Advanced Imaging Program Expansion to Evolent Effective October 1, 2026

Molina Healthcare of Massachusetts cares about our members' health and is continually enhancing programs to improve the quality of care. We are pleased to announce that we are expanding our collaboration with Evolent as the administrator of the Molina Healthcare Advanced Imaging Program.

Beginning October 1, 2026, Molina Healthcare of Massachusetts members will require prior authorization through Evolent for select advanced imaging services rendered in a provider office, freestanding diagnostic facility, or outpatient hospital.

Services requiring prior authorization:

- CT/CTA
- MRI/MRA
- PET scan

Treatment plans will be reviewed using nationally recognized, evidence-based guidelines. Providers may benefit from real-time authorizations for evidence-based treatment plans submitted through Evolent's online portal, RadMD; eligibility verification directly in the portal before submission; telephonic intake when needed; Evolent physicians available for physician discussions; and a dedicated practice engagement team to support transition and ongoing operations.

Authorizations issued by Molina Healthcare of Massachusetts before October 1, 2026, are effective until the authorization expiration date. Beginning October 1, 2026, providers should submit all new prior authorization requests to Evolent for services scheduled on or after that date.

How to submit requests: Use the Evolent provider portal, RadMD, at evolent.com/provider-portal, or submit by telephone Monday–Friday, 8:00 a.m.–8:00 p.m. EST: 1.800.424.6112 for Medicare or 1.866.642.9702 for Duals.

Training and additional information:

Training information, including session details and dedicated provider outreach, will be shared prior to October 1, 2026 go-live date to support readiness and ensure a smooth transition. Questions before training may be directed to Evolent at practicesuccess@evolent.com.

Thank you for your participation in our network and dedication to Molina members' health.
