Molina Provider News:

Over the Counter (OTC) COVID-19 Home Tests

Molina Healthcare remains committed to ensuring Medicaid recipients receive medically necessary care to prevent and treat the 2019 novel coronavirus (COVID-19). The purpose of this alert is to provide information on **OTC COVID-19 home tests** as described in **PT 2022-05: Community Pharmacy Dispensed Over the Counter (OTC) COVID-19 Home Tests**.

In accordance with the requirements of the Families First Coronavirus Response Act (FFCRA), Medicaid must cover COVID-19 tests intended for at-home testing (including tests where the individual performs self-collection of a specimen at home), when the test is ordered by an attending health care provider who has determined that the test is medically appropriate for the individual based on current accepted standards of medical practice and the test otherwise meets the statutory criteria in section 6001(a)(1) of the FFCRA.

Coverage of Food and Drug Administration (FDA) authorized COVID-19 diagnostic and screening tests with at-home sample collection is **effective January 4, 2022** under the requirements below.

Eligible OTC COVID-19 Home Test Kits

Eligible OTC COVID-19 home test kits must have emergency use authorization or FDA approval for home use in both symptomatic and asymptomatic patients and allow for self-collection without medical observation. The eligible OTC COVID-19 home test kits covered by Florida Medicaid are those available in package sizes of one (1) or two (2) home tests only. The In Vitro Diagnostics EUAs- Antigen Diagnostic Tests for SARS-CoV-2 website lists all tests, however only those with “**Home**” as an Authorized Setting will be covered. This is the In Vitro Diagnostics EUAs- Antigen Diagnostic Tests for SARS-CoV-2 website: <https://www.fda.gov/medical-devices/coronavirus-disease-2019-covid-19-emergency-use-authorizations-medical-devices/in-vitro-diagnostics-euas-antigen-diagnostic-tests-sars-cov-2#iaft1>.

Eligible Enrollees

Enrollees must have a prescription to obtain an eligible OTC COVID-19 home test kit.

Dispensing Providers

Only community pharmacies are eligible to dispense the eligible OTC COVID-19 home test kits.

- A maximum of four (4) eligible OTC COVID-19 home test kits per month per enrollee is covered; maximum unit overrides are available for medical necessity through the prior authorization process.
- Pharmacies must bill for reimbursement using the National Drug Code (NDC) for the eligible OTC COVID-19 home test kits dispensed. Pharmacies will be reimbursed at a maximum rate of \$8.00 per unit (test kit), and an additional \$2.00 incentive payment per claim.
- Pharmacists may prescribe and dispense the eligible OTC COVID-19 home test kits, as authorized by the Public Readiness and Emergency Preparedness (PREP) Act. Pharmacists that prescribe an eligible OTC COVID-19 home test kit **must** use their state license number in the “prescriber field” when billing for that eligible home test kit.

As a reminder, there are no prior authorization requirements and no co-payments for the tests.

If you have coverage questions, please contact Molina Healthcare at: 855-322-4076. Thank you for your continued care to our members!
