000F | HI01 | C022-4 | 1251 160

D | 2000F | HI02 | C022-4 | 1251 161

D | 2000F | HI03 | C022-4 | 1251 162

D | 2000F | HI04 | C022-4 | 1251 164

D | 2000F | HI05 | C022-4 | 1251 165

D | 2000F | HI06 | C022-4 | 1251 166

D | 2000F | HI07 | C022-4 | 1251 167

D | 2000F | HI08 | C022-4 | 1251 168

D | 2000F | HI09 | C022-4 | 1251 170

D | 2000F | HI10 | C022-4 | 1251 171

D | 2000F | HI11 | C022-4 | 1251 172

D | 2000F | HI12 | C022-4 | 1251 173

278 - Response

D 2000F HI01 C022-4 1251	347
D 2000F HI02 C022-4 1251	348
D 2000F HI03 C022-4 1251	349
D 2000F HI04 C022-4 1251	351
D 2000F HI05 C022-4 1251	352
D 2000F HI06 C022-4 1251	353
D 2000F HI07 C022-4 1251	354
D 2000F HI08 C022-4 1251	355
D 2000F HI09 C022-4 1251	357
D 2000F HI10 C022-4 1251	358
D 2000F HI11 C022-4 1251	359
D 2000F HI12 C022-4 1251	360

Procedure Quantity

Number of occurrences of the procedure.

278 - Request

D 2000F HI01 C022-6 380	160
D 2000F HI02 C022-6 380	161
D 2000F HI03 C022-6 380	163

D 2000F HI06 C022-6 380	166
D 2000F HI07 C022-6 380	167
D 2000F HI08 C022-6 380	169
D 2000F HI09 C022-6 380	170
D 2000F HI10 C022-6 380	171
D 2000F HI11 C022-6 380	172
D 2000F HI12 C022-6 380	173

278 - Response

D 2000F HI01 C022-6 380	347
D 2000F HI02 C022-6 380	348
D 2000F HI03 C022-6 380	350
D 2000F HI04 C022-6 380	351
D 2000F HI05 C022-6 380	352
D 2000F HI06 C022-6 380	353
D 2000F HI07 C022-6 380	354
D 2000F HI08 C022-6 380	356
D 2000F HI09 C022-6 380	357
D 2000F HI10 C022-6 380	358
D 2000F HI11 C022-6 380	359
D 2000F HI12 C022-6 380	360

Product or Service ID Qualifier

Code identifying the type/source of the descriptive number used in Product/Service ID (234).

278 - Request

D 2000F CR610 - 235	208
-----------------------------------	-----

Prognosis Code

Code indicating physician's prognosis for the patient.

278 - Request

D 2000F UM08 - 923	148
D 2000F CR601 - 923	206

278 - Response

D 2000F CR601 - 923	381
-----------------------------------	-----

Proposed or Actual Admission Date

Requested or actual date of admission to a healthcare facility.

278 - Request

D 2000F DTP03 - 1251	155
------------------------------------	-----

278 - Response

D 2000F DTP03 - 1251	338
------------------------------------	-----

Proposed or Actual Discharge Date

Requested or actual date of discharge from a healthcare facility.

278 - Request

D 2000F DTP03 - 1251	156
------------------------------------	-----

278 - Response

D 2000F DTP03 - 1251	340
------------------------------------	-----

Proposed or Actual Service Date

Requested or actual date of service.

278 - Request

D 2000F DTP03 - 1251	153
------------------------------------	-----

278 - Response

D 2000F DTP03 - 1251	336
------------------------------------	-----

Proposed or Actual Surgery Date

Requested or actual date of surgery.

278 - Request

D 2000F DTP03 - 1251	158
------------------------------------	-----

278 - Response

D 2000F DTP03 - 1251	342
------------------------------------	-----

Provider Code

Code identifying the type of provider.

