## Skilled Nursing Facility Flu Vaccination

This is an advisory notification to Molina Healthcare of California (MHC) network providers. As a Molina Healthcare contracted skilled nursing facility, you play a critical role in our members' health and their decision to get vaccinated against influenza.

The Advisory Committee Immunization Practices (ACIP) recommends annual influenza vaccination for everyone 6 months and older to prevent influenza. **This is particularly important for people who are at high risk of serious complications from influenza, which includes residents of long term care facilities.**

"One study showed that flu vaccination was associated with a 71% reduction in flu-related hospitalizations among adults of all ages and a 77% reduction among adults 50 years of age and older during the 2011-2012 flu season." ([Talbot, 2013](#))

**We are requesting your support in coordinating the efforts of administering the vaccine at your facility to our members which includes:**

- **Member education**
- **Ordering of vaccines and supplies**
- **Facilitating communication between member and primary care provider (PCP)**

Attached are additional materials for your reference and to distribute to your staff.

Sincerely,

Eric Huang M.D.

Medical Director, Molina Healthcare of California