278 - Request

D 2010B PRV01 - 1221	71
D 2010E PRV01 - 1221	135

278 - Response

D 2010B PRV01 - 1221	243
D 2010E PRV01 - 1221	316

Provider Taxonomy Code

Code designating the provider type, classification, and specialization.

278 - Request

D 2010B PRV03 - 127	72
D 2010E PRV03 - 127	136

278 - Response

D 2010B PRV03 - 127	244
D 2010E PRV03 - 127	317

Quantity Qualifier

Code specifying the type of quantity

278 - Request			
D		2000F	HSD01 - 673 176
278 - Response			
D		2000F	HSD01 - 673 363

Reference Identification Qualifier

Code qualifying the reference identification

278 - Request			
D		2010B	REF01 - 128 63
D		2010B	PRV02 - 128 72
D		2010C	REF01 - 128 93
D		2010D	REF01 - 128 114
D		2010E	REF01 - 128 127
D		2010E	PRV02 - 128 136
D		2000F	REF01 - 128 150
278 - Response			
D		2010B	REF01 - 128 239
D		2010B	PRV02 - 128 244
D		2010C	REF01 - 128 266
D		2010D	REF01 - 128 291
D		2010E	REF01 - 128 306
D		2010E	PRV02 - 128 317
D		2000F	REF01 - 128 334

Reject Reason Code

Code assigned by issuer to identify reason for rejection

278 - Response			
D		2000A	AAA03 - 901 224
D		2010A	AAA03 - 901 232
D		2010B	AAA03 - 901 242
D		2000C	AAA03 - 901 248
D		2010C	AAA03 - 901 268
D		2000D	AAA03 - 901 274
D		2010D	AAA03 - 901 294
D		2010E	AAA03 - 901 315
D		2000F	AAA03 - 901 324
D		2000F	HCR03 - 901 332

Related Causes Code

Code identifying an accompanying cause of an illness, injury, or an accident.

278 - Request			
D		2000F	UM05 C024-1 1362 146
D		2000F	UM05 C024-2 1362 146
D		2000F	UM05 C024-3 1362 147

Release of Information Code

Code indicating whether the provider has on file a signed statement permitting the release of medical data to other organizations.

278 - Request			
D		2000F	UM09 - 1363 148

Request Category Code

Code indicating a type of request

278 - Request			
D		2000F	UM01 - 1525 141

278 - Response

D		2000F	UM01 - 1525 325
---	--	-------	---------------------------

Requester Address Line

Address line in the address of the requester.

278 - Request			
D		2010B	N301 - 166 65
D		2010B	N302 - 166 65

Requester City Name

Name of the city in the address of the requester.

278 - Request			
D		2010B	N401 - 19 66

Requester Contact Communication Number

Complete requester contact communications number, including country or area code when applicable.

278 - Request			
D		2010B	PER04 - 364 69
D		2010B	PER06 - 364 70
D		2010B	PER08 - 364 70

Requester Contact Name

Name identifying the requester's contact person.

278 - Request			
D		2010B	PER02 - 93 69

Requester Country Code

Code identifying the country in the address of the requester.

278 - Request			
D		2010B	N404 - 26 67

Requester First Name

First name of the requester of a health care services review.

278 - Request			
D		2010B	NM104 - 1036 61

278 - Response			
D		2010B	NM104 - 1036 237

Requester Identifier

Code uniquely identifying the provider requesting the services review to the payer, regulatory authority, or other authorized body or agency.

278 - Request			
D		2010B	NM109 - 67 62

278 - Response			
D		2010B	NM109 - 67 238

<p>Requester Last or Organization Name Last name or organization name of the requester of a health care services review.</p> <p>278 - Request D 2010B NM103 - 1035 61</p> <p>278 - Response D 2010B NM103 - 1035 237</p>	<p>Round Trip Purpose Description Free-form description of the purpose of the ambulance transport round trip.</p> <p>278 - Request D 2000F CR109 - 352 193</p>

**Service Provider Contact
Communication Number**

Complete service provider contact communications number, including country or area code when applicable.

278 - Request

D 2010E PER04 - 364	133
D 2010E PER06 - 364	134
D 2010E PER08 - 364	134

278 - Response

D 2010E PER04 - 364	312
D 2010E PER06 - 364	313
D 2010E PER08 - 364	313

Service Provider Contact Name

Name of person, group, or organization to contact at the entity providing service or at the entity that may provide service.

278 - Request

D 2010E PER02 - 93	133
----------------------------------	-----

278 - Response

D 2010E PER02 - 93	312
----------------------------------	-----

Service Provider Country Code

Code indicating the country in the mailing address of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E N404 - 26	131
---------------------------------	-----

278 - Response

D 2010E N404 - 26	310
---------------------------------	-----

Service Provider First Name

First name of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E NM104 - 1036	125
------------------------------------	-----

278 - Response

D 2010E NM104 - 1036	304
------------------------------------	-----

Service Provider Identifier

Code uniquely identifying the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E NM109 - 67	126
----------------------------------	-----

278 - Response

D 2010E NM109 - 67	305
----------------------------------	-----

**Service Provider Last or
Organization Name**

Last name or organization name of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E NM103 - 1035	125
------------------------------------	-----

278 - Response

D 2010E NM103 - 1035	304
------------------------------------	-----

Service Provider Middle Name

Middle name or middle initial name of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E NM105 - 1037	125
------------------------------------	-----

278 - Response

D 2010E NM105 - 1037	304
------------------------------------	-----

Service Provider Name Suffix

Suffix to the name of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E NM107 - 1039	126
------------------------------------	-----

278 - Response

D 2010E NM107 - 1039	305
------------------------------------	-----

**Service Provider Postal Zone
or ZIP Code**

Code indicating the postal code in the mailing address of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E N403 - 116	131
----------------------------------	-----

278 - Response

D 2010E N403 - 116	310
----------------------------------	-----

**Service Provider State or
Province Code**

Code indicating the state or province in the mailing address of the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E N402 - 156	131
----------------------------------	-----

278 - Response

D 2010E N402 - 156	310
----------------------------------	-----

**Service Provider Supplemental
Identifier**

Supplemental identification information about the provider to whom the patient has been or will be referred for service.

278 - Request

D 2010E REF02 - 127	128
-----------------------------------	-----

278 - Response

D 2010E REF02 - 127	307
-----------------------------------	-----

Service Trace Number

Unique number assigned by the provider to identify a request for reconciliation of the response to an internal system.

278 - Request

D 2000F TRN02 - 127	140
-----------------------------------	-----

278 - Response

D 2000F TRN02 - 127	321
-----------------------------------	-----

Service Type Code

Code identifying the classification of service

278 - Request				
D		2000F		UM03 - 1365 142
278 - Response				
D		2000F		UM03 - 1365 326

Service Unit Count

The quantity of units, times, days, visits, services, or treatments for the service described by the HCPCS codes, revenue code or procedure code.

278 - Request				
D		2000F		HSD02 - 380 176
278 - Response				
D		2000F		HSD02 - 380 363

Ship, Delivery or Calendar Pattern Code

The time delivery pattern for the services.

278 - Request				
D		2000F		HSD07 - 678 177
278 - Response				
D		2000F		HSD07 - 678 364

Skilled Nursing Facility Indicator

Code indicating whether or not a patient is receiving care in a 1861J1 (skilled nursing) facility

278 - Request				
D		2000F		CR606 - 1073 207

State Code

Code identifying the state.

278 - Request				
D		2000F		UM05 C024-4 156 147

Stretcher Purpose Description

Free-form description of the purpose of the use of a stretcher during ambulance service.

278 - Request				
D		2000F		CR110 - 352 193

Subluxation Level Code

Code identifying the specific level of subluxation.

278 - Request				
D		2000F		CR203 - 1367 195
D		2000F		CR204 - 1367 196
278 - Response				
D		2000F		CR203 - 1367 372
D		2000F		CR204 - 1367 373

Submitter Transaction Identifier

Trace or control number assigned by the originator of the transaction

278 - Request				
H				BHT03 - 127 52
278 - Response				
H				BHT03 - 127 220

Subscriber Birth Date

The date of birth of the subscriber to the indicated coverage or policy.

278 - Request				
D		2010C		DMG02 - 1251 95
278 - Response				
D		2010C		DMG02 - 1251 270

Subscriber First Name

The first name of the insured individual or subscriber to the coverage

278 - Request				
D		2010C		NM104 - 1036 90
278 - Response				
D		2010C		NM104 - 1036 263

Subscriber Gender Code

Code indicating the sex of the subscriber to the indicated coverage or policy.

278 - Request				
D		2010C		DMG03 - 1068 95
278 - Response				
D		2010C		DMG03 - 1068 270

Subscriber Last Name

The surname of the insured individual or subscriber to the coverage

278 - Request				
D		2010C		NM103 - 1035 90
278 - Response				
D		2010C		NM103 - 1035 263

Subscriber Middle Name

The middle name of the subscriber to the indicated coverage or policy.

278 - Request				
D		2010C		NM105 - 1037 90
278 - Response				
D		2010C		NM105 - 1037 263

Subscriber Name Suffix

Suffix of the insured individual or subscriber to the coverage.

278 - Request				
D		2010C		NM107 - 1039 90
278 - Response				
D		2010C		NM107 - 1039 263

Subscriber Primary Identifier

Primary identification number of the subscriber to the coverage.

278 - Request	
D 2010C NM109 - 67	91
278 - Response	
D 2010C NM109 - 67	263

Subscriber Supplemental Identifier

Identifies another or additional distinguishing code number associated with the subscriber.

278 - Request	
D 2010C REF02 - 127	93
278 - Response	
D 2010C REF02 - 127	266

Surgery Date

Requested, anticipated, or actual date of surgery.

278 - Request	
D 2000F CR609 - 373	208

Surgical Procedure Code

Code describing the surgical procedure most relevant to the care being rendered.

278 - Request	
D 2000F CR611 - 1137.....	209

Time Period Qualifier

Code defining the type of time period.

278 - Request	
D 2000F HSD05 - 615	177
278 - Response	
D 2000F HSD05 - 615	364

Trace Assigning Entity Additional Identifier

Additional identifier for the entity assigning the trace number.

278 - Request	
D 2000F TRN04 - 127	140
278 - Response	
D 2000F TRN04 - 127	322

Trace Assigning Entity Identifier

Identifies the organization assigning the trace number.

278 - Request	
D 2000F TRN03 - 509	140
278 - Response	
D 2000F TRN03 - 509	321

Trace Type Code

Code identifying the type of reassociation which needs to be performed.

278 - Request	
D 2000F TRN01 - 481	140
278 - Response	
D 2000F TRN01 - 481	321

Transaction Segment Count

A tally of all segments between the ST and the SE segments including the ST and SE segments.

278 - Request	
D SE01 - 96	212
278 - Response	
D SE01 - 96	384

Transaction Set Control Number

The unique identification number within a transaction set.

278 - Request	
H ST02 - 329	50
D SE02 - 329	212
278 - Response	
H ST02 - 329	218
D SE02 - 329	384

Transaction Set Creation Date

Identifies the date the submitter created the transaction

278 - Request	
H BHT04 - 373	52
278 - Response	
H BHT04 - 373	220

Transaction Set Creation Time

Time file is created for transmission.

278 - Request	
H BHT05 - 337	52
278 - Response	
H BHT05 - 337	220

Transaction Set Identifier Code

Code uniquely identifying a Transaction Set.

278 - Request	
H ST01 - 143	50
278 - Response	
H ST01 - 143	218

Transaction Set Purpose Code

Code identifying purpose of transaction set.

278 - Request	
H BHT02 - 353	51

278 - Response
H | | BHT02 | - | 353 219

Transaction Type Code

Code specifying the type of transaction.

278 - Response
H | | BHT06 | - | 640 220

Transport Distance

Distance traveled during the ambulance transport.

278 - Request
D | 2000F | CR106 | - | 380 193

278 - Response
D | 2000F | CR106 | - | 380 370

Treatment Count

Total number of treatments in the series.

278 - Request
D | 2000F | CR202 | - | 380 195

278 - Response
D | 2000F | CR202 | - | 380 372

Treatment Period Count

The number of time periods during which treatment will be provided to patient.

278 - Request
D | 2000F | CR206 | - | 380 197

278 - Response
D | 2000F | CR206 | - | 380 374

Treatment Series Number

Number this treatment is in the series of services.

278 - Request
D | 2000F | CR201 | - | 609 195

278 - Response
D | 2000F | CR201 | - | 609 372

Unit or Basis for Measurement Code

Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken.

278 - Request
D | 2000F | HSD03 | - | 355 176
D | 2000F | CR101 | - | 355 191
D | 2000F | CR105 | - | 355 192
D | 2000F | CR205 | - | 355 197

278 - Response
D | 2000F | HSD03 | - | 355 363
D | 2000F | CR105 | - | 355 370
D | 2000F | CR205 | - | 355 374

Utilization Management

Organization (UMO) Contact Communication Number

Complete UMO contact communications number, including country or area code when applicable.

278 - Response
D | 2010A | PER04 | - | 364 229
D | 2010A | PER06 | - | 364 230
D | 2010A | PER08 | - | 364 230

Utilization Management

Organization (UMO) Contact Name

Name identifying the UMO's contact person.

278 - Response
D | 2010A | PER02 | - | 93 229

Utilization Management

Organization (UMO) First Name

First name of the individual, such as the primary care provider, associated with the request for a health care services review.

278 - Request
D | 2010A | NM104 | - | 1036 56

278 - Response
D | 2010A | NM104 | - | 1036 226

Utilization Management

Organization (UMO) Identifier

Code uniquely identifying the Utilization Management Organization (UMO).

278 - Request
D | 2010A | NM109 | - | 67 57

278 - Response
D | 2010A | NM109 | - | 67 227

Utilization Management

Organization (UMO) Last or Organization Name

Name of the Utilization Management Organization (UMO) or last name of the party associated with the request for a health care services review.

278 - Request
D | 2010A | NM103 | - | 1035 56

278 - Response
D | 2010A | NM103 | - | 1035 226

**Utilization Management
Organization (UMO) Middle
Name**

Middle name or middle initial of the individual, such as the primary care provider, associated with the request for a health care services review.

278 - Request
D | 2010A | NM105 | - | 1037 56

278 - Response
D | 2010A | NM105 | - | 1037 226

**Utilization Management
Organization (UMO) Name
Suffix**

Suffix to the name of the individual, such as the primary care provider, associated with the request for a health care services review.

278 - Request
D | 2010A | NM107 | - | 1039 56

278 - Response
D | 2010A | NM107 | - | 1039 226

Valid Request Indicator

Code indicating if the information request or portion of the request is valid or invalid.

278 - Request
D | 2000A | AAA01 | - | 1073 223
D | 2010A | AAA01 | - | 1073 231
D | 2010B | AAA01 | - | 1073 241
D | 2000C | AAA01 | - | 1073 247
D | 2010C | AAA01 | - | 1073 267
D | 2000D | AAA01 | - | 1073 273
D | 2010D | AAA01 | - | 1073 293
D | 2010E | AAA01 | - | 1073 314
D | 2000F | AAA01 | - | 1073 323

**Version, Release, or Industry
Identifier**

Code indicating the version, release, sub-release and industry identification of the EDI standard being used.

278 - Request
D | 2000F | HI01 | C022-7 | 799 160
